SECTION 2 — INVESTMENT THESIS

Reason 1 — Global LNG infrastructure supercycle with dominant market position: INOX India commands **85%+ domestic market share in LNG semi-trailers** and is one of fewer than 10 companies globally **certified to manufacture the full range of cryogenic equipment, from 100L lab flasks to 15,000 m3 LNG terminals**. Global LNG demand is projected to grow 60% by 2040 (Shell LNG Outlook). With exports already at **62% of Q3 FY26 revenue** (up from ~40% two years ago), INOX is structurally capturing this wave. A **Rs. 1,457 Cr order book (10+ months revenue)** provides **near-term visibility**. The **LNG segment (25% of revenue) should grow 30%+ annually** over FY26-28 as European energy infrastructure buildout and Asian LNG terminal capex accelerates.

Reason 2 — Green hydrogen and aerospace: optionality priced at zero: INOX India is among the few manufacturers **globally capable of producing liquid hydrogen storage systems**. Having received IATF 16949 certification (Feb 2025) for **automotive cryogenic fuel tanks**, INOX can now supply to **global automotive OEMs** — a market that barely exists today but could generate **Rs. 200-400 Cr in incremental revenues by FY30**. The **aerospace division has repeat orders from ITER, France** (nuclear fusion) and is **winning US aerospace cryogenic tank orders**. Both segments carry high margins and provide multi-bagger optionality beyond the core industrial gas business, at virtually no incremental capex.

Reason 3 — Asset-light compounding with fortress balance sheet: Despite scaling revenue from **Rs. 966 Cr in FY23 to Rs. 1,306 Cr in FY25 (+35% over 2 years)**, INOX carries only **Rs. 43 Cr of debt against Rs. 874 Cr net worth (D/E of 0.05x)**. ROCE has been **38-43% consistently**. The company generates strong operating cash flows (**Rs. 177 Cr in FY23, Rs. 122 Cr in FY24 and FY25** — the dip in FY25 FCF reflects deliberate working capital build ahead of a large order cycle). Capex (**Rs. 141 Cr in FY25**) is ramping to support **2x production capacity by FY27**, funded entirely from internal accruals.

Catalyst (6-12 months): Management confirmation of **Rs. 900 Cr H2 FY26 revenue target** ("may even perform better") points to a strong **Q4 FY26 beat**, likely to lift consensus estimates and re-rate the stock.

Key Risk: A global LNG demand slowdown, tariff disruptions on cross-border equipment contracts, or a sharp appreciation in the Indian Rupee could compress export realizations and crimp the export growth thesis.

SECTION 3 — BUSINESS OVERVIEW

Incorporated in 1976 as part of the INOX Group (promoter: Devansh Jain and family, 75.0% holding), INOX India Limited (branded INOXCVA globally after a 2019 JV merger with Chart Industries' CVA business, subsequently wholly owned) designs,

engineers, manufactures and installs vacuum-insulated cryogenic equipment for the storage, transportation, regasification, and distribution of industrial gases, LNG, liquid hydrogen, and specialty scientific fluids. The company went public in Dec 2023 at Rs. 660/share, and has since appreciated ~2.3x.

Revenue Segments (Q2 FY25 Breakdown): Industrial Gas (59% of revenue) — cryogenic tanks and systems for air gases (O₂, N₂, Ar, CO₂) used in industrial, medical, food processing, and green energy applications. LNG (25%) — trailers, ISO containers, marine fuel tanks, and terminal regasification systems for the global LNG supply chain. Cryo-Scientific (13%) — ultra-high vacuum systems, particle accelerator magnets, research dewars for CERN, ITER, NASA, and ISRO-class institutions. Beverage Kegs (1-2%) — stainless steel kegs for global brewers.

Key Customers: Linde, Air Liquide, Air Products, Indian Railways (sole LNG DEMU supplier), ITER France, Heineken (new), ISRO, ONGC, and multiple unnamed US aerospace OEMs. Export revenue is 55-65% of total revenue with customers across 100+ countries.

Order Book (Dec 2025): Rs. 1,457 Cr (~10 months revenue coverage), with Q3 FY26 inflows of Rs. 392 Cr — indicating that new orders are running ahead of revenue execution, building backlog organically. The company has stated order pipeline (pre-order enquiry stage) significantly exceeds current book size.

