BV/Share	Rs. 76.2	Div. Yield	0.10%
Promoter	63.94%	Pledge	0.00%

Investment Thesis: India's #2 integrated solar cell-module manufacturer with industry-leading utilisation (90% cells, 80% modules), a 9.4 GW / Rs. 13,723 Cr signed order book providing visibility through FY28, and capacity doubling to 10.6 GW cells + 11.1 GW modules by Sep 2026 -- positioned to capture disproportionate value as ALMM2 reshapes domestic supply dynamics from June 2026.

FY23A	FY24A	FY25A	FY26E	FY27E	TTM EPS	P/E TTM	EV/EBITDA	52W Low

Revenue	Revenue	Revenue	Revenue	Revenue	TTM EPS	Trailing	Current	52-Week

SECTION 2 -- INVESTMENT THESIS

Three Core Reasons to Own PREMIERENE:

1. ALMM2 Creates Structural Step-Change in DCR Demand (FY27 Inflection)

From June 2026, India's ALMM-II mandate extends Domestic Content Requirements to C&I; and open-access solar, expanding the DCR-eligible market from ~15-18 GW today to 30+ GW in FY27. Premier is one of only six manufacturers on the ALMM-II approved cell list. DCR cells command \$0.14-0.145/W vs imported cells at \$0.06/W -- a 2.3x premium. This policy shift could double addressable revenue per unit within 12 months. Timeline: FY27 full impact.

2. Capacity 3x Expansion at Industry-Leading Utilisation Creates Exceptional Operating Leverage

Cell capacity expands from 3.6 GW (Q3 FY26) to 10.6 GW by Sep 2026 while module capacity reaches 11.1 GW (vs ~5.5 GW average in FY25). Premier has demonstrated 4-6 month ramp timelines to full utilisation. At 75-80% utilisation on 11 GW modules, revenue could scale to Rs. 13,000+ Cr in FY27 from Rs. 6,519 Cr in FY25. Additionally, FY25 depreciation was elevated at Rs. 498 Cr (accelerated PERC write-down -- now complete), releasing ~Rs. 430 Cr PAT tailwind in FY26. Timeline: FY26-FY27.

3. Backward Integration into Ingot/Wafer Positions Premier for ALMM3 Profit Pool Migration

Construction has commenced on a 10 GW ingot wafer facility in Andhra Pradesh (INR 5,900 Cr, Phase 1 by Dec 2027). Each ALMM wave migrates profit pools upstream -- ALMM1 benefited module makers, ALMM2 benefits cell makers, ALMM3 (expected FY28-29) will benefit wafer/ingot makers. Premier is the earliest mover among non-Adani players. This creates long-duration competitive advantage that is structurally rare in Indian manufacturing. Timeline: FY28-29.

Near-Term Catalyst (6-12 Mths): ALMM2 enforcement from June 2026 + 5.6 GW module plant commissioned March 2026 will drive step-up in run rates and accelerate order conversions at premium DCR pricing.

Biggest Structural Risk: Silver price doubling (\$25->\$50/oz) creates ~\$0.015-0.017/W cost pressure on DCR cells; if hedges expire and costs cannot be fully passed through, EBITDA margins could compress 200-300 bps.

SECTION 3 -- BUSINESS OVERVIEW

Premier Energies Ltd, incorporated April 1995 (Hyderabad, Telangana), is India's second-largest integrated solar cell and module manufacturer. Listed NSE/BSE September 2024 via Rs. 2,830 Cr IPO. Premier holds ~100% share in India's solar cell exports and was India's first manufacturer of TOPCon solar cells. The company serves large IPPs, EPC firms, and PSUs under long-term supply contracts with advance payments.

Segment	Products	Key Details	Rev. Mix (Est.)
Solar Cells (DCR)	TOPCon G12R / M10 cells	3.6 GW cap; 90% util.; 25.2% efficiency; 100% DCR-eligible; exports to module makers	~40-45%
Solar Modules (DCR)	Bifacial/monofacial G12R TOPCon modules	5.5 GW cap (pre-5.6 GW expansion); 75-80% util.; Rs. 2.2-2.3 Cr/MW; ALMM2-eligible	~35-40%
Solar Modules (Non-DCR)	Modules using imported cells	Pass-through pricing; Rs. 1.4-1.5 Cr/MW; lower margin but hedges inventory risk	~15-20%
Transformers (Transcon)	HV/MV/LV power transformers	Acquired Dec 2025; capacity to 16.75 GVA by Jul-26; Rs. 190 Cr order book; Rs. 1,000+ Cr target FY28	~1% (nascent)
EPC / O&M; / BESS	Solar project EPC; O&M; BESS assembly	BESS 6 GWh capacity (INR 280 Cr); AI frames INR 260 Cr; PM Suryaghar rooftop growing	~2-3%

