

Sigma Advanced System Ltd

NSE: SIGMAADV | BSE: 532408 | Industrials > Capital Goods > Aerospace & Defense
Formerly Megasoft Ltd — renamed Jan 2026; symbol SIGMAADV effective 09-Feb-2026

RATING	12-MO TARGET	CMP	DOWNSIDE	HORIZON
HOLD	Rs. 420	Rs. 459	-8.5%	12 months

Investment thesis: Credible promoter-led defence pivot with real export orders, but headline PAT is other-income-inflated; await cleaner earnings.

Market Cap	Rs. 8,129 Cr.	Stock P/E	29.3	ROCE	60.8 %
Current Price	Rs. 459	Book Value	Rs. 26.6	ROE	90.6 %
52-wk High/Low	Rs. 470 / 81.6	Div. Yield	0.00 %	Face Value	Rs. 10.0
Promoter (Mar-26)	71.22%	P/B (Screener)	17.3x	Borrowings FY26	Rs. 332 Cr

Report date: 10 June 2026 | Analyst: Senior Equity Research — Institutional Desk (MPM Research) | All financial figures sourced verbatim from Screener.in (consolidated), fetched 10-Jun-2026. Forward estimates marked (E) are analyst estimates.

SECTION 2 — INVESTMENT THESIS

- **Reason 1 — A real defence platform has been reverse-merged into a listed shell:** privately held Sigma Advanced Systems Pvt Ltd was amalgamated into listed Megasoft Ltd via an NCLT-approved scheme; FY26 consolidated sales hit Rs. 492 Cr (vs Rs. 0 in FY25) and ROCE jumped to 61%, with order momentum building each quarter through FY27.
- **Reason 2 — Export ammunition franchise is scaling fast:** a Rs. 208 Cr order for 40,000 units of 155mm M107 shell bodies (Jun-2026, 6-month execution) and a Rs. 107 Cr order for 90,000 M557 fuzes (May-2026, 10-month execution) give near-term revenue visibility of Rs. 315 Cr+ from exports alone into FY27.
- **Reason 3 — Marquee promoter with capital backing:** Chintalapati Holdings (Srini Raju — iLabs / Peepul Capital founder) holds 71.22% post-merger and is injecting further capital via an approved Rs. 460 Cr preferential issue, funding capacity and the UK (Nasmyth) aerospace integration over FY27-FY28.
- **Near-term catalyst (6-12 months):** execution of the North America artillery-shell order plus fresh Ministry of Defence / DPSU awards (Rs. 100 Cr won in Feb-2026 across missile, naval and avionics programmes) converting the order book into clean operating profit.
- **Biggest structural risk:** FY26 reported PAT of Rs. 268 Cr leans on Rs. 285 Cr of Other Income; core operating profit was just Rs. 48 Cr while operating cash flow was negative Rs. 225 Cr — the equity is priced far ahead of demonstrated cash earnings.

SECTION 3 — BUSINESS OVERVIEW

- Incorporated in 1999 and Hyderabad-headquartered, the company is an integrated aerospace and defence manufacturer delivering precision-engineered platforms, subsystems and solutions (per Screener profile and company disclosures).
- Product lines span avionics and missile sub-systems, naval electronics and radar, counter-drone systems, precision actuation, aerospace components and — newly — artillery ammunition components (155mm M107 shell bodies, M557 point-detonating fuzes).
- Geographic footprint covers India (Hyderabad, plus an expanded Noida facility reported to be running at high utilisation) and the United Kingdom via the Nasmyth Group aerospace-engineering acquisition, which brings UK certifications and OEM relationships (Rolls-Royce, Airbus, Boeing, GE Aerospace cited in media coverage).

- Customer mix is project/order-driven: Ministry of Defence and defence PSUs domestically (SAM, anti-tank, anti-radiation missile, naval weapon and rotary-wing avionics programmes), plus a North American export customer for ammunition components.
- Order book exceeded Rs. 315 Cr as of 17-Feb-2026 (company announcement); subsequent export wins of Rs. 107 Cr (May-26) and Rs. 208 Cr (Jun-26) lift announced wins above Rs. 600 Cr; one media deep-dive cites a ~Rs. 4,300 Cr pipeline (unverified — treat as aspirational).
- Strategic developments in the last 12 months: NCLT amalgamation completed, rename to Sigma Advanced Systems (Feb-2026 symbol change), 51% acquisition of AS Strategic Pvt Ltd for Rs. 20 Cr, board reconstituted with defence and diplomatic appointees, and a Rs. 460 Cr preferential issue approved.
- Promoter: Chintalapati Holdings Pvt Ltd at 71.22% (Mar-2026), up from 35.07% in Dec-2025 via merger-scheme share allotments; public float is 28.70% with negligible institutional holding (FII 0.07%, DII 0.00%).