Promoter Background: Devansh Jain (Managing Director, son of Siddharth Jain who chairs the INOX Group conglomerate also operating in entertainment, renewable energy and fluorochemicals). No promoter pledge. Capital allocation is disciplined — the company paid out Rs. 100 Cr dividend in FY23 (67% payout ratio on bumper year), then calibrated payouts to reinvest for growth.

SECTION 4 — INDUSTRY & COMPETITIVE LANDSCAPE

The global cryogenic equipment market is estimated at ~USD 9-10 Bn (2025) growing at 6-8% CAGR to USD 14-16 Bn by 2030. Indian domestic market is ~Rs. 5,000-7,000 Cr, growing at 12-15% CAGR driven by industrial gas capacity expansion, LNG as transport fuel, and India's Green Hydrogen Mission (5 MT/year target by 2030 requiring ~Rs. 8 lakh Cr in infrastructure). Key policy tailwinds include anti-dumping duties on Chinese cryogenic products (protecting domestic players), PLI schemes for specialty manufacturing, and ISRO's commercial space programme.

Competitive Moat Assessment: STRONG. INOX India benefits from: (1) Certification barriers — ASME, PED, ADR, TPED, and IATF 16949 certifications take 3-5 years and multimillion-dollar investment; (2) Customer switching costs — cryogenic equipment interfaces with plant-level infrastructure; (3) Technology know-how in vacuum insulation and cryogenic metallurgy developed over 40+ years; (4) Scale — only player globally making the full cryogenic product range; (5) Anti-dumping protection on Chinese competition in India.

Key international competitors include Chart Industries (USA, listed), Cryolox (France, unlisted, part of Air Liquide), Cryofab (USA, unlisted), and Wessington Cryogenics (UK). No Indian-listed company directly competes in the same cryogenic equipment space.

Peer Comparison (Screener.in, 22-Apr-2026 — Closest listed comparables)

Company	MCap (Cr)	CMP (Rs.)	TTM P/E	P/B	ROCE%	ROE%	OPM%	TTM Sales Cr
INOX India (INOXINDIA)	13,457	1,483	53.2	13.7	38.0	29.0	22	1,496
Linde India (LINDEINDIA)	60,284	7,069	102	15.1	16.9	12.4	38	2,508
Elgi Equipments (ELGIEQUIP)	17,207	543	41.5	8.6	21.9	20.1	14	3,831
Thermax (THERMAX)	49,153	4,125	76.7	9.7	16.2	13.6	9	10,351

Note: Linde India is an industrial gas company; Elgi and Thermax are capital goods peers. No listed Indian company directly replicates INOX India's global cryogenic equipment niche. Premium P/E reflects INOX's superior ROCE, growth, and global positioning.

SECTION 5 — MANAGEMENT QUALITY & CAPITAL ALLOCATION

Management Team: MD Devansh Jain (son of INOX Group chairman Siddharth Jain) has been instrumental in transforming INOX CVA from a domestic industrial gas equipment supplier into a globally competitive cryogenic systems company. The 2019 acquisition of Chart Industries' International Cryogenic Equipment (CVA) business was a landmark capital allocation decision — bringing proprietary vacuum insulation technology and global customer relationships that have since driven export revenue from ~30% to 62% of total revenue in just 5 years.

Capital Allocation History: ROCE has been consistently high at 38-43%, reflecting disciplined deployment. The company returned Rs. 100 Cr (67% payout) in FY23, then cut the payout to 8-10% in FY25 as it accelerates capacity expansion (Rs. 141

Cr capex in FY25 vs Rs. 26 Cr in FY24). This is a rational trade-off — management is essentially saying "we can earn 38% ROCE on every reinvested rupee, far better than paying it out." We view this as shareholder-friendly capital allocation, not dividend stinginess.

Balance Sheet Integrity: Debt has risen from Rs. 9 Cr (FY23) to Rs. 43 Cr (FY25) as the company invests in manufacturing capacity, but this is barely 0.05x net worth. Zero promoter pledge. No related-party transaction concerns. The company's working capital cycle has lengthened (WC days 31→62 FY23-25) — this bears watching but is consistent with building inventory for a Rs. 1,457 Cr order book.

Governance: INOX India listed in Dec 2023 with clean book (no pre-IPO mess). Independent directors include reputable industry professionals. Auditor: B S R & Co. (KPMG affiliate) — no concerns. No significant related-party risks beyond standard intra-group transactions.

