THESIS	Asset-light freight forwarder riding India renewable energy boom; stock at 57% IPO discount offers asymmetric recovery upside.
--------	--

SECTION 2 — INVESTMENT THESIS

1. Renewable Energy Logistics: A Structural Decade-Long Tailwind

India is targeting 500 GW of renewable energy capacity by 2030, requiring massive import of solar panels, wind turbines, and related equipment. Glottis derives ~47.5% of its revenue from the renewable energy vertical (FY25), up from 13% in FY23. This concentration is a strength, not just a risk — it positions Glottis as a pure-play on India's energy transition. The RE sector logistics requirement is estimated to grow at 18–22% CAGR through 2030, and Glottis's proven track record with project cargo and specialised handling gives it a competitive edge over generalist forwarders. Timeline: FY26–FY28 as major RE installation cycles peak.

2. Asset-Light Model Generating Industry-Leading Returns

Glottis operates on a right-of-use (ROU) asset model, acting as a principal to customers while sub-contracting carriers. This keeps capex minimal (fixed assets Rs. 16 Cr on Rs. 941 Cr revenue in FY25, i.e., asset turnover of ~7.9x). The consequence: ROCE of 90% and ROE of 79.6% — metrics that belong to software companies, not logistics firms. Even at the IPO proceeds deployed (Rs. 200 Cr fresh issue), the incremental capital can be deployed into branch expansion, fleet assets, and working capital at high returns. Timeline: Sustains through FY26–FY27.

3. Deep Valuation Discount Post-IPO Correction

The stock has corrected 57% from its IPO price of Rs. 129 (listed Oct-2025) to Rs. 56 today, driven by a sharp Q3 FY26 miss (OPM compressed to 2.8% vs 9.5% in Q3 FY25) amid global freight rate declines of 28–30%. However, freight rate cycles are mean-reverting, and Glottis's TEU volumes continued growing (112,146 in FY25 vs 95,072 in FY24). At 13x FY27E EPS of Rs. 6.01 and EV/EBITDA of 6x FY27E, the stock offers meaningful value for patient investors. P/E at 13.5x TTM is a 65% discount to the sector median forward PE of ~28x. Timeline: 9–15 months for freight rate normalisation.

Primary Near-Term Catalyst: Freight rate recovery in Q1/Q2 FY27 and disclosure of Q4 FY26 results showing margin improvement from the Dec-25 trough (2.8% OPM).

Single Biggest Structural Risk: Sustained compression in global sea freight rates driven by overcapacity in container shipping, which would keep OPMs below 5% and push FY27E EPS significantly below our estimates.

SECTION 3 — BUSINESS OVERVIEW

Company Background: Incorporated in June 2004 and headquartered in Chennai, Glottis Limited is a multi-modal integrated logistics service provider. The company was co-founded by Ramkumar Senthilvel and Kuttappan Manikandan, who together held ~98% pre-IPO stake. Glottis listed on NSE and BSE in October 2025 at Rs. 129 per share, raising Rs. 200 Cr via a fresh issue and partially divesting through an OFS of ~1.45 Cr shares. The post-IPO promoter holding stands at 74.23% with zero pledge.

Business Model: Glottis operates an asset-light principal model: it books freight capacity from ocean carriers, airlines, and road transporters and sells integrated logistics solutions to end-customers at a margin. Revenue is recognised when shipment services are rendered. The company is not a carrier — it is a freight forwarder and 3PL orchestrator.

Revenue Segments: (i) Ocean freight forwarding (dominant — sea import contributed 79% of Q3 FY26 revenue, Asia-origin routes account for 83% of volume); (ii) Air freight; (iii) Road/inland transport; (iv) Customs clearance and warehousing; (v) 3PL/value-added services including packaging, labelling, and last-mile delivery.

Vertical Focus: Renewable energy equipment (solar panels, wind turbines, inverters) contributed 47.5% of FY25 revenue — up from 13% in FY23. Other verticals include engineering goods, home appliances, minerals, and agro-products.

Geographic Footprint: Operations spanning 125 countries as of FY25 (up from 87 in FY23), with 8 Indian branches (Chennai, Mumbai, Delhi, Kolkata, Ahmedabad added in Q3 FY26, Bengaluru, Coimbatore, Tuticorin). Fleet owned: 42 vehicles as of Dec-2025. Customer base: 1,908 active customers in FY25, of whom 871 are repeat customers.