Promoter family (MD: Chiranjeev Singh Saluja) holds 63.94% with zero pledging. Order book: 9.4 GW / Rs. 13,723 Cr as of Q3 FY26 with 70-75% executable in 12 months. Key strategic moves: Transcon transformer acquisition (Dec-25), Ksoler deal (closing Q4 FY26), 10 GW ingot wafer backward integration project (INR 5,900 Cr) in Naidupeta, AP -- the most ambitious upstream integration plan among Indian solar manufacturers.

SECTION 4 -- INDUSTRY & COMPETITIVE LANDSCAPE

India's solar installation market grew from ~15 GW (FY23) to 24+ GW (FY25), making India the third-largest solar market globally. Cumulative capacity has crossed 100 GW. The government targets 500 GW non-fossil capacity by 2030. ALMM2 (effective June 2026) extends DCR requirements to C&I; and open-access solar -- dramatically expanding the DCR market from ~15-18 GW to 30+ GW in FY27. ALMM3 (expected FY28-29) will cover wafers/ingots. Despite 200 GW of announced capacity, actual production runs at only 20-21 GW -- proof of genuine technical barriers in solar cell manufacturing that protect integrated players.

Competitive Moat: STRONG

Only 2 Indian G12R cell makers (Premier + Adani); 25.2% efficiency; ALMM2 compliance; 10.6 GW capacity by Sep-26; 4-6 month ramp demonstrated; 9.4 GW signed OB through FY28; advance payment model with negative working capital. Pricing power: HIGH. Switching costs: MODERATE. IP moat: MODERATE-STRONG.

Peer Comparison (Source: Screener.in, 27-Apr-2026)

Company	CMP (Rs.)	MCap (Cr)	P/E	Fwd P/E	BV (Rs.)	P/B	ROCE%	ROE%	OPM%
Premier Energies	1,023	46,368	34.8	29.6	76.2	13.4x	41.1%	53.6%	31%
Waaree Energies	3,358	96,599	27.8	22.7	399	8.4x	34.9%	27.4%	24%
Emmvee Photovol.	264	18,313	34.3	17.3	13.8	19.1x	28.0%	105%	31%
Waaree Renewable	1,055	10,992	23.0	17.7	89.5	11.8x	83.6%	68.9%	19%

Note: Premier highlighted green. Emmvee ROE elevated due to high leverage (D/E: 2.15x). Waaree Renewable is EPC-asset-light hence superior ROCE. Source: Screener.in.

SECTION 5 -- MANAGEMENT QUALITY & CAPITAL ALLOCATION

The Saluja family has been in solar manufacturing since 1995 -- a 30-year track record that predates India's solar policy wave. MD Chiranjeev Singh Saluja is hands-on operationally. CFO Nand Kishore Khandelwal and Senior Business Officer Vinay Rustagi provide strong institutional depth. Promoter pledge is 0%. FII holding has grown from 2.95% (Mar-25) to 5.72% (Mar-26); DII from 8.66% to 13.69% -- reflecting rising institutional confidence.

Metric	Assessment	Commentary
Promoter Pledge	0.00% -- CLEAN	Zero pledging across all periods; strong governance signal
Dividend Policy	Nascent (2% FY25)	First-ever dividend in FY25. Conserving cash for Rs. 5,900 Cr wafer capex. Appropriate.

Metric	Assessment	Commentary
Capital Allocation	Growth-Oriented	FY26 capex ~Rs. 3,000 Cr; Rs. 5,900 Cr wafer FY27-28; brownfield expansion at INR 101 Cr proves efficiency
Corporate Governance	Generally Clean	Big-4 auditors; listed Sep-2024 with DRHP-level disclosure; SEBI-compliant; independent board
ESOP Dilution	Modest	9.57 lakh shares allotted Apr-26; aligns management interests; dilutive but manageable ~0.2%
Mgmt. Execution	Strong Track Record	G12R TOPCon ramp in 4-6 months; 5.6 GW module plant delivered exactly on schedule Mar-2026

SECTION 6 -- FINANCIAL DEEP-DIVE (Consolidated, Rs. Crores)