SECTION 4 — INDUSTRY & COMPETITIVE LANDSCAPE

- India defence production crossed Rs. 1.27 lakh Cr in FY24 (MoD data widely cited) with a government target of Rs. 3 lakh Cr production and Rs. 50,000 Cr defence exports by 2029 — a strong multi-year tailwind for private ammunition and subsystem makers.
- Policy tailwinds: Atmanirbhar Bharat positive-indigenisation lists, liberalised defence-export licensing, and a global 155mm artillery ammunition shortage driven by NATO restocking — the direct driver of the company's North America shell-body order. Headwinds: lumpy MoD procurement cycles and tightening export end-use scrutiny.
- **Moat assessment:** Pricing power — Weak (build-to-print ammunition components are cost-competitive); Switching costs — Moderate (defence qualification cycles lock in suppliers); Scale — Weak (Rs. 492 Cr revenue vs established peers); IP — Moderate (avionics/actuation niches plus UK certifications); Distribution — Moderate (MoD/DPSU empanelment plus Nasmyth's OEM access).
- Value-chain position: midstream build-to-print and subsystem supplier today, with ambitions to move up to integrated platforms/solutions; ammunition components are the nearest-term scale opportunity.

Competitor (Screener, 10-Jun-26)	CMP (Rs.)	MCap (Rs. Cr)	FY26 Sales (Rs. Cr)	ROCE %
Zen Technologies	1,762	15,915	688	16.2
Paras Defence & Space Tech	1,040	8,403	477	16.9
Apollo Micro Systems	398	14,234	904	14.5

SECTION 5 — MANAGEMENT QUALITY & CAPITAL ALLOCATION

- **Promoter pedigree:** Srinu Raju (Chintalapati Holdings) — founding CEO/MD of the Dun & Bradstreet-Satyam JV, founder of iLabs Group (2000), co-founder/chairman of Peepul Capital, and developer of Sri City SEZ — brings 35+ years of operating and PE experience, though defence manufacturing itself is a new domain for the group.
- **Governance history to note:** SEBI had held Srinu Raju guilty of insider trading in the Satyam matter; the Supreme Court subsequently acquitted him. Investors should track related-party flows in the first post-merger annual report closely.
- **Capital allocation record is unformed:** the FY26 balance sheet was rebuilt in one year — equity capital rose Rs. 74 Cr to Rs. 176 Cr, reserves Rs. 70 Cr to Rs. 292 Cr, borrowings Rs. 139 Cr to Rs. 332 Cr — so the new management has no multi-year FCF deployment history to judge.

- **Dividend policy:** payout has been 0% in every year on record (Screener); all cash is being recycled into the defence build-out — appropriate for the stage, but shareholders are paid only via the multiple.
- **Pledging:** no promoter pledge data is disclosed on Screener (N/A); the Rs. 460 Cr preferential issue suggests fresh equity rather than leverage at the promoter level.
- **Board reconstitution:** defence and diplomatic appointees added (incl. Amb. Dr. V. N. P. Thatipamula), signalling intent to professionalise; ESOP and buyback history: none on record.

SECTION 6 — FINANCIAL DEEP-DIVE

Consolidated figures, Rs. Cr, transcribed verbatim from Screener.in (fetched 10-Jun-2026). FY27E/FY28E are analyst estimates (E). FY24/FY25 revenue was nil pre-merger, so margin ratios for those years are not meaningful; OPM shown exactly as Screener displays it.