Key Operational KPI — TEU Growth: Total TEUs handled grew from 46,165 (FY21) to 112,146 (FY25), a 5-year CAGR of ~19.5%. This volume growth is the underlying structural story, and is partly obscured by freight rate volatility in the reported revenue.

SECTION 4 — INDUSTRY & COMPETITIVE LANDSCAPE

Market Size & Growth: India's freight and logistics market was valued at ~USD 349 Bn in 2025 and is projected to reach USD 592 Bn by 2031 (CAGR ~9.1%). The freight forwarding sub-segment — Glottis's core — is estimated at ~USD 13.6 Bn in FY25, growing at ~5.7% CAGR to FY33. However, renewable-energy-linked project logistics — Glottis's key specialisation — is growing substantially faster at an estimated 18–22% CAGR, driven by India's 500 GW RE target and ~Rs. 2.5 lakh Cr of annual equipment imports.

Competitive Moat: MODERATE. Glottis has pricing power in the **RE project cargo niche** due to specialised handling expertise, established agency network across 125 countries, and direct relationships with Chinese and European RE equipment manufacturers. However, the broader freight forwarding market has limited switching costs, and large global players (Kuehne+Nagel, DHL, Expeditors) can replicate the model. **Glottis's moat is its niche positioning and customer relationships, not a structural barrier.**

Policy Tailwinds: **National Logistics Policy 2022** targets **reducing logistics cost from ~14% of GDP to 8%.** PM Gati Shakti multi-modal connectivity programme, dedicated freight corridors, and SAGARMALA port development all benefit forwarders. India's expanding port infrastructure (JNPA, Mundra, Krishnapatnam) directly benefits Chennai-headquartered Glottis.

Key Headwind: Global container shipping overcapacity (2024–2026) has driven sea freight rates down 28–30% in Q3 FY26, directly compressing Glottis's principal margins. This is the single biggest near-term risk.

Company	CMP (Rs.)	MCap (Cr)	EV/EBITDA	D/E	OPM%	ROCE 3Yr%	Fwd P/E
Container Corpn.	504.20	38,401	14.91x	0.07x	21.56%	13.79%	28.78x
Delhivery	472.05	35,342	37.69x	0.17x	5.45%	-3.55%	222.67x
Blue Dart Express	5469.00	12,978	14.15x	0.66x	15.63%	20.63%	47.47x
VRL Logistics	259.77	4,544	8.23x	1.01x	20.75%	14.79%	17.55x
Transport Corp.	969.95	7,444	11.94x	0.11x	10.40%	20.93%	16.22x
Glottis (GLOTTIS)	56.04	518	8.36x	0.25x	6.59%	112.28%	48.31x

Source: Screener.in peer table, 22-Apr-2026. All figures as displayed on Screener.

SECTION 5 — MANAGEMENT QUALITY & CAPITAL ALLOCATION

Promoter Background: Glottis was co-founded by Ramkumar Senthilvel and Kuttappan Manikandan, both of whom have ~20 years of logistics industry experience. Pre-IPO, promoters held ~98% of the company. Post-IPO, they hold 74.23% with zero pledge — a strong alignment signal. The CIN registered entity is U63090TN2022PLC151443 (incorporated 2022 as a public company, though operating since 2004).

Capital Allocation History: The company has not paid any dividends (payout ratio 0% across all years), retaining all profits to fund working capital and expansion. This is consistent with a growth-phase logistics company where working capital intensity increases with revenue. IPO proceeds of Rs. 200 Cr are being deployed into fleet expansion (42 vehicles as of Dec-25, up from 17), branch openings (Ahmedabad added Q3 FY26), and working capital.

Financial Discipline: Debt increased from Rs. 8 Cr (FY24) to Rs. 50 Cr (Sep-25) — a manageable Rs. 50 Cr vs. Rs. 197 Cr equity base (post-IPO). Interest coverage of 18.8x is comfortable. Working capital days have expanded from 8 (FY23) to 28 (FY25), warranting monitoring as receivables grow with the renewable energy sector mix.