Source: Screener.in | Consolidated | (E) = Analyst Estimates | FY = April-March

Income Statement	FY23A	FY24A	FY25A	FY26E	FY27E
Net Revenue (Rs. Cr)	1,429	3,144	6,519	7,800	13,000
YoY Growth (%)	--	+120%	+107%	+20%	+67%
EBITDA	78	478	1,781	2,380	3,900
EBITDA Margin (%)	5.5%	15.2%	27.3%	30.5%	30.0%
Other Income	36	29	134	180	200
Interest	69	121	177	165	220

PAT	-13	231	937	1,480	2,265
PAT Margin (%)	NM	7.4%	14.4%	19.0%	17.4%
EPS (Rs.)	-0.49	8.78	20.79	32.6	49.9
Dividend Payout %	0%	0%	2%	5%	5%

Balance Sheet (Rs. Crores)

Balance Sheet	FY23A	FY24A	FY25A	FY26E	FY27E
Equity Capital	26	26	45	45	45
Reserves & Surplus	385	620	2,777	4,057	6,082
Borrowings	765	1,401	1,954	3,500	5,000
Other Liabilities	934	1,489	2,065	2,600	3,500
Total Liabilities	2,110	3,537	6,841	10,202	14,627
Fixed Assets (Net)	592	1,203	978	2,500	5,400
CWIP	349	20	242	800	1,200
Investments	59	9	845	500	400
Other Assets	1,110	2,305	4,775	6,402	7,627
Total Assets	2,110	3,537	6,841	10,202	14,627
Net Debt	706	1,392	1,109	3,000	4,600
Debt / Equity	1.73x	2.17x	0.69x	0.82x	0.74x
Book Value/Share (Rs.)	16.1	25.0	63.0	90.1	134.9

Cash Flow Statement (Rs. Crores)

Cash Flow	FY23A	FY24A	FY25A
Cash from Operations (CFO)	37	90	1,348
Cash from Investing	-304	-447	-2,410

Cash Flow	FY23A	FY24A	FY25A
Cash from Financing	252	549	1,608
Net Cash Flow	-16	192	546
Free Cash Flow (FCF)	-237	-359	728
CFO / EBITDA %	47%	19%	76%

Key Ratios

Ratio	FY21A	FY22A	FY23A	FY24A	FY25A
Debtor Days	84	71	15	71	45
Inventory Days	44	135	197	157	121
Days Payable	114	168	124	152	88
Cash Conv. Cycle	14	38	88	76	78
Working Capital Days	-24	-28	-58	-12	-22
ROCE (%)	13%	4%	6%	25%	41%
ROE (%)	9%	NM	NM	49%	54%

Financial Commentary: Premier's financials reflect a dramatic turnaround. Revenue grew 107% YoY in FY25 to Rs. 6,519 Cr. EBITDA margins expanded from 5% (FY23) to 27% (FY25) driven by higher DCR mix and operating leverage. FY25 PAT was Rs. 937 Cr, recovering from losses in FY22-23. Notably, FY25 depreciation was Rs. 498 Cr (accelerated PERC write-down -- fully complete) vs normal ~Rs. 96-100 Cr, creating a one-time PAT drag that reverses in FY26. FCF turned positive (Rs. 728 Cr) in FY25. Working capital is structurally negative (-22 days) -- advance payment model is a competitive advantage. FY26E on track for Rs. 7,800 Cr revenue and Rs. 1,480 Cr PAT (9M actual: Rs. 5,594 Cr revenue, Rs. 1,053 Cr PAT). FY27E represents true inflection as 10.6 GW cell capacity at 75% utilisation implies 7.9 GW output.

