# Suven Life Sciences (SUVEN)

Horizon: **Swing (1–4 wk)** · Bias tested: **Neutral** · As of **03 Jun 2026**

**AVOID**

| CMP | 52W H / L | MKT CAP | P/E (TTM) VS SECTOR | ROE / ROCE |
|---|---|---|---|---|
| ₹275 | ₹303 / ₹124 | ₹7,258 Cr | N/A (loss) · P/B 12.3× | -79% / -77% |

| PROMOTER (Δ, PLEDGE) | FII / DII Δ | BETA | ADV | NET DEBT |
|---|---|---|---|---|
| 70.15% (↑, nil pledge) | 0.91% / 4.62% | High (binary) | N/A — verify | Net cash (~₹17 Cr borr.) |

## PRIMARY CATALYST — THE REASON IT MOVES NOW

**Masupirdine (SUVN-502) global Phase 3 in Alzheimer's-agitation — the company's single binary value driver — is now 76% enrolled (≈375 of ~500 patients, 80 sites N. America & Europe); enrollment to complete end-CY2026 with topline data due ~April 2027.**

| CATEGORY | QUANTIFIED IMPACT | PROBABILITY | WINDOW |
|---|---|---|---|
| Product Approval / Clinical Readout | Binary: success → first-in-class 5-HT6 for AD-agitation, re-rate / licensing; failure → option value collapses | L–M of positive Ph3 | Enrol. end-2026; **readout ~Apr-2027** |

**Priced in?** Mkt cap ₹7,258 Cr is ~100% option value (company is pre-revenue) and the stock sits near its 52W high — a meaningful success probability is already embedded. Neither the full positive re-rate nor an outright failure is in the price; it is a coiled binary with the trigger ~10 months out — i.e. **beyond the swing window**. · Source: BSE/co. release + ClinicalTrials.gov NCT05397639, 26 May 2026

| BULL | BASE | BEAR |
|---|---|---|
| ₹450–550 | ₹240–305 | ₹110–145 |
| Positive Ph3 (~Apr-27): asset de-risked, licensing optionality (~+65% to +100%) | Muddle-through to readout; range-bound on milestone newsflow | Ph3 fails / safety signal: drifts toward cash+book floor (~−50% to −60%) |

*Suven Life is a single-asset, pre-revenue bet on the Masupirdine Phase 3 in Alzheimer's agitation. The stock has run ~+57% in six months on anticipation and a ₹426 Cr promoter-funded warrant raise — but the binary readout is ~April 2027, well beyond a swing window, leaving near-term price action momentum- and headline-driven with no earnings anchor.*

## CATALYST LADDER — SECONDARY TRIGGERS, RANKED BY IMPACT × PROBABILITY

| TYPE | EVENT | QUANTIFIED IMPACT | PROB | TIMELINE | SOURCE / DATE |
|---|---|---|---|---|---|
| Capital / Ownership | Warrant conversion — 3.18 Cr shares @ ₹134; promoter stake to 70.15% | ₹425.7 Cr raised — funds the trial through readout; removes dilution & funding overhang; promoter conviction signal | H | Done (Mar-26) | BSE filing, Mar 2026 |
| Operational | Phase 3 enrollment completion milestone | De-risks timeline; momentum/newsflow trigger toward readout | H | Q4 CY2026 | Co. guidance, May 2026 |
| Restructuring / Deal | Potential Masupirdine out-licensing / partnership | Validates asset + non-dilutive cash; would convert this to tactical long | M–L | Open-ended | No filing — qualitative |
| Governance | Annual General Meeting — pipeline / FY26 update | Low price impact; commentary on burn & runway | H | 25 Aug 2026 | Board, May 2026 |

| TYPE | EVENT | QUANTIFIED IMPACT | PROB | TIMELINE | SOURCE / DATE |
|---|---|---|---|---|---|
| Pipeline optionality | Earlier CNS NCEs (narcolepsy/H3, depression candidates) | Optionality only — Phase 1/2; not in near-term price | L | Multi-year | Co. pipeline — qualitative |
| Technical | Stock near 52W high (₹275 vs ₹303); +57% 6M momentum | Breakout > ₹303 opens blue-sky; loss of ₹250 risks momentum unwind | M | Now | Price action, Jun 2026 |

## WHAT THE STREET IS PRICING IN

No meaningful sell-side consensus — coverage is thin (FII just **0.91%**, DII 4.62%; ~70% promoter, balance retail) and P/E is **N/A** as the company is loss-making. IN the price: anticipation of enrollment completion, the promoter-funded ₹426 Cr raise, and embedded odds of a positive Masupirdine readout — the stock sits near its 52W high. NOT in the price: any earnings or cash flow (there is none — pure option value), and neither the full positive re-rate nor an outright Phase-3 failure. This is a binary-event biotech, not a multiples story.

## KEY LEVELS & TRADE FRAME

| | |
|---|---|
| Entry zone | ₹250-262 (pullback) |
| Stop (swing-low / ~50-DMA, approx) | ₹228 |
| Target 1 / Target 2 | ₹300 / ₹330 |
| R:R · suggested size | ~1.7-2.8:1 · ≤1-2% cap |

Levels approx — verify on chart (no live DMA feed). Chasing at ₹275 into 52W-high resistance is poor R:R; size small given binary tail.

## RISKS TO WATCH

| RISK | TRIGGER | DOWNSIDE | PROB |
|---|---|---|---|
| Phase 3 failure | Negative topline ~Apr-27; 5-HT6 class & prior SUVN-502 Ph2 (cognition) failures | −50% to −60% | M |
| Valuation de-rating | Momentum unwind / risk-off in speculative biotech (P/B 12.3×, near 52W high) | −25% to −35% | M |
| Single-asset concentration | Safety signal or trial halt — no revenue to cushion | −40% | L–M |
| Cash burn / dilution | Trial overruns beyond ~₹426 Cr runway (~₹70 Cr/qtr burn) | −15% | L |
| Subjective endpoint | Agitation (CMAI) scale & FDA bar — qualitative | n/a | L |

## CATALYST CALENDAR

| DATE | EVENT |
|---|---|
| 25 Aug 2026 | AGM — pipeline / FY26 update |
| Q4 CY2026 | Phase 3 enrollment completion (target) |
| ~Apr 2027 | **Masupirdine Phase 3 topline readout** (the binary) |
| Quarterly | FY27 results — track cash burn vs ₹426 Cr runway |

**AVOID**

Pre-revenue, single-asset biotech at 12.3× book with a binary Phase-3 readout ~10 months out (Apr-2027) and a checkered 5-HT6 scientific history — no near-term catalyst underwrites a swing entry near the 52W high, and momentum-only risk/reward is unfavourable. **Flips the call:** a Masupirdine out-licensing/partnership deal or a positive interim/enrollment-completion surprise — either converts this to a small tactical momentum long with a tight stop.

**Sources:** screener.in (CMP/mkt-cap/ROE/shareholding, 02 Jun 2026); company & BSE releases + ClinicalTrials.gov NCT05397639 (Masupirdine Phase 3, 76% enrolment, 26 May 2026); FY26 results / net loss ₹276 Cr (company, May 2026); warrant conversion ₹425.7 Cr (BSE filing, Mar 2026); Business Standard / MarketsMojo price & results coverage (May 2026). Discarded a stale ₹209.80 post-results vendor read in favour of the internally-consistent ₹275 × ~26.4 Cr sh ≈ ₹7,258 Cr set.
