RATING	PRICE TARGET	UPSIDE
NOT RATED	N/A	N/A

Investment Horizon: NOT RECOMMENDED for investment at this stage

One-line thesis: Natura Hue Chem is a dormant micro-cap penny stock with serial business pivots, negligible revenue, persistent losses, and dangerously low promoter ownership of 16%, making it un-investable at current valuations.

Report Date: 15 Jun 2026 | Analyst: MPM Institutional Research Desk | Data: Screener.in (fetched 15-Jun-2026)

IMPORTANT DISCLAIMER: This report covers a micro-cap penny stock (MCap Rs. 16.1 Cr) with no viable business operations, persistent losses, and characteristics consistent with dormant/shell company status. The 'NOT RATED' designation reflects that the company does not meet minimum investability thresholds. This report is for informational purposes only.

SECTION 2 — INVESTMENT THESIS (WHY NOT TO OWN)

- **No viable business:** NATHUEC has reported near-zero revenue (Rs. 0.07 Cr in FY24, Rs. 0.00 Cr in FY25 and FY26) across all its stated business lines — chemicals, cargo handling, electronics — none of which appears to be operational at any meaningful scale.
- **Persistent and deepening losses:** Net loss worsened dramatically to Rs. -1.18 Cr in FY26 (EPS: -2.85) from Rs. -0.01 Cr in FY25, representing a 118x deterioration in a single year, driven entirely by a Rs. 1.26 Cr expense spike with zero corresponding revenue.
- **Serial business pivots with no follow-through:** The company was originally a dye chemicals maker, then pivoted to organic farming, then CRGO laminates, then Visakhapatnam port cargo handling, and most recently electronics/R&D; — none of these pivots generated sustained revenue above Rs. 2-3 Cr (and only briefly in FY15-FY19).
- **Dangerously low promoter ownership (16.37%):** Promoter holding has been stuck at exactly 16.37% for at least the past 12 quarters — no promoter buying, no commitment to the business. For a micro-cap, this is a critical governance red flag.
- **Near-term catalyst: NONE identified.** There are no disclosed contracts, capex plans, order wins, or strategic partnerships in any public filing.

- **Biggest structural risk:** The stock's 5x price surge (from Rs. 7.52 to Rs. 39.7 in 12 months) with zero underlying business improvement strongly suggests speculative/operator-driven activity — making it susceptible to a catastrophic de-rating once momentum reverses.

SECTION 3 — BUSINESS OVERVIEW

- **Company background:** Natura Hue Chem Ltd (originally incorporated 1995) was once engaged in dye intermediates and chemicals. It has since undergone multiple business line changes with no sustained commercial traction in any segment.
- **Stated business segments:** The Screener.in insights section identifies 'Revenue from Cargo Handling Services' and 'Revenue from Consulting Services' as segment disclosures — both gated behind a premium login. Actual operational revenues have been effectively zero since FY22.
- **Revenue collapse:** Peak revenue was Rs. 2.83 Cr (FY18). By FY22-FY26 revenue fell to Rs. 0.05-0.07 Cr, then to zero — the company appears to have no active customers or contracts as of FY26.
- **Balance sheet profile:** Total assets of Rs. 9.80 Cr (FY26) consist primarily of 'Other Assets' (Rs. 8.63 Cr, likely loans/advances/debtors) and Investments (Rs. 1.17 Cr), with minimal fixed assets (Rs. 0.00 Cr). This asset profile is inconsistent with any manufacturing or service business.
- **Promoters:** Ravindra Pokhrana, Mansoor Ahmed, Satyawati Parashar, Aditya Sharma, Hifzul Rahim, Komal Goyal. Combined promoter holding is 16.37%, unchanged for at least 12 quarters — suggesting passivity or lock-up constraints rather than active management.
- **Registered office:** Raipur, Chhattisgarh. Listed on BSE (531834) and NSE (NATHUEC). Face Value Rs. 10, total shares outstanding approximately 41.4 lakh (estimated from Rs. 4.15 Cr equity capital at Rs. 10 FV).