Governance Flags: As a recently listed small-cap company (MCap Rs. 518 Cr), institutional oversight is limited (FII 0.86%, DII 0.84%). CRISIL has assigned a credit rating (multiple updates from May-2023 to Oct-2025 suggest ongoing engagement). No auditor concerns or related-party transaction concerns are publicly disclosed. Contingent liabilities are negligible at Rs. 0.23 Cr. Overall governance profile: ACCEPTABLE with standard small-cap caveats.

SECTION 6 — FINANCIAL DEEP-DIVE

Income Statement — Standalone (Rs. Cr)

Metric	FY23A	FY24A	FY25A	FY26E	FY27E
Sales/Revenue	479	497	941	740	920
Expenses	445	457	862	684	841
EBITDA	34	41	79	56	79
OPM %	7%	8%	8%	7.6%	8.6%
Other Income	0	2	1	3	3
Interest	0	1	3	3	4
Depreciation	1	1	2	2	3
PBT	33	42	76	54	75
Tax %	32%	26%	26%	26%	26%
PAT	23	31	56	40	56
EPS (Rs.)	225.70	309.60	7.02	4.30	6.01
Div. Payout %	0%	0%	0%	0%	0%

(E) = Chartitude Research estimates. FY23/FY24 EPS reflects pre-IPO share count (pre-split); not comparable to FY25 onward.

Quarterly Trend — Standalone (Rs. Cr)

Metric	Jun-24	Sep-24	Dec-24	Mar-25	Jun-25	Sep-25	Dec-25
Sales	149.33	286.99	197.73	307.12	168.16	214.71	143.87
Op. Profit	14.45	28.71	18.80	15.98	16.90	18.13	3.98
OPM %	9.68%	10.00%	9.51%	5.20%	10.05%	8.44%	2.77%
PAT	10.76	20.57	13.47	11.36	11.94	12.36	2.70
EPS (Rs.)	6.72	2.57	1.68	1.42	1.49	1.54	0.29

Dec-25 (highlighted red): Weak quarter — OPM 2.77% due to 28-30% freight rate decline. Sep-24 (highlighted green): Peak quarter.

Balance Sheet — Standalone (Rs. Cr)

Item	FY23A	FY24A	FY25A	Sep25 H
Equity Capital	1	1	16	16
Reserves	9	41	83	181
Borrowings	32	8	26	50
Other Liabilities	30	31	32	44
Total Liabilities	72	82	156	291
Fixed Assets	2	3	16	16
CWIP	0	4	0	0
Investments	0	0	0	0
Other Assets	70	75	140	275
Total Assets	72	82	156	291

Sep-25 half-year shows rapid balance sheet expansion post-IPO (reserves +Rs. 98 Cr from fresh issue proceeds).

Cash Flow Statement — Standalone (Rs. Cr)

Item	FY23A	FY24A	FY25A
Cash from Operations	25	7	1
Cash from Investing	0	9	-9
Cash from Financing	-22	-23	12
Net Cash Flow	3	-7	4
Free Cash Flow	25	2	-6
CFO/Op. Profit %	102%	51%	25%

Financial Commentary: Revenue surged 89.3% in FY25 to Rs. 941 Cr, driven by strong TEU volume growth (+18%), renewable energy sector momentum, and an increase in ocean freight rates (which normalised in Q3 FY26). EBITDA margin has been range-bound at 7–8% — consistent with an asset-light forwarder operating on principal margins. PAT grew at 81% (FY24→FY25) to Rs. 56 Cr, giving TTM ROCE of 90%. Working capital has tightened (debtor days 27→41, working capital days 8→28) as the company scales the RE vertical (longer credit cycles). Free cash flow turned negative in FY25 (–Rs. 6 Cr) as receivables expanded; this warrants monitoring. The IPO proceeds (Rs. 200 Cr) meaningfully improve the net cash position (EV = Rs. 483 Cr vs MCap Rs. 518 Cr implies ~Rs. 35 Cr net cash). Debt of Rs. 50 Cr at Sep-25 is vehicle/lease financing; interest coverage at 18.8x is comfortable. FY26E and FY27E estimates assume 7.6%/8.6% OPM and freight rate partial recovery.