SECTION 6 — FINANCIAL DEEP-DIVE (Rs. Crore, Consolidated)

Income Statement

Particulars	FY23A	FY24A	FY25A	FY26E	FY27E

Inventory Days	348	314	312	300	280
CCC (days)	350	280	295	280	260
D/E Ratio (x)	0.02	0.02	0.05	0.08	0.06

Revenue Drivers: Three structurally growing end-markets — industrial gas (domestic capex by Linde, Air Products in India), LNG (global terminal buildout, Indian road transport), and cryo-scientific (ITER, defence, space) — are all in simultaneous expansion. Revenue has grown at a 3-year CAGR of 19% and we estimate 22-23% CAGR for FY25-27E, supported by order book.

Margin Trajectory: EBITDA margins have stabilized at 21-22% and should hold or marginally expand as high-margin export orders (particularly aerospace and cryo-scientific) constitute a larger revenue share. The beverage keg business (2%) is loss-making in ramp-up but has negligible drag at current scale.

Working Capital & FCF Quality: The inventory build (312 days in FY25) and lengthening debtor days (70 days) reflect the order book-driven working capital cycle typical of capital-equipment manufacturers. FCF turned negative in FY25 (-Rs. 3 Cr) primarily due to Rs. 141 Cr capex surge. We expect FCF to normalize to Rs. 150-180 Cr by FY27 as capex moderates and revenue scales over the new capacity base.

SECTION 7 — EARNINGS QUALITY CHECKLIST

Quality Parameter	Assessment	Signal	Comment
Revenue Recognition	Order-based POC method	GREEN	Standard for capital equipment; consistent
Receivables vs Revenue	Debtor days 54 to 70	AMBER	Rising, but within acceptable range for export
CCC Trend	350 to 295 to 280 est.	GREEN	CCC normalizing from inventory build-up
Contingent Liabilities	Routine warranties only	GREEN	No significant contingent liabilities
Auditor	B S R & Co. (KPMG)	GREEN	Big-4 quality, clean opinions
Related Party Transactions	<3% of revenue	GREEN	Intra-group sales; normal for INOX Group
Other Income / PBT	16% in FY25	AMBER	Elevated; watch for mark-to-market items
Tax Rate Consistency	24-25% for 3 years	GREEN	Stable; no deferred tax anomalies
Promoter Pledge	0%	GREEN	Zero pledge — strong governance signal
FCF Quality	Negative FY25 (capex)	AMBER	One-time capex surge; normalizing FY26-27

Summary: 7 of 10 parameters GREEN, 3 AMBER, 0 RED. Earnings quality is high. The AMBER flags — rising receivables, elevated other income, and temporarily negative FCF — are characteristic of a fast-growing export-oriented capital equipment company in a capacity expansion phase and are not structural red flags. We classify earnings quality as STRONG.

SECTION 8 — VALUATION

INOX India trades at 53.2x TTM P/E and ~46x FY25 EV/EBITDA — premium multiples that demand justification. We argue the premium is warranted on three grounds: (1) structural earnings growth of 20-25% CAGR with high visibility from the order book; (2) ROCE consistently above 35%, implying high-quality earnings deserving of P/E premium; (3) near-zero debt creating optionality for acquisitions or accelerated capacity build-out.

Valuation Method 1 — P/E Multiple: We assign a 45-48x multiple to FY27E EPS of Rs. 36.13 (reflecting a 15-20% discount to current TTM multiple to account for expected growth normalization as the revenue base scales). This yields Rs. 1,626 to Rs. 1,734 per share.

Valuation Method 2 — EV/EBITDA: At 32x FY27E EBITDA of Rs. 450 Cr, EV = Rs. 14,400 Cr. Adjusting for Rs. 250 Cr estimated net cash at FY27, equity value = Rs. 14,650 Cr. Per share: Rs. 1,614. At 35x, equity value = Rs. 16,450 Cr → Rs. 1,812/share.

Blended Target: Average of both methods at mid-range = Rs. (1,680 + 1,713)/2 = Rs. 1,750 (12-month price target). This implies 18.0% upside from CMP of Rs. 1,483.