SECTION 4 — INDUSTRY & COMPETITIVE LANDSCAPE

- **No definable industry:** NATHUEC's actual revenue-generating business is unidentifiable — the company has no meaningful operations in any of its stated sectors (chemicals, cargo handling, electronics). This makes meaningful industry analysis impossible.
- **Historical chemical sector context (legacy):** India's specialty chemicals market is growing at ~12-15% CAGR driven by China+1 supply chain shifts, export opportunities, and domestic demand. However, NATHUEC generates zero chemicals revenue and has no stated production capacity.
- **Competitive moat — None:** Pricing power = None (no active sales). Switching costs = None (no customers). Scale = Negligible. IP = None disclosed. Distribution = None. The company has no competitive position in any market.
- **Policy environment:** PLI schemes for chemicals and electronics are not accessible to a dormant micro-cap with no production capacity, capex, or technical personnel.

Illustrative Peer Context (Chemical Micro-Caps — NOT direct business peers):

Note: No true operational peer exists for NATHUEC given its shell-like status. The following are BSE-listed micro-cap chemical companies for context only. Peer financials NOT available from Screener without separate fetch; marked N/A per data sourcing rules.

Company	CMP (Rs.)	MCap (Cr)	TTM Rev (Cr)	ROCE %	P/E
Peer 1 (BSE micro-cap chemical)	N/A*	N/A*	N/A*	N/A*	N/A*
Peer 2 (BSE micro-cap chemical)	N/A*	N/A*	N/A*	N/A*	N/A*
Peer 3 (BSE micro-cap chemical)	N/A*	N/A*	N/A*	N/A*	N/A*

SECTION 5 — MANAGEMENT QUALITY & CAPITAL ALLOCATION

- **Promoter background:** The six promoters (Ravindra Pokhrana, Mansoor Ahmed, Satyawati Parashar, Aditya Sharma, Hifzul Rahim, Komal Goyal) hold collectively 16.37% — extraordinarily low for a promoter-controlled entity. No publicly available biographies or prior track record are on record.
- **Capital allocation track record — Poor:** Free cash flow has been negative in 8 of the last 11 years. The company has cycled through multiple business lines without generating a return above cost of capital in any of them. No evidence of disciplined capital allocation exists.
- **Dividend policy:** Zero dividends paid in any year in the available history (FY15-FY26). Dividend payout ratio is 0% throughout. This is consistent with a loss-making company but provides no return to shareholders.
- **Promoter pledging:** Pledge percentage not disclosed on the Screener public page (may require premium login). The 16.37% promoter holding has been completely static for 12 consecutive quarters, which is unusual and warrants scrutiny.
- **ESOP/Buyback history:** No evidence of ESOP grants or share buybacks in the available public data.
- **Corporate governance concerns (HIGH):** (1) Promoter holding at 16.37% is dangerously low for any micro-cap, raising concerns about management commitment. (2) The company's reported expenses in FY26 (Rs. 1.26 Cr) with zero revenue is unexplained by any public filing. (3) The 'Other Assets' of Rs. 8.63 Cr on a Rs. 9.80 Cr balance sheet, with no disclosed counterparty, warrants scrutiny for related-party transactions.

SECTION 6 — FINANCIAL DEEP-DIVE (Standalone Figures, Rs. Crores)

Data source: Screener.in, standalone figures. All figures in Rs. Crores. FY26E/FY27E not provided — no basis for forward estimates given zero revenue.

Income Statement

Metric	FY24 (Mar 2024)	FY25 (Mar 2025)	FY26 (Mar 2026)

Key Ratios

Ratio	FY24	FY25	FY26
ROCE %	1.12%	-0.18%	-11.34%
ROE %	N/A	N/A	-11.7%
Debtor Days	0.00	N/A	N/A
Inventory Days	N/A	N/A	N/A
Days Payable	N/A	N/A	N/A
Cash Conversion Cycle	N/A	N/A	N/A
D/E Ratio	0.03x	0.02x	0.03x
Current Ratio	N/A	N/A	N/A
Book Value (Rs.)	~25.5	~25.5	23.0

- **Revenue trajectory:** Revenue fell from a peak of Rs. 2.83 Cr (FY18) to effectively zero by FY25 and FY26 — the company has no active revenue-generating operations as of the most recent reporting period.
- **Margin direction:** Not meaningful — operating margins are deeply negative (or incalculable) because there is no revenue base. The FY26 expense spike of Rs. 1.26 Cr with zero revenue requires explanation.
- **Debt level:** Low on a headline basis (Rs. 0.25 Cr borrowings, D/E ~0.03x), but the 'Other Assets' of Rs. 8.63 Cr (88% of total assets) is opaque — could represent loans to related parties, an impaired investment, or other off-balance-sheet concerns.
- **FCF quality:** FCF has been negative in FY24 (-0.18) and FY26 (-0.54). The FY25 positive FCF of Rs. 0.40 Cr was an anomaly — not associated with any visible business activity — and may reflect receipts from asset disposals or related-party returns.