Income Statement	FY24	FY25	FY26	FY27E	FY28E
Sales	0	0	492	950	1,300
Operating Profit (EBITDA)	-9	-10	48	124	195
OPM %	N/A	14%	10%	13%	15%
Other Income	37	42	285	30	35
Interest	17	18	20	28	30
Depreciation	3	4	14	22	28
Profit Before Tax	8	8	299	104	172
Tax %	8%	0%	11%	22%	25%
Net Profit	-13	-30	268	95	160
EPS (Rs.)	-1.73	-4.06	15.21	5.4	9.1

Balance Sheet	FY24	FY25	FY26
Equity Capital	74	74	176
Reserves	107	70	292
Borrowings	147	139	332
Other Liabilities	38	82	259
Total Liabilities	366	364	1,059
Fixed Assets	187	200	325
CWIP	0	0	9
Investments	112	67	10
Other Assets	66	97	714

Cash Flow	FY24	FY25	FY26
Cash from Operations	22	37	-225
Cash from Investing	10	-19	-6
Cash from Financing	-17	-26	242
Net Cash Flow	15	-8	11
Free Cash Flow (Screener)	11	19	108

Returns / WC	FY24	FY25	FY26
ROCE %	8%	9%	61%
Debtor Days	N/A	N/A	270
Inventory Days	N/A	N/A	382
Days Payable	N/A	N/A	381

Returns / WC	FY24	FY25	FY26
Cash Conversion Cycle	N/A	N/A	271

- **Revenue:** FY26's Rs. 492 Cr is the first real revenue year post-merger (FY24/FY25: nil); growth into FY27E rests on executing the Rs. 315 Cr export orders, MoD programmes and a full year of the merged/UK operations — our Rs. 950 Cr (E) assumes order conversion without slippage.
- **Margins:** reported FY26 OPM of 10% is modest for defence; Q4 FY26 printed 17%, suggesting mix improvement as ammunition volumes ramp — but the headline PAT margin is an illusion created by Rs. 285 Cr Other Income (likely merger/fair-value related).
- **Working capital is the weak point:** 270 debtor days, 382 inventory days and a 271-day cash conversion cycle in FY26 explain the negative Rs. 225 Cr operating cash flow — defence receivables plus a stocking build for export orders are consuming all the cash the P&L reports.
- **Debt:** borrowings rose Rs. 139 Cr to Rs. 332 Cr in FY26 (derived D/E ~0.7x on Rs. 468 Cr net worth); Rs. 242 Cr of financing inflows funded the working-capital hole — the Rs. 460 Cr preferential issue is needed precisely because operations are not yet self-funding.
- **FCF quality:** Screener shows FY26 Free Cash Flow of Rs. 108 Cr against OCF of Rs. -225 Cr — an artefact of line-item classification; on any conventional definition the company burned cash in FY26. Treat reported PAT-to-cash conversion as broken until H1 FY27 proves otherwise.

SECTION 7 — EARNINGS QUALITY CHECKLIST

Checklist Item	Rating	Comment
Revenue recognition	AMBER	First post-merger year; project/milestone accounting untested by audit history.
Receivables vs revenue	RED	270 debtor days on Rs. 492 Cr sales; receivables build dwarfs revenue growth quality.
CCC trend	RED	271-day cash conversion cycle; OCF Rs. -225 Cr vs PAT Rs. 268 Cr.
Contingent liabilities	AMBER	Not disclosed on Screener (N/A); merger scheme liabilities need AR verification.
Auditor tenure	AMBER	Post-merger auditor arrangement not yet seasoned; first full AR awaited.
Related-party transactions	AMBER	Promoter group supplied the merged business; RPT scale unverifiable until FY26 AR.
Other income as % of PBT	RED	Rs. 285 Cr Other Income vs Rs. 299 Cr PBT (95%) — core PBT is marginal.
Tax rate consistency	AMBER	11% FY26 effective tax; quarterly prints swing 0%-550% — normalisation pending.

- **Three Red flags dominate:** 95% of FY26 PBT is Other Income, receivables/inventory are consuming cash faster than the P&L creates it, and operating cash flow is deeply negative — the Rs. 268 Cr headline PAT materially overstates economic earnings.
- Screener's own caution list mirrors this: stock at 17.3x book value, earnings include Rs. 285 Cr other income, and debtors at 270 days.
- The checklist can only normalise with the first full post-merger annual report and two quarters of positive operating cash flow; until then, value the company on core EBITDA, not reported EPS.

SECTION 8 — VALUATION

Peer comparison — all figures verbatim from each company's Screener.in consolidated page, fetched 10-Jun-2026 (FY26 = year ended Mar-2026).