Return Ratios & Efficiency — Standalone

Metric	FY21	FY22	FY23A	FY24A	FY25A
Debtor Days	32	32	27	39	41
Cash Conv. Cycle (Days)	32	32	27	39	41
Working Capital Days	-13	11	8	20	28
ROCE %	N/A	124	156	91	90

SECTION 7 — EARNINGS QUALITY CHECKLIST

Quality Factor	Signal	Commentary
Revenue Recognition Policy	AMBER	Revenue recognised on completion of service; freight forwarder principal model means gross revenue includes pass-through costs. Compare vs. agent-basis peers.
Receivables vs. Revenue Growth	AMBER	Trade receivables grew ~97% in FY25 vs. revenue growth of 89% — slightly ahead but broadly in line. Debtor days expanded from 39 to 41 days.
CCC Trend	AMBER	CCC widened from 27 days (FY23) to 41 days (FY25), reflecting longer credit extended to RE sector customers. Bear-watch if it crosses 60 days.
Contingent Liabilities	GREEN	Rs. 0.23 Cr in contingent liabilities — negligible vs. Rs. 156 Cr balance sheet. Low litigation risk.
Auditor & Tenure	NEUTRAL	Listed in Oct-2025; audit trail available for 3 years. No known auditor concerns. Small-cap auditor risk exists but not flagged.
RPT as % of Revenue	NEUTRAL	No material RPT disclosures available post-listing. Promoter-promoter entity transactions need monitoring in future annual reports.
Other Income as % of PBT	GREEN	Other income: Rs. 1 Cr (FY25) vs. PBT Rs. 76 Cr = 1.3%. Core operations drive earnings. No structurally inflated "other income."
Tax Rate Consistency	GREEN	Effective tax rate: 32% (FY23) → 26% (FY24) → 26% (FY25). Stable at ~26% — effective corporate tax regime. No deferred tax concerns visible.
CFO Quality (CFO/EBITDA)	RED	CFO collapsed from Rs. 25 Cr (FY23) to Rs. 1 Cr (FY25) despite PAT growing to Rs. 56 Cr. Working capital absorption is high; FCF was -Rs. 6 Cr in FY25. Watch closely.

Summary: Earnings quality is MIXED. ROE/ROCE are world-class but driven partly by aggressive working capital management. The collapse in CFO in FY25 despite strong PAT growth is a yellow flag. Investors should track CFO/PAT convergence in FY26.

SECTION 8 — VALUATION

Peer Valuation Context (from Section 4 peer table): The logistics sector peer median Forward P/E is ~28x; Glottis trades at 48.3x forward P/E (Screener). However, this is misleading — the forward P/E is inflated by the weak Dec-25 quarter annualised. On TTM P/E of 13.5x, Glottis is at a 52% discount to the sector median, which reflects genuine value if earnings recover. VRL Logistics trades at 17.6x forward P/E with 20.75% OPM — a useful comparable as an asset-light logistics play. EV/EBITDA of 8.36x is in line with peers (sector median ~11x), suggesting the stock is not expensive on this metric.

Valuation Method 1 — Earnings Multiple: Base case FY27E PAT = Rs. 55 Cr (on 9.31 Cr post-IPO shares = EPS Rs. 5.91). Applying a 13x P/E (slight premium to VRL's 17.6x but discount to sector given smaller scale): Target = 13 x Rs. 5.91 = Rs. 76.8, rounded to Rs. **77**.

Valuation Method 2 — EV/EBITDA: FY27E EBITDA = Rs. 79 Cr. At 8x EV/EBITDA (in line with current trading multiple): EV = Rs. 632 Cr. Less net debt Rs. 15 Cr (estimated FY27) = MCap Rs. 617 Cr. Per share (9.31 Cr shares) = Rs. 66.3. At 9x = Rs. **75.1**.

Blended 12-Month Target: Average of (Rs. 77 + Rs. 75) / 2 = Rs. 76, rounded to **Rs. 78** (incorporating a slight premium for the RE sector structural story). Upside: +39.3% from CMP Rs. 56.

DCF Sanity Check: Assuming FCF normalises to Rs. 30 Cr in FY27E and grows at 15% for 5 years, then 6% terminal, discounted at 14% WACC: Intrinsic value ≈ Rs. 72–82 range. Supports the Rs. 78 target.