SECTION 7 — EARNINGS QUALITY CHECKLIST

Check	Status	Detail
-------	--------	--------

Revenue recognition consistency	RED	Zero revenue 2 years running; expense of Rs. 1.26 Cr in FY26 with no revenue is anomalous.
Receivables growth vs revenue	N/A	No receivables and no revenue — ratio is undefined.
Cash Conversion Cycle trend	N/A	No trading activity to generate a CCC.
Contingent liabilities	Unknown	Not disclosed on public Screener page.
Auditor tenure / changes	Unknown	Auditor details not available on public page.
RPTs as % of revenue	RED	'Other Assets' of Rs. 8.63 Cr (88% of balance sheet) is opaque; RPT risk is high.
Other income as % of PBT	RED	Other income (Rs. 0.09 Cr) exceeds zero operating profit — the company runs on other income. In FY24 other income (0.15) drove 125% of PBT (0.12).
Tax rate consistency	AMBER	Tax rate has been volatile: 0%, -50%, 31%, 17% across years. Deferred tax effects not explained.

- **Most critical RED flag:** The Rs. 1.26 Cr expense in FY26 with zero revenue is unexplained and represents a company paying out cash with no corresponding business activity — consistent with a dormant company maintaining legal/compliance costs, OR potentially channelling funds to related parties.
- **Other income dependency (RED):** The company's 'positive' P&L; years (FY24) were driven entirely by Other Income (Rs. 0.15 Cr on PBT of Rs. 0.12 Cr) — not operations. This is a low-quality earnings signature.
- **Balance sheet opacity (RED):** 'Other Assets' constituting 88% of the balance sheet with no public breakdown is the single biggest governance and accounting risk in this company.
- **Watch-point for future periods:** Any reduction in 'Other Assets' without a corresponding cash inflow or explained exit would signal impairment or related-party write-offs.

SECTION 8 — VALUATION

Valuation Methodology Note:

- **P/E valuation: Not applicable.** The company has reported losses in 7 of the last 11 years. No forward earnings estimate is possible with zero revenue and no disclosed business pipeline.
- **P/B valuation:** At CMP of Rs. 38.9 and Book Value of Rs. 23.0, the stock trades at 1.69x P/B. Given the opacity of the 'Other Assets' (88% of book value), this book value may be materially overstated. Adjusted P/B (if Other Assets are zero) would be approximately 14.5x (on Rs. 2.68 Cr tangible net worth excl. Other Assets) — extremely expensive for a shell.
- **DCF: Not applicable.** WACC cannot be estimated; FCF is negative; terminal growth rate is meaningless for a company with no revenue trajectory.
- **EV/EBITDA: Not applicable.** EBITDA is deeply negative.
- **Market cap vs book value:** MCap of Rs. 16.1 Cr vs Total Assets of Rs. 9.80 Cr implies a premium to asset value — unwarranted for a loss-making shell.
- **Price target: NOT RATED.** No target price is set. The rational fair value range based on book value (if assets are good) is Rs. 13-18 per share — 53-66% BELOW the current price of Rs. 38.9.

Scenario Analysis

Scenario	Key Assumption	Fair Value (Rs./sh)	vs. CMP (Rs. 38.9)
Bull	All 'Other Assets' realised at face; new business established	18-22	-43% to -53%

Scenario	Key Assumption	Fair Value (Rs./sh)	vs. CMP (Rs. 38.9)
Base	Other Assets partially impaired; no new business	10-14	-64% to -74%
Bear	Other Assets fully impaired; liquidation value only	5-8	-79% to -87%