Company	CMP Rs.	MCap Rs.Cr	P/E	BV Rs.	ROCE %	ROE %	FY26 Sales	FY26 PAT
Sigma Advanced	459	8,129	29.3	26.6	60.8	90.6	492	268
Zen Technologies	1,762	15,915	82.5	209	16.2	10.7	688	218
Paras Defence	1,040	8,403	97.8	90.0	16.9	12.6	477	89
Apollo Micro Systems	398	14,234	126	36.8	14.5	11.8	904	107
DCX Systems	182	2,024	N/A	136	0.87	-0.53	743	-8

Note: Sigma's optically low 29.3x P/E and 60.8%/90.6% ROCE/ROE are inflated by the Rs. 285 Cr other-income gain in FY26; on our clean FY27E EPS of Rs. 5.4 the stock trades at ~85x — in line with the (expensive) defence smallcap cohort.

Scenario	Key assumptions	FY28E PAT (Rs. Cr)	Multiple	Target Rs.
Bull	Order book compounds; exports repeat-order; OPM 18%; preferential capital deployed well	210	60x	715
Base	Announced orders execute; OPM 15%; WC normalises slowly; modest fresh wins	160	45x	410
Bear	Export orders one-off; WC stress forces dilution; OPM stuck ~10%	88	30x	150

- **DCF:** WACC 13.5%, terminal growth 5.0%, FCF turning positive only FY28E as the cash-conversion cycle compresses from 271 days — implied value ~Rs. 430/share; the DCF is acutely sensitive to working-capital normalisation, not growth.
- **Earnings multiple:** 45x forward P/E on FY28E clean EPS of Rs. 9.1 (a deliberate discount to Zen/Paras/Apollo's 82-126x given governance seasoning and negative OCF) — implied value ~Rs. 410/share.
- **Blended 12-month target:** average of DCF (Rs. 430) and multiple-based (Rs. 410) = **Rs. 420** — 8.5% below CMP of Rs. 459.
- **Horizon:** 12 months; the risk-reward only turns attractive on a pullback toward Rs. 300-340 or on proof of positive operating cash flow in H1 FY27.

SECTION 9 — KEY RISKS

- **Earnings quality risk** — 95% of FY26 PBT is Other Income; if FY27 lacks one-off gains, reported EPS could collapse versus the optical 15.21 base. Probability: H. Impact: H. Monitor via: quarterly Other Income line vs operating profit.
- **Working-capital / liquidity risk** — OCF of Rs. -225 Cr with 270 debtor days; a stalled receivable or inventory write-down forces dilutive fund-raising. Probability: M. Impact: H. Monitor via: H1 FY27 cash-flow statement and debtor days.
- **Execution risk on export orders** — 40,000 shell bodies in 6 months and 90,000 fuzes in 10 months are aggressive schedules for a first-time ammunition exporter. Probability: M. Impact: H. Monitor via: delivery/milestone disclosures and Q1/Q2 FY27 revenue.
- **Governance and RPT risk** — promoter group sold the private business into the listed entity; valuation of that scheme and ongoing RPTs are unaudited by public history. Probability: M. Impact: H. Monitor via: FY26 annual report RPT schedule and auditor opinion.
- **Dilution risk** — the approved Rs. 460 Cr preferential issue plus any further raises will expand the share count materially from 17.6 Cr shares. Probability: H. Impact: M. Monitor via: EGM (28-Jun-2026) terms and issue price.
- **Order concentration risk** — near-term revenue hangs on one North American customer and a handful of MoD programmes. Probability: M. Impact: M. Monitor via: new order announcements and customer mix disclosure.

- **Valuation de-rating risk** — the defence smallcap basket trades at 80-126x earnings; any sector-wide de-rating hits a 17.3x P/B stock hardest. Probability: M. Impact: H. Monitor via: peer multiple compression and FII/DII flows.

SECTION 10 — RECOMMENDATION

- **Rating: HOLD** — conviction: Medium. The transformation is real (orders, promoter capital, facilities) but the equity already prices flawless execution while cash earnings are still negative.
- **12-month price target:** Rs. 420 (-8.5% from CMP Rs. 459).
- **Suggested entry zone:** Rs. 300-340 — roughly 55-63x clean FY27E EPS, where the risk-reward versus the bull case turns positive; alternatively add on two consecutive quarters of positive OCF.
- **Investment horizon:** 12-24 months; this is a build-phase story, not a quarter trade.
- **Thesis invalidation triggers:** (1) H1 FY27 operating cash flow remains negative beyond Rs. -100 Cr or debtor days stay above 250; (2) export orders slip — less than 50% of the Rs. 315 Cr export book billed by Dec-2026; (3) the FY26 annual report reveals qualified opinions or related-party valuations that impair the merger accounting.
- **Ideal investor profile:** suited to high-risk special-situation investors who can underwrite a promoter-led turnaround with limited disclosure history; unsuitable for income investors (0% payout), quality-at-reasonable-price mandates, or anyone anchoring on the reported 29x P/E as cheap.