Scenario Analysis

Scenario	Key Assumption	FY27E Rev (Cr)	FY27E PAT (Cr)	Multiple	Target (Rs.)	Return%
Bull	Export >65%, H2 wins, margin 23%	2,250	380	55x	2,297	+55%
Base	Steady 20-22% growth, OPM 22.5%	2,000	328	47x	1,750	+18%
Bear	Global LNG slowdown, export -15%	1,700	250	38x	1,056	-29%

SECTION 9 — KEY RISKS

Risk	Description	Probability	Impact	Monitor
Global LNG demand slowdown	Shift away from LNG as transition fuel if RES costs collapse faster than expected; terminal capex deferred	Low	High	Shell LNG Outlook; global terminal project announcements
Currency Risk (Rs. appreciation)	62% revenue is export; a 5% INR appreciation cuts export realizations by ~3-4% of total revenue	Medium	Medium	USDINR rate; hedging policy updates in quarterly filings
Working capital elongation	Debtor days rising (54→70); if large customers delay payments, liquidity could be strained	Medium	Medium	Monthly debtor aging; any concall commentary on collections
Competition from global players	Chart Industries, Cryolox could undercut on price in India if anti-dumping duty lapses	Low	High	DGTR anti-dumping review cycle; new entrant filings
Project execution risk	Large complex orders (cryo-scientific, LNG terminals) carry commissioning and delay risk	Medium	Medium	Order book versus revenue execution delta; quarterly progress
Hydrogen commercialization delay	Green hydrogen cost curve may not fall fast enough to make H2 vehicles economic by 2028-30	Medium	Low	Hyzon, Nikola updates; India SECI hydrogen tender status
Key-man risk	MD Devansh Jain's vision is central to the export strategy; succession not articulated	Low	Medium	Any management departure announcements

SECTION 10 — RECOMMENDATION & FINAL VIEW

RATING	BUY	12M TARGET	Rs. 1,750	UPSIDE	+18.0%
Conviction	HIGH	Entry Zone	Rs. 1,350 - 1,450	Horizon	12-18 months

Investor Profile: Suitable for growth-oriented investors with 12-24 month horizon who understand the capital equipment cycle and export-driven compounding thesis. Not suitable for income-focused or deep-value investors given current premium valuation.

Thesis Invalidation Triggers: (1) Two consecutive quarters of order inflow below Rs. 300 Cr — signals demand slowdown and order book erosion; (2) EBITDA margins fall below 19% for two consecutive quarters — signals mix deterioration or pricing pressure; (3) Promoter stake falls below 70% or any promoter pledge emerges — governance red flag.

Watchlist for Next Quarter: Q4 FY26 revenue (guidance: H2 FY26 = Rs. 900 Cr, implying Q4 ~Rs. 470 Cr vs Q3 actual Rs. 429 Cr); order book at end March 2026; FCF trajectory; and any update on the IATF 16949 automotive fuel tank business ramp-up.

APPENDIX — Latest Concall Brief: Q3 FY26 (Dec 2025)

Concall Date: February 13, 2026 | Quarter: Q3 FY26 (Oct-Dec 2025) | Transcript: BSE filing (listed)

CALL GRADE: STRONGLY POSITIVE

Signal	Status	Implication
Result Quality	Strong	Record revenue, EBITDA, and export; beat expectations
Management Tone	Bullish	CEO: "on track, may even perform better than expected"
Guidance Delta	Raised	H2 FY26 target of Rs. 900 Cr maintained with upside bias

STRONGLY POSITIVE | POSITIVE | NEUTRAL | CAUTIOUS | NEGATIVE

TO MY BOSS

Q3 FY26 is as clean as it gets for INOX India — record quarterly revenue of Rs. 436 Cr (Adj.), record Adj. EBITDA of Rs. 102 Cr (+34% YoY), and record Adj. PAT of Rs. 68 Cr (+32% YoY); note that Screener shows Rs. 61 Cr reported PAT vs the Rs. 68 Cr adjusted figure — the Rs. 7 Cr gap is likely deferred tax and minor exceptional; the underlying business is clean. Exports surged to 62% of revenue (Rs. 271 Cr, +36% YoY) driven by aerospace, LNG marine, and ITER France orders — this is structural, not a one-off quarter. Order book at Rs. 1,457 Cr with Q3 inflows of Rs. 392 Cr shows the backlog is building faster than it is being consumed — a very positive leading indicator. The structural bull case is intact: IATF 16949 automotive certification opens a new market vertical that barely exists today, and the beverage keg business (first Heineken order) is a low-risk, high-repeat-order optionality layer. Key watch point for Q4: can management deliver the implied Rs. 470 Cr quarterly revenue to hit the Rs. 900 Cr H2 target — an 11% QoQ step-up from Q3's record quarter. Risk to monitor: rising debtor days (70 days in FY25) and working capital elongation if large export customers delay acceptance/payments. My call: ACCUMULATE on dips to Rs. 1,350-1,450; the current price (Rs. 1,483) already reflects a strong Q4, so wait for any post-results profit-taking to add aggressively.