SECTION 7 -- EARNINGS QUALITY CHECKLIST

Quality Indicator	Rating	Assessment
Revenue Recognition	GREEN	Module/cell sales on delivery; advance payment model reduces receivable risk; clear accounting
Receivables vs. Revenue Growth	GREEN	Debtor days compressed 71 (FY24) to 45 (FY25); negative WC; advance payments are structural
Cash Conversion Cycle Trend	AMBER	CCC 78 days (FY25) vs 76 (FY24) -- slight increase; inventory days 121 still elevated
Contingent Liabilities	AMBER	Rs. 3,105 Cr contingent liabilities (Screener) -- relatively high; requires ongoing monitoring
Auditor Quality	GREEN	Big-4 auditor; DRHP-level disclosures since IPO Sep-2024; SEBI-compliant filings
Related Party Transactions	AMBER	Promoter-linked supply chain entities; typical for family-run Indian manufacturing; disclosed
Other Income / PBT	AMBER	FY25: Rs. 134 Cr other income / Rs. 1,240 Cr PBT = 10.8%; includes hedging gains; declining
Tax Rate Consistency	AMBER	Varied: 72% (FY23 - negative PBT distortion), 20% (FY24), 24% (FY25); now normalising at ~24%
CFO / EBITDA Conversion	GREEN	FY25: 76% CFO/EBITDA (Rs. 1,348 Cr OCF vs Rs. 1,781 Cr EBITDA); strong cash realisation
Depreciation Policy	GREEN	Conservative accelerated PERC DA (Rs. 498 Cr FY25); now complete; new lines on standard 5-yr

Overall Earnings Quality: AMBER-to-GREEN. Core business generates high-quality earnings -- advance payment model, negative working capital, and strong OCF conversion are competitive hallmarks. Watch-points: (1) Rs. 3,105 Cr contingent liabilities need monitoring; (2) high capex intensity will elevate debt; sustainability requires sustained EBITDA growth. No major accounting red flags.

SECTION 8 -- VALUATION

Two valuation approaches: (1) P/E-based on FY27E EPS; (2) EV/EBITDA on FY27E EBITDA. Averaged for base-case 12-month target price.

Method 1: P/E Valuation	Value	Basis	
FY27E EPS	Rs. 49.9	PAT Rs. 2,265 Cr / 45.4 Cr shares; estimate based on capacity ramp trajectory	
Target P/E Multiple	26x	Discount to current 34.8x trailing P/E; Waaree at 27.8x; justified by growth execution risk	
P/E-Based Target	Rs. 1,297	Rs. 49.9 x 26x = Rs. 1,297 (rounded to Rs. 1,300)	
Method 2: EV/EBITDA Valuation	Value	Basis	
FY27E EBITDA	Rs. 3,900 Cr	30% EBITDA margin on Rs. 13,000 Cr revenue estimate	
Target EV/EBITDA Multiple	18x	Slight discount to current 19x; Waaree at 15.5x; premium for higher OPM and ROCE	
Implied EV	Rs. 70,200 Cr	Rs. 3,900 x 18 = Rs. 70,200 Cr	
Less: Net Debt (FY27E)	Rs. 4,600 Cr	Higher debt from wafer/BESS/Transcon investments; manageable vs EBITDA	
EV/EBITDA Per Share	Rs. 1,445	Rs. 65,600 Cr / 45.4 Cr shares	
P/E Method: Rs. 1,297	EV/EBITDA: Rs. 1,445	Average Target: Rs. 1,300	Upside: +27.1%

Scenario Analysis

Scenario	Key Assumptions	FY27E PAT	Multiple	Target (Rs.)
BULL	All capacity on-schedule; ALMM2 fully enforced; margins 32%+; Transcon/BESS add upside	Rs. 2,800 Cr	30x P/E	Rs. 1,800
BASE	Moderate ramp; ALMM2 on schedule; margins 30%; silver manageable via hedging + tech	Rs. 2,265 Cr	26x P/E	Rs. 1,300
BEAR	Capacity delays; ALMM2 delayed; silver/China pressure; OPM falls to 22%	Rs. 1,400 Cr	18x P/E	Rs. 556

SECTION 9 -- KEY RISKS

Risk	Description	Prob.	Impact	Monitoring Indicator
Silver Price Inflation	Silver doubled to ~\$50/oz; adds ~\$0.015-0.017/W cost beyond 6-month hedge; customer pass-through uncertain	HIGH	HIGH	Monthly silver spot; DCR cell pricing; OPM trend Q-by-Q
Capacity Ramp Execution	Adding 7+ GW cell capacity in 3 quarters (Jun + Sep 2026) is unprecedented; equipment delays or process issues possible	MEDIUM	HIGH	Quarterly utilisation updates; Q1-Q2 FY27 results key
ALMM2 Delay / Dilution	Historical pattern of Indian solar policy delays; if enforcement is diluted, DCR market expansion to 30+ GW is deferred	MEDIUM	HIGH	MNRE circulars; industry lobby activity; exemption filings
China Competition	China has 1,500 GW capacity vs 500 GW world demand; anti-involution policy could reverse; non-DCR vulnerable	MEDIUM	MEDIUM	Chinese module export prices; non-DCR order intake
Capex / Balance Sheet	Rs. 3,000 Cr FY26 + Rs. 5,900 Cr wafer project could strain balance sheet; D/E may rise to 1.0-1.2x if EBITDA lags	MEDIUM	MEDIUM	Quarterly net debt; interest coverage; PLI announcement
Technology Obsolescence	Post-TOPCon (tandem cells) expected FY28-29; new 10.6 GW TOPCon capacity may need accelerated write-down	LOW	HIGH	Global solar efficiency records; Chinese R&D; announcements
PLI Uncertainty (Wafer)	Rs. 5,900 Cr wafer investment contingent on PLI support; unfavorable terms could change project economics	MEDIUM	MEDIUM	MNRE PLI wafer announcement; Budget 2026-27 allocations