APPENDIX — Latest Concall Brief: Q4 FY26

Transcript not accessible — Sigma Advanced Systems has not yet hosted a public earnings call / no transcript exists on Screener, exchanges or AlphaStreet (checked 10-Jun-2026). Appendix Sections 3, 4, 5, 6 and 8 therefore show N/A; quarterly figures below are from Screener's consolidated quarterly P&L.

CALL GRADE: NEUTRAL

Signal	Status	Implication
Result quality	Medium	Headline beat (Q4 PAT Rs. 128 Cr) but Rs. 89 Cr of Other Income inside it; core OPM improved to 17%.
Management tone	N/A	No earnings call hosted; only press releases available.
Guidance delta	Withdrawn / None	No quantitative guidance has ever been issued by the new management.
STRONGLY POSITIVE POSITIVE NEUTRAL CAUTIOUS NEGATIVE		

TO MY BOSS

Q4 FY26 headline — revenue Rs. 323 Cr and PAT Rs. 128 Cr — looks spectacular but is not clean: Rs. 89 Cr of Other Income sits inside a Rs. 127 Cr PBT, and the full year is worse, with Rs. 285 Cr of Other Income against Rs. 299 Cr PBT, so clean FY26 operating PAT is on the order of Rs. 15-25 Cr, not Rs. 268 Cr. Underlying operations are nonetheless inflecting: Q4 operating profit hit Rs. 55 Cr at a 17% margin vs low single digits in the two prior quarters, and the order flow is real — Rs. 100 Cr from MoD/DPSUs in February, Rs. 107 Cr of M557 fuzes in May, Rs. 208 Cr of 155mm shell bodies to North America in June. The structural multi-bagger case rests on three legs: a credible promoter (Srinu Raju's Chintalapati Holdings at 71.2%) recapitalising the platform via a Rs. 460 Cr preferential issue, the India-UK (Nasmyth) certification stack opening global OEM doors, and the worldwide 155mm ammunition shortage giving a freshly tooled entrant instant export demand. Nearest catalyst is execution proof: Q1/Q2 FY27 billing on the export orders plus the 28-Jun EGM pricing the preferential issue. The single biggest watch-point is cash: FY26 operating cash flow was Rs. -225 Cr with 270 debtor days, so if H1 FY27 OCF does not turn, the growth is being bought with balance-sheet risk. At Rs. 459 the stock trades at ~17x book and ~85x clean forward earnings — priced for perfection it has not yet earned. Action: HOLD existing positions with a Rs. 420 12-month target; ACCUMULATE only on a pullback to Rs. 300-340 or on the first quarter of positive operating cash flow, whichever comes first.

Section 1 — Financial Performance Snapshot (Q4 FY26, Mar-2026 quarter)

- Revenue: Actual Rs. 323 Cr | YoY +467% (vs Rs. 57 Cr) | QoQ +121% (vs Rs. 146 Cr) | **Beat** (no street estimates exist; vs trajectory).
- EBITDA (Operating Profit): Actual Rs. 55 Cr | YoY vs Rs. 16 Cr | QoQ vs Rs. 7 Cr | **Beat**.
- EBITDA Margin: 17% | YoY vs 29% (tiny base) | QoQ vs 5% | In-line with scale-up phase.
- PAT: Actual Rs. 128 Cr | YoY vs Rs. 9 Cr | QoQ vs Rs. -1 Cr | **Beat** on headline.
- EPS: Rs. 7.29 | YoY vs Rs. 1.17 | QoQ vs Rs. -0.14 | **Beat**.
- NOTE: Reported Q4 PAT includes Other Income of Rs. 89 Cr (vs PBT Rs. 127 Cr); clean underlying quarterly PAT is approximately Rs. 35-40 Cr pre-tax-normalisation. FY26 Other Income totalled Rs. 285 Cr.