SECTION 9 — KEY RISKS

- **Speculative price run risk:** The stock has risen 417% in 12 months (from Rs. 7.52 to Rs. 39.7) with zero improvement in fundamentals — the hallmark of operator/penny-stock manipulation. Probability: H. Impact: H (catastrophic loss on unwinding). Monitor via: volume spikes, order-book depth, promoter selling.
- **Going concern risk:** With zero revenue and Rs. 1.26 Cr expenses in FY26, the company's net worth declined to Rs. 9.55 Cr (equity + reserves). If expenses continue at this rate with no revenue, the company could deplete reserves within 6-8 years. Probability: M. Impact: H. Monitor via: annual report, reserves trend.
- **Other Assets impairment risk:** Rs. 8.63 Cr (88% of total assets) sits in 'Other Assets' with no public breakdown. If these are loans to related parties or impaired investments, the effective book value collapses. Probability: M. Impact: H. Monitor via: Notes to accounts, auditor qualifications.
- **Liquidity risk:** With MCap of only Rs. 16.1 Cr and likely thin float, exit at any meaningful size is nearly impossible without moving the market. Probability: H (if trying to sell). Impact: H. Monitor via: daily traded volume.
- **Regulatory/exchange delisting risk:** BSE/NSE have periodic surveillance actions and SME-to-main board migration rules. A company with zero revenue could face compliance notices. Probability: M. Impact: H. Monitor via: BSE/NSE circulars on NATHUEC.
- **Management abandonment risk:** With promoters at 16.37% and no skin in the game, there is no incentive for management to rebuild the business. Probability: H. Impact: M-H. Monitor via: promoter shareholding disclosures, director resignation filings.
- **Accounting opacity risk:** The unexplained FY26 expense of Rs. 1.26 Cr with zero revenue raises questions about whether the expense is legitimate business cost or a fund transfer. Probability: M. Impact: H. Monitor via: auditor report, related-party transaction disclosures.

SECTION 10 — RECOMMENDATION

- **Rating: NOT RATED** (company does not meet minimum investability criteria — persistent losses, zero revenue, shell-adjacent characteristics) | Conviction: N/A
- **12-month price target:** N/A. Rational asset-based fair value is Rs. 10-18/share (54-74% below CMP). Any target price would be meaningless in a speculative-momentum-driven stock.
- **Suggested entry zone:** DO NOT BUY. This is not an investable opportunity at any price above Rs. 15-20 without verified evidence of a new business being operational and revenue-generating.
- **Investment horizon:** N/A.
- **Thesis invalidation triggers (conditions that would change this NOT RATED view):**
 1. Revenue of at least Rs. 5 Cr on a sustainable run-rate basis from a disclosed, verifiable business activity — NOT other income.
 2. Promoter holding increases to at least 40% through open-market purchases (demonstrating skin in the game).

3. Full public disclosure and independent audit of the 'Other Assets' (Rs. 8.63 Cr) confirming they are good, recoverable, and arm's-length.

- **Ideal investor profile:** This stock is NOT suitable for any institutional investor, HNI, or retail investor seeking capital preservation or growth. It may only appeal to high-risk speculators playing momentum, who understand they are trading a stock with no fundamental anchor and must exit before the momentum reverses.

APPENDIX — LATEST CONCALL BRIEF (No concall transcript available)

CALL GRADE: INSUFFICIENT DATA

Signal	Status	Implication
Result quality	N/A — No earnings call conducted	Company too small / inactive to hold investor calls
Management tone	N/A — No public management communication	Cannot assess management credibility
Guidance delta	N/A — No guidance issued	No forward visibility from management

STRONGLY POSITIVE | POSITIVE | NEUTRAL | CAUTIOUS | NEGATIVE

TO MY BOSS

NATHUEC is not an equity research subject — it is a flag. This is a Rs. 16 Cr market-cap shell-adjacent penny stock that has gone from Rs. 7.52 to Rs. 39.7 in 12 months while reporting zero revenue in FY25 and FY26. The FY26 PAT was -Rs. 1.18 Cr, with a Rs. 1.26 Cr unexplained expense against literally zero sales. The balance sheet carries Rs. 8.63 Cr in 'Other Assets' — 88% of total assets — with no public breakdown: this is the most dangerous number on this page. Promoters hold 16.37%, completely frozen for 12 quarters — that is not an owner-operated business, that is a parked shareholding. The multiple business pivots (chemicals to farming to cargo to electronics) with no commercial success in any of them completes the picture. There is no concall, no guidance, and no analyst coverage. **RECOMMENDATION: DO NOT TOUCH.** If a client is already in this stock, EXIT on any liquidity, preferably above Rs. 30. The rational liquidation value is Rs. 10-14/share.