Scenario	FY27E Sales (Cr)	OPM%	FY27E PAT (Cr)	P/E Multiple	Target (Rs.)
BULL	Rs. 1,100	9.5%	Rs. 80	15x	Rs. 129
BASE	Rs. 920	8.6%	Rs. 55	13x	Rs. 78
BEAR	Rs. 650	5.0%	Rs. 25	10x	Rs. 27

Bull: Freight rate recovery + RE boom. Base: Partial recovery + steady volumes. Bear: Prolonged freight rate depression + volume loss.

SECTION 9 — KEY RISKS

Risk	Description	Prob.	Impact	Monitor
Freight Rate Cyclicity	Global container shipping overcapacity (2024–26) has driven sea freight rates down 28–30%. Prolonged compression would keep OPMs below 5% and push FY26/FY27 PAT well below estimates.	HIGH	HIGH	Baltic Dry Index; Shanghai Container Freight Index quarterly.
Customer Concentration (RE Sector)	RE sector contributes ~47.5% of revenue. Any slowdown in India RE equipment imports — tariff changes, policy reversal, supply chain disruption — would materially impact top line.	MED	HIGH	GoI renewable capacity addition data, import duty notifications.
Working Capital Deterioration	Debtor days expanding (27→41); FCF turned negative in FY25 (–Rs. 6 Cr). If the RE sector clients delay payments, cash flow stress could emerge requiring additional debt.	MED	MED	Debtor days each quarter; receivables vs. revenue growth.
Competition from Global 3PLs	Large global forwarders (DHL, Maersk Logistics, DSV) are aggressively entering Indian RE logistics. They can undercut on price given scale and carrier relationships.	MED	MED	Win/loss rate; margin trends; new client announcements.
Promoter Over-Reliance	Two promoters hold 74.2% and the company is highly founder-led. Key-man risk if either promoter disengages. IPO price erosion (–57%) may create morale/retention challenges.	LOW	HIGH	Promoter communication; shareholder meeting disclosures.
IPO Lock-Up Expiry	Post-IPO lock-up for promoters typically expires after 6–12 months. A promoter sell-down could create significant supply pressure on the stock.	MED	MED	SAST disclosure filings on NSE/BSE.
Macro/FX Risk	Freight forwarding revenues partly denominated in USD. INR appreciation could reduce rupee realisations. Global trade slowdown (tariff wars) would reduce TEU volumes.	LOW	MED	INR/USD exchange rate; RBI commentary; global trade PMI.

SECTION 10 — RECOMMENDATION & INVESTOR PROFILE

Final Rating: ACCUMULATE

Conviction Level: MODERATE. We initiate coverage with an ACCUMULATE rating and a 12-month price target of Rs. 78 (+39.3% from CMP Rs. 56.0).

Entry Zone: Rs. 50–58 (accumulate in tranches). Below Rs. 45 would be a high-conviction buying opportunity (implying 8x TTM P/E), and above Rs. 65 the risk-reward becomes less attractive.

Thesis Invalidation Triggers:

1. EBITDA margin stays below 5% for three consecutive quarters (suggesting structural, not cyclical, deterioration).
2. Promoter stake falls below 65% through secondary sales within 18 months of IPO.
3. Renewable energy equipment import growth rate falls below 10% YoY for two consecutive half-years.

Ideal Investor Profile: Small-cap growth investor with 12–24 month horizon, tolerance for freight rate volatility, and interest in India's energy transition theme. Not suitable for dividend-seeking or capital-preservation investors given the zero dividend policy and IPO track record.

Key Monitoring Points: Q4 FY26 margin recovery; freight rate indices; RE capex pipeline; cash conversion cycle trend; management guidance on FY27 margin trajectory.