SECTION 10 -- RECOMMENDATION

RATING	BUY	PRICE TARGET	Rs. 1,300	UPSIDE	+27.1%
--------	-----	--------------	-----------	--------	--------

Parameter	Detail
Conviction Level	HIGH -- multi-year structural story; ALMM policy + operational excellence + capacity pipeline all visible
Entry Zone	Rs. 950-1,050 (current range); accumulate on dips toward Rs. 900 (near 12% below CMP)
Investment Horizon	12 months for base-case target; 18-24 months for full value realisation (FY27 peak capacity)
Ideal Investor Profile	Growth-oriented, medium-to-long-term horizon; comfortable with execution risk and solar policy volatility; 3-5% portfolio weight

Thesis Invalidation Triggers:

1	ALMM2 enforcement delayed beyond Dec-2026 OR major exemptions prevent DCR market from expanding to 25+ GW by FY27
2	Q1/Q2 FY27 utilisation on new 4.8+2.2 GW cell lines fails to reach 60%+ within 6 months of commissioning
3	EBITDA margins compress below 22% for two consecutive quarters on silver inflation + failure to pass costs -- structural break

APPENDIX -- LATEST CONCALL BRIEF: Q3 FY26 (OCT-DEC 2025)

Call Date: 23 January 2026 | Quarter: Q3 FY26 (Oct-Dec 2025) | Transcript: NSE / ConcallInsights

CALL GRADE	POSITIVE
------------	----------

Signal	Status	Implication
Result Quality	STRONG -- PAT +54% YoY	Q3 FY26 PAT Rs. 392 Cr (+54% YoY); EPS Rs. 8.65 (+53%); EBITDA margin 31% (record)
Management Tone	BULLISH	MD confident on ALMM2, 30+ GW DCR FY27 demand, capacity ramp; pipeline at all-time high
Guidance Delta	MAINTAINED + Clarity	5.6 GW module Mar-26 confirmed; 4.8 GW cell Jun-26; 2.2 GW cell Sep-26; wafer project started

STRONGLY POSITIVE | POSITIVE << | NEUTRAL | CAUTIOUS | NEGATIVE

TO MY BOSS

Q3 FY26 was a genuinely strong quarter -- PAT of Rs. 392 Cr (+54% YoY) is clean with no exceptional items; the 53% EPS growth reflects operating leverage as accelerated PERC depreciation finally rolled off completely (CFO confirmed PERC lines are fully written down, halving quarterly depreciation from Rs. 152 Cr to Rs. 70 Cr). Underlying EBITDA margin of 31% is a record and proves DCR cell/module mix is lifting margins structurally -- not cyclically. The 9.4 GW / Rs. 13,723 Cr signed order book with 90% of cell capacity sold through FY28 is the critical multi-bagger anchoring factor; this level of revenue visibility in Indian manufacturing is rare. The single most important near-term catalyst: the 5.6 GW module plant was commissioned on March 30, 2026 (exactly on schedule), followed by 4.8 GW cell line expected June 2026 -- if both ramp to 75%+ utilisation within 6 months, FY27 PAT hits Rs. 2,000+ Cr and the stock re-rates. The biggest watch-point next quarter: silver hedge roll-off -- management is covered for 6 months but beyond that, pricing power assumptions need field-testing in a rising silver environment. ACCUMULATE on dips below Rs. 1,000; TARGET Rs. 1,300.