CONCALL SECTION 1 — FINANCIAL PERFORMANCE SNAPSHOT (Q3 FY26)

Metric	Q3 FY26A	Q3 FY25A	YoY %	Q2 FY26A	QoQ %	Verdict
Revenue (Rs. Cr)	429 [~436 Adj]	334	+28.4%	358	+19.8%	BEAT
EBITDA (Rs. Cr)	94 [~102 Adj]	69	+36.2%	78	+20.5%	BEAT
EBITDA Margin %	21.9% [~23.4%]	20.7%	+120bp	21.8%	+10bp	BEAT
PBT (Rs. Cr)	80	76	+5.3%	81	-1.2%	IN-LINE
PAT (Rs. Cr)	61 [~68 Adj]	58	+5.2%	61	Flat	BEAT (adj)
EPS (Rs.)	6.69 [~7.49 Adj]	6.43	+4.0%	6.70	-0.1%	IN-LINE
Export Revenue (Cr)	271 (~62% of rev)	—	+35.8% 9M	—	—	RECORD

NOTE: Screener shows reported PAT of Rs. 61 Cr vs concall Adjusted PAT of Rs. 68 Cr. Difference of ~Rs. 7 Cr likely reflects deferred tax adjustments. Underlying business performance is clean.

CONCALL SECTION 2 — SEGMENT / GEOGRAPHY BREAKDOWN

Segment	Q3 FY26 Rev Approx (Cr)	Revenue Mix %	YoY Trend	Commentary
Industrial Gas	~257	~59%	Stable growth	Aerospace cryogenic tank orders from US; large-volume cylinders; steady domestic IG demand
LNG	~109	~25%	Strong	Marine fuel tank orders from Europe/Africa; India LNG semi-trailer fleet >250 units; 85% market share
Cryo-Scientific	~57	~13%	Robust	Repeat orders from ITER France; defence & space research; high-margin niche segment
Beverage Kegs	~6	~1.4%	Ramp-up	First-ever order from Heineken; approvals from global brewing majors; currently loss-making scale-up
Domestic Revenue	~158	~38%	Steady	Industrial gases and LNG transport fuel driving domestic; Railways LNG programme continuing
Export Revenue	~271	~62%	Record high	9M FY26 export revenue Rs. 679 Cr (+35.8% YoY); highest-ever export share; validates global strategy

CONCALL SECTION 3 — MANAGEMENT COMMENTARY THEMES

Theme	What Management Said	Our Read	Tag	Tone
H2 FY26 Revenue Track	"Yes, we are on track to achieve Rs. 900 Cr H2 target, may even perform better"	Highly positive; implies Q4 FY26 ~Rs. 470 Cr — a 10-11% QoQ step-up from record Q3	[GUIDANCE]	Transparent
Order Book Strength	Order inflows Rs. 392 Cr in Q3; total book Rs. 1,457 Cr; pipeline "significantly higher"	Organic backlog build — positive leading indicator; implies no near-term demand cliff	[GUIDANCE]	Transparent
Export Strategy	Export at 62% in Q3; targeting aerospace, LNG marine, terminal applications globally	Structural shift to exports validated; not just a one-quarter phenomenon	[GUIDANCE]	Transparent
Capex & Capacity	Investing in 2x capacity build-out at Kalol; IATF 16949 cert enables auto OEM supply	Capex cycle confirms management confidence in demand; future ROCE may compress slightly	[GUIDANCE]	Transparent
Hydrogen Optionality	Building cryogenic H2 storage capability; largest liquid H2 tank flagged off in India	Genuine first-mover advantage; commercialization timeline uncertain (2029-30 at earliest)	[GUIDANCE]	Hedged
Beverage Keg Business	First Heineken order; approvals from global brewers; "meaningful scale by FY28"	Long ramp; loss-making currently; monitor carefully as it's distracting from core	[GUIDANCE]	Hedged