Parameter	Our View	Commentary
Rating	ACCUMULATE	Deep IPO discount; recovery play on freight rates + RE structural story
12M Price Target	Rs. 78	+39.3% upside from CMP Rs. 56; based on 13x FY27E EPS
Entry Zone	Rs. 50 – 58	Accumulate in tranches; strong buy below Rs. 45
Stop Loss	Rs. 42	If freight rates and margins don't recover by Q2 FY27
Upside Risk	Rs. 129	Back to IPO price in bull case (15x FY27E EPS)
Horizon	12 months	Freight rate normalisation expected by FY27H1

APPENDIX — LATEST CONCALL BRIEF: Q3 FY26 (DEC-2025)

CALL GRADE: CAUTIOUS

Signal	Status	Implication
Result Quality	WEAK	Miss vs. prior year — OPM 2.77% vs. 9.51% in Q3 FY25
Management Tone	HEDGED	Attributed weakness to external freight rates; limited forward guidance
Guidance Delta	WITHDRAWN	No specific FY26 guidance reinstated; watch Q4 FY26 recovery

STRONGLY POSITIVE | POSITIVE | NEUTRAL | CAUTIOUS ■ | NEGATIVE

TO MY BOSS — Q3 FY26 (DEC-2025 QUARTER)

Q3 FY26 was the worst quarter in Glottis's post-listing history — headline revenue of Rs. 143.87 Cr (down 27.2% YoY) and OPM crashing to 2.77% vs. 9.51% in Q3 FY25, with PAT collapsing to Rs. 2.70 Cr from Rs. 13.47 Cr. There are no exceptional items here — this is operationally clean, which makes it worse. The root cause is a 28–30% decline in global sea freight rates during the quarter, reducing per-TEU realisation from ~Rs. 79,000 in Q2 FY26 to ~Rs. 67,000 in Q3 FY26 — a 16% sequential drop — while volumes also fell to 20,710 TEUs from ~24,789. Management attributed the miss entirely to external freight market conditions and cited Ahmedabad branch opening and fleet expansion to 42 vehicles as positive moves — these sound like distractions from the core miss. The structural story (RE logistics, 125-country network, asset-light model) remains intact but investors need two recovery quarters to regain confidence. My call: HOLD at Rs. 56; accumulate below Rs. 50 for a 12-month target of Rs. 78 once Q1/Q2 FY27 shows margin recovery.

1. FINANCIAL PERFORMANCE SNAPSHOT — Q3 FY26 (DEC-2025)

Metric	Q3 FY26 Actual	Q3 FY25 Actual	YoY Chg	QoQ Chg	Verdict
Revenue (Rs. Cr)	143.87	197.73	-27.2%	-33.0%	MISS
Operating Profit	3.98	18.80	-78.8%	-78.0%	MISS
OPM %	2.77%	9.51%	-674 bps	-567 bps	MISS
PBT (Rs. Cr)	3.83	17.94	-78.7%	-77.5%	MISS
PAT (Rs. Cr)	2.70	13.47	-80.0%	-78.2%	MISS
EPS (Rs.)	0.29	1.68	-82.7%	-81.2%	MISS

NOTE: No exceptional items in Q3 FY26 — this is a clean operational miss driven by freight rate compression.

2. SEGMENT / GEOGRAPHY BREAKDOWN — Q3 FY26

Segment / Region	Revenue (Rs. Cr)	YoY%	QoQ%	Commentary
Ocean Freight (Sea Import)	113.66 est.	-28.3%	-34.1%	Dominant segment; 79% of Q3 revenue. Freight rates down 28-30% YoY.
Air Freight	~15 est.	N/A	N/A	Minor segment; limited disclosure.
Road / Inland Transport	~10 est.	N/A	N/A	Fleet expanded to 42 vehicles; growing contribution.
Asia (Geographic)	~119 est.	-27.0%	-33.0%	83% of Q3 revenue; primarily China-India RE equipment corridor.
Rest of World	~25 est.	N/A	N/A	17% contribution; diversification ongoing.

[EST] = Chartitude estimates based on % breakdowns disclosed by management. Company does not publish segment-level P&L.;

3. MANAGEMENT COMMENTARY THEMES

Theme	What They Said	Our Read	Tag	Tone
-------	----------------	----------	-----	------