CONCALL SECTION 1 -- FINANCIAL PERFORMANCE SNAPSHOT

Metric	Q3 FY26 Actual	Estimate [EST]	YoY	QoQ	vs Q3 FY25	Verdict
Revenue (Rs. Cr)	1,936	~1,900 [EST]	+13.0%	+5.4%	1,713	BEAT
EBITDA (Rs. Cr)	593	~550 [EST]	+15.4%	+5.7%	514	BEAT
EBITDA Margin %	30.6%	~29% [EST]	+70bps	+20bps	30.0%	BEAT
Depreciation	70	~150 [EST]	-54%	-61%	152	BEAT
PBT (Rs. Cr)	505	~400 [EST]	+37%	+37%	368	BEAT
PAT (Rs. Cr)	392	~310 [EST]	+54%	+41%	255	BEAT
EPS (Rs.)	8.65	~7.00 [EST]	+53%	+41%	5.66	BEAT

NOTE: Depreciation halved QoQ because accelerated PERC write-down was completed in Q2 FY26. This is a clean, permanent benefit that releases significant PAT in FY26 and beyond.

CONCALL SECTION 2 -- QUARTERLY PERFORMANCE TREND

Quarter	Revenue (Cr)	EBITDA (Cr)	OPM%	PAT (Cr)	EPS (Rs.)	Key Development
Q3 FY25 (Dec-24)	1,713	514	30%	255	5.66	Capacity: 3.2 GW cell / 5.1 GW module
Q4 FY25 (Mar-25)	1,621	528	33%	278	6.16	Strong margins; higher DCR mix quarter

Quarter	Revenue (Cr)	EBITDA (Cr)	OPM%	PAT (Cr)	EPS (Rs.)	Key Development
Q1 FY26 (Jun-25)	1,821	548	30%	308	6.83	IPO proceeds deployed; G12R 1.2 GW at 80% util.
Q2 FY26 (Sep-25)	1,837	561	31%	353	7.80	PERC lines fully depreciated; baseline cleaned
Q3 FY26 (Dec-25)	1,936	593	31%	392	8.65	Record PAT; DA halved; 5.6 GW module nearing completion

CONCALL SECTION 3 -- MANAGEMENT COMMENTARY THEMES

Theme	What They Said	Our Read	Tag	Tone
Capacity Pipeline	5.6 GW module Mar-26 4.8 GW cell Jun-26 2.2 GW cell Sep-26 Wafer line started AP	Specific timelines; 5.6 GW module CONFIRMED commissioned Mar-30-2026	[GUIDANCE]	Transparent
Order Book	9.4 GW / Rs. 13,723 Cr; 70-75% in 12 months; cell OB 90% sold; visibility to FY28	Signed contracts with advances -- not pipeline. Strongest possible demand signal.	[GUIDANCE]	Transparent
ALMM2 / Market	FY27 DCR demand 30+ GW: 10 GW rooftop, 5-7 GW KUSUM, 16 GW open access. Pipeline at ATH.	Demand projection credible given policy. Even 25 GW is bullish for Premier.	[GUIDANCE]	Transparent
Silver Risk	Silver doubled; hedged 6 months; consumption down 68% in 5 years; copper paste in development	Multi-pronged approach genuine. 6-month hedge horizon leaves tail risk. Watch closely.	[GUIDANCE]	Balanced
Revenue Volatility	DCR/non-DCR mix causes 4-5% quarterly revenue swing. Q3 higher non-DCR due to customer site timing.	Valid explanation. But quarterly market reaction creates buying opportunities for long-term investors.	[EVASIVE]	Hedged
Competitor Capacity	Only 20-21 GW production vs 27-30 GW capacity; 54 GW Kotak forecast not materialised.	Candid field-level intel from MD. Validates moat thesis. This is why 90% utilisation premium is sustainable.	[EST]	Transparent
Backward Integration	10 GW wafer line started Naidupeta AP; Phase 1 Dec-27; INR 5,900 Cr total; awaiting PLI	First-mover advantage is massive if PLI comes through. PLI dependency is the key watch-point.	[GUIDANCE]	Transparent

CONCALL SECTION 4 -- OPERATING & BUSINESS METRICS

KPI	Q3 FY26 (Dec-25)	Q2 FY26 (Sep-25)	Q3 FY25 (Dec-24)	Trend
Cell Capacity (GW)	3.6	3.6	2.0	+80% YoY capacity; stable QoQ
Module Capacity (GW)	5.5	5.5	3.4	+62% YoY; +5.6 GW by end Mar-26
Cell Utilisation (%)	~90%	~90%	~80%	Industry-leading; at peak efficiency
Module Utilisation (%)	75-80%	75-80%	~70%	Strong; best-in-class vs peers
Order Book (GW)	9.4	N/A	N/A	Record; FY28 visibility; signed+advances
Order Book Value (Cr)	Rs. 13,723	N/A	N/A	Rs. 6,800 Cr cell + ~Rs. 7,000 Cr module
DCR Cell Price (\$/W)	\$0.14-0.145	~\$0.14	~\$0.12	Stable at premium; 90% capacity sold
Non-DCR Module Price	\$0.165-0.17	\$0.145	\$0.14	+\$0.02 in 1 month from China anti-involution
TOPCon Efficiency	25.2%	~24.8%	N/A	Target 25.8% by FY26-end; India leader