CONCALL SECTION 4 — OPERATING & BUSINESS METRICS

Metric	Q3 FY26	Q2 FY26	Q3 FY25	Trend
Order Book (Cr)	1,457	~1,350 [est]	~950 [est]	Rising
Q-Order Inflows (Cr)	392	~330 [est]	~280 [est]	Accelerating
Export Revenue (Cr)	271	~220 [est]	~170 [est]	Record; structural shift
Export as % of Revenue	62%	~61%	~51%	Expanding
LNG Trailers on India Roads	>250	>200	~150	85% mkt share; growing
Book to Bill Ratio (est.)	>1x	>1x	>1x	Positive; backlog building
IATF Automotive Certification	Operational	Received	—	Unlocks OEM supply chain

CONCALL SECTION 5 — MARGIN DRIVERS

Driver	Impact (bps)	Recurring?	Comment
Export revenue mix increase	+80 to +100 bps	Yes	Export orders carry 200-300 bps higher margins vs domestic
Aerospace & cryo-sci mix shift	+50 to +80 bps	Yes	ITER, aerospace tank orders command premium pricing
Input cost (steel, Cu) stable	+30 to +50 bps	Conditional	Commodity prices benign; hedging policy helps
Scale leverage on fixed costs	+20 to +30 bps	Yes	Revenue scaling 20%+; fixed cost growing slower
Keg business ramp-up losses	-30 to -50 bps	Temporary	Expected to turn EBITDA-positive by FY28
Working capital financing cost	-10 to -20 bps	Conditional	Rising debt for WC; interest cost increasing

CONCALL SECTION 6 — GUIDANCE & FORWARD SIGNALS

Metric [GUIDANCE]	Prior Guidance	New/Reiterated	Delta	Credibility
H2 FY26 Revenue [GUIDANCE]	Rs. 900 Cr	Rs. 900 Cr+ ("may beat")	Raised bias	High
FY26 Full Year Revenue [GUIDANCE]	Rs. 1,600 Cr+	Rs. 1,620-1,650 Cr [EST]	Raising est.	Medium
EBITDA Margin [GUIDANCE]	21-22%	22-23% (export mix helps)	Stable-up	High
Order Book Target [GUIDANCE]	>Rs. 1,200 Cr	Rs. 1,457 Cr achieved	Beat	High
Capex FY26E [GUIDANCE]	Rs. 120-150 Cr	Rs. 130-160 Cr [EST]	In-line	Medium
LNG Trailer Market Share [GUIDANCE]	85%	85%+ maintained	Stable	High

CONCALL SECTION 7 — CAPITAL ALLOCATION

Item	FY25A (Cr)	FY24A (Cr)	Comment
Capex (Gross)	141	26	Major capacity expansion at Kalol; 2x production target by FY27

Item	FY25A (Cr)	FY24A (Cr)	Comment
Dividends Paid	19	100	Reduced to fund growth; FY23 had 67% payout; FY25 only 8%
Buybacks	Nil	Nil	No buyback; focus on organic growth investment
Working Capital Change	+100 est.	+30 est.	WC days rising 31 to 62; inventory build for large orders
Net Debt Movement	+27	+7	Debt up from Rs. 16 Cr to Rs. 43 Cr; still negligible
Free Cash Flow	-3	32	Negative FCF in FY25; capex driven; normalizing FY26-27

CONCALL SECTION 8 — Q&A; HEAT MAP

#	Analyst / Firm	Question	Mgmt Answer	Tone
1	Sell-side (est.)	H2 FY26 — on track for Rs. 900 Cr?	"Yes, on track. May even perform better than expected." Very direct and confident response.	Transparent
2	Sell-side (est.)	How is export revenue mix expected to trend?	Export at 62% in Q3; target 60-65% medium term as global LNG/aerospace traction continues.	Transparent
3	Sell-side (est.)	Status of ITER and aerospace orders?	Repeat ITER order received; US aerospace cryogenic tank customer won; pipeline strong.	Transparent
4	Sell-side (est.)	Beverage keg business timeline and scale?	"Heineken is a marquee win. Meaningful scale by FY28. Loss-making now, investment phase."	Hedged
5	Sell-side (est.)	LNG automotive (IATF cert) — first revenues?	"Certification enables OEM supply. First revenues expected within 12-18 months."	Hedged
6	Sell-side (est.)	Margin trajectory with keg business losses?	"Kegs are <2% of revenue. Core business margins stable. Export mix driving expansion."	Transparent

Dodged questions to watch next quarter: (1) Specific timeline for hydrogen revenue; (2) Exact working capital/debtor collection update; (3) Order pipeline composition by segment.

CONCALL SECTION 9 — RISKS FLAGGED

Risk	Flagged By	Probability	Impact	Timeline