Freight Rate Decline	Freight rates fell 28-30% during the quarter; per-TEU realisation dropped from Rs. 79K to Rs. 67K.	Accurate and consistent with global freight data. This is the correct external explanation.	[DATA]	Transparent
Volume Performance	TEU volumes declined to 20,710; management attributed to seasonal softness plus rate-driven demand slackening.	Volume decline alongside rate decline is double pressure. "Seasonal" is partly true but Dec is typically softer.	[GUIDANCE]	Hedged
Expansion Plans	Opened Ahmedabad branch; fleet expanded to 42 vehicles (added 25 vehicles during H1 FY26).	Positive operational steps. Fleet at 42 vehicles from ~17 is significant capex deployment of IPO proceeds.	[POSITIVE]	Transparent
FY26 Margin Recovery	Management indicated Q4 FY26 should show improvement as freight rates stabilise.	No specific guidance given; "stabilise" is vague. Will need to verify in Q4 results.	[GUIDANCE]	Hedged
Renewable Energy Outlook	RE sector remains the core growth driver; no slowdown in customer enquiries.	Encouraging. India RE capex pipeline remains strong through FY27-28.	[POSITIVE]	Transparent
Working Capital / Collections	Management did not specifically address receivable days expansion.	Silence on debtor days (41 days, up from 27 in FY23) is a concern. Watch for explicit commentary.	[EVASIVE]	Evasive

4. OPERATING & BUSINESS METRICS

Metric	Dec-25 (Q3 FY26)	Sep-25 (Q2 FY26)	Dec-24 (Q3 FY25)	Trend
TEU Volumes	20,710	~24,789 est.	~24,789 est.	DOWN ▼
Avg. Freight Rate (Rs./TEU)	~67,000	~79,000	~80,000 est.	DOWN ▼
Sea Import Revenue Share	79%	~78% est.	~80% est.	STABLE ~
Asia Revenue Share	83%	~82% est.	~82% est.	STABLE ~
Branch Count	8	7	7	UP ▲
Owned Fleet (Vehicles)	42	~25 est.	~17 est.	UP ▲
Countries Served (FY25)	125 (FY25)	125 (FY25)	100 (FY24)	UP ▲

5. MARGIN DRIVERS — Q3 FY26 vs. Q3 FY25

Driver	Impact (bps)	Recurring?	Comment
Sea freight rate decline (-28 to -30%)	-485 bps	NO (cyclical)	Primary driver. Rates should normalise as shipping capacity rationalises in CY2026.
Volume decline (TEU -16% vs Q2 FY26)	-120 bps	NO (seasonal+cyclical)	Compounded effect of lower volumes on fixed cost absorption.
Fleet expansion (42 vehicles)	-45 bps	YES (partially)	Higher depreciation and vehicle costs from fleet expansion. Will reduce as fleet utilised.
Interest cost increase (debt Rs. 50 Cr)	-30 bps	YES	IPO-funded vehicle financing at ~8-9% interest rate; ongoing.
Branch expansion (Ahmedabad)	-20 bps	YES (one-off initially)	New branch fixed costs; should turn revenue-positive in 2-3 quarters.
Positive: Other income Rs. 1.36 Cr	+95 bps	NO (non-recurring)	Higher other income in Q3 FY26 (1.36 vs 0.61 in Q3 FY25) partially offsets. Not extrapolatable.

6. GUIDANCE & FORWARD SIGNALS

Metric [GUIDANCE]	Prior Guidance	New / Reiterated	Delta	Credibility
FY26 Revenue	Rs. 900-1,000 Cr (implied by management)	No explicit guidance given; 9M at Rs. 527 Cr makes Rs. 900 Cr FY26 difficult	CUT	LOW

FY26 OPM%	8-9% (pre-Q3)	Not reiterated; Q3 at 2.77% makes FY26 OPM ~6-7% realistic	CUT	LOW
Q4 FY26 Recovery	N/A	Management indicated improvement as freight rates stabilise; no numbers given	NEW	MEDIUM
Fleet Expansion	~30 vehicles by FY26-end	Reached 42 vehicles by Q3 FY26 — ahead of plan	BEAT	HIGH
Branch Expansion	8-10 branches by FY27	At 8 branches now; on track	ON TRACK	HIGH
Dividend Policy	No dividend stated at IPO	No change; reinvesting all profits	MAINTAINED	HIGH

7. CAPITAL ALLOCATION — Q3 FY26 UPDATE

Item	Amount (Rs. Cr)	vs. Prior Year	Comment
Capex (Fleet & Branch)	~14 est. (9M FY26)	UP significantly	Fleet expanded from ~17 to 42 vehicles; Ahmedabad branch opened. IPO proceeds deployed.
Dividends	Rs. 0	UNCHANGED	Zero dividend maintained; reinvesting all capital into growth.
Working Capital Change	+Rs. 50 Cr (est.)	UP	Receivables growing with revenue; debtor days at 41 days and rising.
Net Debt Movement	+Rs. 24 Cr (Sep25 vs FY25)	UP	Debt rose from Rs. 26 Cr (FY25) to Rs. 50 Cr (Sep-25) — vehicle financing.
IPO Proceeds Deployed	Rs. 200 Cr raised	N/A (new)	Fresh issue proceeds being deployed into fleet, branches, working capital.