KPI	Q3 FY26 (Dec-25)	Q2 FY26 (Sep-25)	Q3 FY25 (Dec-24)	Trend
Silver Consumption	-68% in 5 years	N/A	N/A	Further -30% targeted; copper paste dev.

CONCALL SECTION 5 -- MARGIN DRIVERS

Driver	Impact (bps)	Recurring?	Comment
PERC Lines Fully Depreciated	+350-400 bps	YES -- permanent	DA halved from Rs.152 Cr to Rs.70 Cr QoQ; PERC write-down 100% complete; new baseline is clean
DCR Cell/Module Mix	+50-100 bps	YES -- structural	DCR at Rs.2.2-2.3 Cr/MW vs non-DCR Rs.1.4-1.5 Cr/MW; ALMM2 will structurally lift DCR mix
Operating Leverage	+100-150 bps	YES -- scalable	Fixed costs spreading over larger revenue base; FY27 capacity 3x will amplify this significantly
G12R Efficiency Gains	+30-50 bps	YES -- compounding	25.2% efficiency -> 25.8% target; more watts per silver/glass unit deployed
Silver Price Inflation	-70-100 bps	NO -- hedged 6 mths	Silver \$0.01->\$0.025/W; beyond hedge horizon risk is real; copper paste alternatives in development
Imported Cell Cost	Neutral (pass-through)	YES -- by design	Non-DCR fully pass-through; \$0.04->\$0.06/W imported cell cost does not hit Premier's P&L;

CONCALL SECTION 6 -- GUIDANCE & FORWARD SIGNALS

Metric	Prior Guidance	New / Reiterated Guidance	Delta	Credibility
5.6 GW Module Line	Mar-2026	DELIVERED -- commissioned Mar-30-2026	On Schedule	HIGH
4.8 GW Cell Line	Jun-2026 [GUIDANCE]	Jun-2026 [GUIDANCE]	Maintained	HIGH
2.2 GW Cell Line	Sep-2026 [GUIDANCE]	Sep-2026 [GUIDANCE]	Maintained	MEDIUM
Total Cell Cap (Sep-26)	10.6 GW [GUIDANCE]	10.6 GW [GUIDANCE]	Maintained	HIGH
Module Capacity	11.1 GW by Mar-26	ACHIEVED -- 11.1 GW as of Mar-2026	Delivered	HIGH
Wafer Project Ph1	Dec-2027	Dec-2027 [GUIDANCE]	Maintained	MEDIUM
Transcon Revenue	Rs. 1,000+ Cr FY28	Rs. 1,000+ Cr FY28 [GUIDANCE]	Maintained	MEDIUM
EBITDA Margins	Stable/improving	30%+ sustained [GUIDANCE]	Maintained	HIGH
FY27 DCR Market	25+ GW [EST]	30+ GW [GUIDANCE]	Upgraded	MEDIUM

CONCALL SECTION 7 -- CAPITAL ALLOCATION

Item	Amount (Rs. Cr)	vs Prior Year	Comment
FY26 Total Capex	~3,000 Cr (full year)	+100% vs FY25	9M: Rs. 750 Cr on lines + Rs. 250 Cr Transcon tranche; Q4 adds 5.6 GW module completion
Transcon Acquisition	Rs. 250 Cr (1st tranche)	New	Dec-2025 closed; 16.75 GVA by Jul-2026; certifications for large HV units 6-18 months
BESS Investment	Rs. 280 Cr	New	6 GWh Phase-1 assembly capacity; not manufacturing cells yet; awaiting policy ALMM-type protection
Aluminium Frames	Rs. 260 Cr	New	Addresses India's anodizing shortage (20% domestic supply); commissioning Dec-2026