Section 2 — Segment / Geography Breakdown

- Segment-level revenue is not disclosed (N/A in quarterly filings); qualitatively the mix spans domestic MoD/DPSU programmes (missiles, naval, avionics) and export ammunition components.
- Geography: India (Hyderabad, Noida) plus the UK via Nasmyth Group; no quantified split published — N/A.

Section 3 — Management Commentary Themes

- N/A — no earnings call/transcript exists. Press-release themes (not a transcript): order-book conversion at the expanded Noida facility, entry into ammunition components, and board strengthening with defence/diplomatic appointees. Tag: EST. Tone: cannot assess.

Section 4 — Operating & Business Metrics

- N/A — utilisation, volumes and realisations are not disclosed. Only public KPI: order book > Rs. 315 Cr (17-Feb-2026) plus Rs. 315 Cr of subsequent export wins (May/Jun-2026). Trend: improving.

Section 5 — Margin Drivers

- N/A — no management margin bridge available. From Screener data: Q4 OPM rose to 17% (vs 5-6% in Sep/Dec-2025 quarters) on operating leverage; Other Income of Rs. 89 Cr is non-recurring | Recurring: No | excluded from forward estimates.

Section 6 — Guidance & Forward Signals

- N/A — management has issued no revenue, margin or capex guidance [GUIDANCE: none on record]. Forward signals are limited to announced order execution timelines (6-10 months on export contracts). Credibility: cannot assess.

Section 7 — Capital Allocation (from Screener FY26 statements)

- Capex: Fixed Assets rose Rs. 200 Cr to Rs. 325 Cr (+63%) plus CWIP Rs. 9 Cr | capacity build at Noida/Hyderabad and consolidation of acquired operations.
- Acquisitions: 51% of AS Strategic Pvt Ltd for Rs. 20 Cr (announced); Nasmyth Group (UK) folded into the platform.
- Dividends: Rs. 0 | payout 0% every year on record | unchanged.
- Buybacks: none on record.
- Working capital: Other Assets ballooned Rs. 97 Cr to Rs. 714 Cr; OCF Rs. -225 Cr — the dominant use of capital in FY26.
- Net debt: borrowings up Rs. 139 Cr to Rs. 332 Cr (+139%); Rs. 242 Cr financing inflow; Rs. 460 Cr preferential issue approved to fund the gap.

Section 8 — Q&A; Heat Map

- N/A — no Q&A session has occurred (no public call hosted).
- Dodged / watch-list questions for next quarter: receivable ageing and counterparty mix behind 270 debtor days; nature of the Rs. 285 Cr Other Income; preferential issue pricing; Nasmyth integration costs; export order margin profile.

Section 9 — Risks Flagged

- Working-capital stress: OCF Rs. -225 Cr vs PAT Rs. 268 Cr | Flagged by: analyst (from financials) | Probability: H | Impact: H | Timeline: near-term.
- Other-income dependence: 95% of FY26 PBT | Flagged by: analyst / Screener caution list | Probability: H | Impact: H | Timeline: near-term.
- Execution on first-time export ammunition contracts | Flagged by: analyst | Probability: M | Impact: H | Timeline: near/medium-term.

- Dilution from Rs. 460 Cr preferential issue | Flagged by: company filings | Probability: H | Impact: M | Timeline: near-term.

Section 10 — Analyst Verdict

- Revenue visibility: Intact — Rs. 600 Cr+ of announced orders with dated execution windows support FY27E revenue.
- Margin trajectory: Intact — Q4 OPM of 17% shows the operating model works at scale, though the full-year 10% base is thin.
- Capital allocation quality: Cannot assess — one year of post-merger history; preferential issue terms will be the first real test.
- Competitive moat: Weakened — build-to-print ammunition is commodity-adjacent; UK certifications are the differentiator to prove.
- Management credibility: Cannot assess — no calls, no guidance, short listed track record under new promoters.
- Valuation comfort: Broken — 17.3x book and ~85x clean forward earnings leave no margin of safety.
- Conviction call: Unchanged — HOLD; accumulate only at Rs. 300-340 or on positive OCF proof.
- Valuation snapshot: P/E = 29.3 reported / ~85x clean FY27E (5Y avg N/A — pre-merger years not comparable) | EV/EBITDA = N/A on Screener | RoCE = 60.8% reported, 8-9% FY24-FY25 (5Y avg not meaningful).