Section 1 — Financial Performance Snapshot

- Revenue: Rs. 0.00 Cr (FY26) | YoY -100% | QoQ N/A | Miss vs any benchmark.
- EBITDA: -Rs. 1.26 Cr | Deeply negative — no revenue base.
- EBITDA Margin: N/A (no revenue denominator).
- PAT: -Rs. 1.18 Cr | YoY worse vs -Rs. 0.01 Cr in FY25 — 118x deterioration.
- EPS: -Rs. 2.85 (FY26) vs -Rs. 0.02 (FY25).
- NOTE: No concall or quarterly results commentary is publicly available for this company.

Section 2 — Segment / Geography Breakdown

- No segment data is publicly available (requires Screener premium login).
- Screener AI identifies 'Cargo Handling Services' and 'Consulting Services' as segment names.
- Neither segment appears to have generated revenue in FY25 or FY26 based on total revenue = Rs. 0.

Section 3 — Management Commentary Themes

- No management commentary, press releases, or investor communication is publicly available.
- The company has no analyst coverage and does not appear to hold investor calls.
- The absence of any management communication for a listed entity is itself a governance red flag.

Section 4 — Operating & Business Metrics

- Revenue run-rate: Rs. 0 Cr (FY25, FY26) — effectively dormant.
- Employee count: Not disclosed on public page.
- Order book: Not disclosed — no evidence of order wins or contract announcements.
- All operating KPIs are at zero or not calculable — company is operationally dormant.

Section 5 — Margin Drivers

- No positive margin drivers exist — operating leverage is undefined at zero revenue.
- The Rs. 1.26 Cr FY26 expense with zero revenue is the only 'driver' — it drove the margin deeply negative.
- This expense is non-recurring in character (it was Rs. 0.10 Cr in FY24 and FY25) but its nature is unexplained.

Section 6 — Guidance & Forward Signals

- No guidance issued — management has not communicated any forward outlook.
- No analyst estimates exist for this company.
- The only forward signal is that with Rs. 0.25 Cr borrowings due and zero revenue, the company will continue to consume reserves unless a new business line commences.

Section 7 — Capital Allocation

- Capex: Rs. 0 Cr in FY24, FY25, FY26 — no investment in any business.
- Dividends: Rs. 0 in all years.
- Buybacks: None.
- Working Capital change: Not meaningful given zero revenue.
- Net Debt: Rs. 0.25 Cr borrowings unchanged for 3+ years — no debt activity.

Section 8 — Q&A; Heat Map

- No concall available — Q&A; section cannot be populated.
- Watch-list / dodged questions if a call is ever held: (1) What are the 'Other Assets' of Rs. 8.63 Cr? (2) What was the Rs. 1.26 Cr FY26 expense? (3) Why is promoter holding at 16.37% and completely static? (4) What is the company's active business plan? (5) When will revenue resume?

Section 9 — Risks Flagged

- Speculative price run: Stock up 417% with zero fundamentals | Mgmt/analyst: Neither | Prob: H | Impact: H | Timeline: Near-term.
- Going concern: Zero revenue + Rs. 1.26 Cr expenses | Mgmt: Not flagged | Prob: M | Impact: H | Timeline: Medium-term.
- Balance sheet opacity: 88% of assets in 'Other Assets' | Mgmt: Not disclosed | Prob: M | Impact: H | Timeline: Medium-term.

• Governance: 16.37% promoter holding, static | Analyst: flagged | Prob: H | Impact: H | Timeline: Ongoing.

Section 10 — Analyst Verdict

- Revenue visibility: Broken — zero revenue two years running; no pipeline disclosed.
- Margin trajectory: Broken — EBITDA deeply negative; no path to profitability visible.
- Capital allocation quality: Broken — zero capex, zero dividends, zero returns in any year.
- Competitive moat: Broken — no market position in any of the company's stated business segments.
- Management credibility: Cannot assess — no public communication from management.
- Valuation comfort: Broken — trading at 1.69x P/B with opaque assets and persistent losses.
- Conviction call: EXIT WATCH — no investment case; existing holders should exit on liquidity.
- Valuation snapshot: P/E = N/A (loss) | EV/EBITDA = N/A (negative) | ROCE = -11.34% (5Y avg ~-1%)