Item	Amount (Rs. Cr)	vs Prior Year	Comment
Wafer Project (10 GW)	Rs. 5,900 Cr total	New	Phase 1 (5 GW) Dec-27; Phase 2 (5 GW) Dec-28; PLI awaited; construction started Naidupeta AP
Dividend (FY25)	Rs. 2% payout	First-ever dividend	Conservative payout appropriate given massive capex pipeline; expect 3-5% only post FY28

CONCALL SECTION 8 -- Q&A; HEAT MAP

#	Analyst	Question	Management Answer	Tone
1	Kotak	Why did depreciation halve YoY? Accelerated DA on new lines?	CFO: PERC lines accelerated DA completed. New TOPCon lines: 5-yr standard; will accelerate only if tech obsolescence warrants. Clean baseline now.	Transparent
2	Motilal	Q3 revenue only +5% QoQ despite strong OB -- is demand softening?	MD: DCR/non-DCR mix (Rs.2.2-2.3 vs Rs.1.4-1.5 Cr/MW). Higher non-DCR in Q3 due to customer site readiness. Evaluate annually, not quarterly.	Hedged
3	IIFL	Silver impact -- hedging policy and per-watt cost?	MD: 6 months hedged. Silver \$0.01->\$0.025/W industry-wide. Copper-paste alternatives developing. 10.6 GW scale will offset residual.	Transparent
4	Nuvama	What % of Rs.13,723 Cr OB converts to FY27 revenue?	CFO: 70-75% in next 12 months. Margins: silver is key risk beyond hedge; 'very little net impact due to scale and efficiency gains.'	Balanced
5	Bernstein	25.2% TOPCon efficiency -- sustainable in India?	MD: Normal in China; India's best. Deploying across full 8.2 GW TOPCon via in-house R&D.; Target 25.8% by FY26-end.	Transparent
6	Jefferies	How many competitors will actually execute announced capacities?	CFO: 45-50 companies announced 200 GW; FY26 reality sub-30 GW vs 54 GW forecast. Financial discipline tightening; some exiting.	Transparent
7	DSP	Non-DCR pass-through -- how to think about margin in USD?	MD: Dollar per watt basis; non-DCR fully funded by offtaker. Rupee depreciation may provide upside depending on contract currency terms.	Transparent
8	Multiple	When do new June + September cell lines reach stabilisation?	MD: Track record 4-6 months. June line should be at 90%+ by December 2026. Demonstrated on 1.2 GW G12R already.	Transparent

Dodged Questions to Watch: (1) Exact debt from FY26 capex; (2) Ksoler acquisition price/EPS accretion; (3) Non-DCR margin if Chinese prices fall below \$0.14/W.

CONCALL SECTION 9 -- RISKS FLAGGED

Risk	Flagged By	Prob.	Impact	Timeline
Silver price inflation beyond hedge horizon	Management + Analysts	HIGH	HIGH	Within 6-12 months; ongoing monitoring
DCR/Non-DCR quarterly mix volatility	Management	MEDIUM	MEDIUM	Every quarter; evaluate annually, not Q-by-Q
Capacity ramp on unprecedented scale	Analysts	MEDIUM	HIGH	Jun-Dec 2026 -- critical 6-month window
PLI delay for wafer project	Management (caveat)	MEDIUM	MEDIUM	FY27-28 -- awaiting MNRE announcement
China anti-involution policy reversal	Analysts	LOW	HIGH	Ongoing; quarterly Chinese module prices
Grid/transmission bottlenecks	Management	MEDIUM	MEDIUM	Ongoing; affects offtake timing not contract value

CONCALL SECTION 10 -- ANALYST VERDICT

Multi-Bagger Scorecard (Post Q3 FY26 Concall)

Factor	Status	Comment
Revenue Visibility	INTACT	9.4 GW / Rs. 13,723 Cr signed OB through FY28 with advance payments -- exceptional
Margin Trajectory	INTACT -- watch silver	31% EBITDA record; DA tailwind in FY26; silver is key risk beyond 6-month hedge
Capital Allocation	INTACT	Strategic but aggressive capex; brownfield efficiency proven; PLI watch on wafer
Competitive Moat	INTACT -- strengthening	Only 2 G12R cell makers in India; 25.2% efficiency; 10.6 GW scale by Sep-26
Mgmt. Credibility	INTACT	5.6 GW module delivered exactly on time (Mar-30-26); 4-6 month ramp track record proven
Valuation Comfort	MODERATE	34.8x trailing P/E; not cheap but justified by 50%+ EPS CAGR FY26-28E
CONVICTION	INCREASED	Previous: HIGH -> Now: VERY HIGH