8. Q&A; HEAT MAP — Q3 FY26 CONCALL (FEB 19, 2026)

#	Analyst / Firm	Question	Mgmt Answer	Tone
1	Sell-side Analyst	What is the outlook for freight rates in Q4 FY26 and how should we model margins?	Management indicated rates are "stabilising" and Q4 should be better; no specific guidance range provided.	HEDGED
2	Buy-side Analyst	Why did TEU volumes decline QoQ when the fleet was being expanded?	Attributed to seasonal factors and softer demand in Dec quarter; H2 typically softer than H1.	HEDGED
3	Retail Investor (via platform)	Will the company consider a dividend given the Rs. 200 Cr IPO proceeds raised?	No dividend planned; all proceeds to be reinvested into fleet, branches, and working capital.	TRANSPARENT
4	Sell-side Analyst	Receivable days are rising — what is the collections outlook?	Management did not specifically address; moved to general comments about RE sector customer quality.	EVASIVE
5	Analyst	Is the renewable energy vertical growth on track despite the freight rate weakness?	Confirmed RE remains the core growth driver; no volume slowdown in customer enquiries for RE equipment logistics.	TRANSPARENT
6	Analyst	What is the utilisation rate on the 42-vehicle fleet and EBITDA contribution?	Fleet is being ramped up; utilisation and per-vehicle economics not disclosed.	EVASIVE

Dodged questions to watch next quarter: (1) Specific debtor days and collections timeline; (2) Per-vehicle fleet EBITDA contribution; (3) FY26 full-year revenue guidance.

9. RISKS FLAGGED ON CONCALL

Risk	Flagged By	Probability	Impact	Timeline
Freight rate prolonged depression	Management (implicit)	HIGH	HIGH	CY2026 (next 2-3 quarters)

Volume decline continuation	Analyst Q	MED	HIGH	Q4 FY26 onwards
Working capital squeeze	Analyst Q	MED	MED	FY26H2 if receivables rise
Competition in RE logistics	Not flagged	MED	MED	FY27 onwards
IPO promoter lock-up expiry	Not flagged	LOW	MED	12 months from Oct-2025

10. ANALYST VERDICT — MULTI-BAGGER SCORECARD

Factor	Status	Commentary
Revenue Visibility	WEAKENED	Short-term visibility poor (freight rate driven). Long-term RE-led growth thesis intact but 1-2 quarters of weakness likely.
Margin Trajectory	WEAKENED	OPM at 2.77% in Q3 FY26. Even if freight rates partially recover, FY26 full-year OPM will be ~6-7% vs. pre-IPO 8%.
Capital Allocation Quality	INTACT	No dividends; reinvesting in fleet and branches. D/E 0.25x. IPO proceeds being deployed sensibly. Interest cover 18.8x.
Competitive Moat	INTACT	RE project cargo niche, 125-country network, repeat customers (871 of 1,908). Moat is moderate but defensible in niche.
Management Credibility	WEAKENED	Evasive on receivables; no quantitative FY26 guidance; fleet utilisation not disclosed. Two EVASIVE call flags.
Valuation Comfort	INTACT	TTM P/E 13.5x (52% discount to sector median), EV/EBITDA 8.36x (below sector). Valuation already pricing in a lot of pain.

CONVICTION CALL

UNCHANGED (ACCUMULATE) — Structural thesis intact; Q3 FY26 weakness is cyclical freight-rate driven.

Metric	Current	5Y Average (est.)	Implied
P/E (TTM)	13.5x	~18x est.	Cheap vs. history
EV/EBITDA	8.36x	~10x est.	At/below fair value
ROCE	90.0%	~115% (10Yr avg)	Q3 FY26 drags down TTM
