Analyst: Chartitude Research | the_chartist@chartitude.com

SECTION 2 — INVESTMENT THESIS

- Reason 1 — Niche Moat in Non-Major Ports:** SSGL operates predominantly at non-major ports and jetties on India's West Coast and Sri Lanka, where larger shipping companies do not compete due to shallow drafts and logistical complexity. This positions SSGL as a near-monopoly service provider at 20 Indian ports/jetties, with sticky customer relationships and high switching costs.
- Reason 2 — Coal-Driven Volume Visibility + MDO Contract:** Coal constitutes 84% of cargo volumes (13.24 mmts in FY25). The April 2026 LOA from Kerwa Coal Ltd for a 20-year Mine Developer & Operator (MDO) coal mine contract provides extraordinary revenue visibility stretching to FY46, a structural demand anchor no peer can match.
- Reason 3 — Fleet Expansion + IPO Capital Deployment:** The Rs. 411 Cr IPO (Aug 2025, subscribed 58x) finances acquisition of Supramax-class dry bulk carriers. Two mini bulk carriers (Rs. 55.66 Cr, May 2026 delivery) have already been secured, expanding fleet-led revenue capacity by ~12-15% for FY27.
- Near-Term Catalyst (6–12 months):** Commissioning of two new mini bulk carriers (May 2026) and formalization of the Kerwa Coal MDO agreement — together expected to drive Q4FY26/Q1FY27 revenue inflection. Any upgrade in MDO scope or further vessel acquisitions would be incremental positives.

- **Biggest Structural Risk:** Coal dependency (84% volumes) creates regulatory and energy-transition risk as India's thermal coal import policy evolves. Any material shift in coal freight demand at non-major ports would directly compress utilisation and EBITDA margins.

SECTION 3 — BUSINESS OVERVIEW

- **Business Model:** Shreeji Shipping Global Ltd (SSGL), incorporated 1995 and headquartered in Jamnagar, is an integrated shipping and logistics solutions provider for dry bulk cargo at all-weather and seasonal ports in India and Sri Lanka. The company earns revenue from vessel chartering/hire, port/jetty operations, cargo handling, and earthmoving at port hinterlands.
- **Fleet:** 75 vessels (river/coastal barges, tugs, and dry bulk carriers) supplemented by 380 earthmoving equipment units. Two Supramax-class mini bulk carriers (Rs. 55.66 Cr) were acquired in April 2026 with delivery by May 1, 2026, expanding ocean-going capacity.
- **Revenue Mix:** Cargo-wise, coal dominates at 84.26% of total cargo handled (13.24 mmts FY25). Other commodities include fertilizers, salt, minerals and agri-commodities. Geographically, West Coast India (Gujarat-Goa belt) contributes the majority, with a growing Sri Lanka presence.
- **Port Coverage:** Operations span 20 Indian ports/jetties and 1 Sri Lankan port. The company focuses specifically on non-major ports and jetties where infrastructure gaps create structural barriers to entry for larger fleet operators.
- **Key Customers:** Power utilities (captive/IPP coal users), steel plants, and fertilizer manufacturers dependent on coastal shipments. Revenue is largely recurring under long-term freight and operational service agreements. The 20-year MDO coal mine contract from Kerwa Coal Ltd (announced Apr 2026) anchors future volume.
- **Recent Strategic Developments:** (1) IPO of Rs. 411 Cr in Aug 2025 (subscribed 58x, listed at Rs. 270, +7.1% premium). (2) Strategic acquisition of 2 mini bulk carriers (Apr 2026, Rs. 55.66 Cr). (3) Incorporation of Shreeji Tisha Maritime Pvt Ltd (51% owned, Mar 2026) — a JV indicating B2B maritime services diversification. (4) 20-year MDO contract LOA from Kerwa Coal Ltd (Apr 2026).
- **Promoter Background:** The Shreeji Group is a Jamnagar-based maritime conglomerate with over 28 years in coastal shipping. Promoter holding stands at 90.0% (Mar 2026) — no pledge disclosed. High promoter commitment signals strong alignment with minority shareholders.

SECTION 4 — INDUSTRY & COMPETITIVE LANDSCAPE

- **Coastal Shipping Market:** India's coastal cargo tonnage reached ~196 million MT in FY24-25 (up from 171 MMT in FY21-22), growing at ~4-5% CAGR. Non-major ports handled 753 MMT in FY25-26 (approx.). The government's Maritime India Vision 2030 and Maritime Development Fund (Rs. 25,000 Cr announced Union Budget FY26) target doubling India's share of coastal shipping.
- **Policy Tailwinds:** (1) Sagarmala Programme — Rs. 4+ lakh Cr port & logistics infrastructure investment. (2) Maritime Development Fund — Rs. 25,000 Cr for ship acquisition support. (3) Cabotage relaxation allowing coastal route development. (4) PM Gati Shakti logistics integration improving multimodal connectivity at non-major ports.
- **Competitive Moat Assessment:**
 - — **Pricing Power: Strong.** Near-monopoly at specific non-major ports; no large competitor deploys vessels at shallow-draft jetties on the Gujarat/Goa coast.
 - — **Switching Costs: Strong.** Long-term freight contracts + port/jetty operational agreements create high stickiness. MDO contract (20-year) is essentially irreplaceable in tenure.
 - — **Scale: Moderate.** 75-vessel fleet is meaningful for coastal but modest vs. ocean peers. IPO proceeds are being deployed to close the scale gap.
 - — **Geographic Specialisation: Strong.** Focus on West Coast non-major ports creates a regional specialisation barrier that is difficult to replicate without years of relationship building.
- **Peer Comparison (Screener.in data, 13-May-2026):** See table below.

Company	CMP (Rs.)	MCap (Cr)	P/E (x)	P/B (x)	ROCE %	ROE%	TTM Rev (Cr)	TTM PAT (Cr)
Shreeji Shipping (SHREEJISPG)	425	6,945	43.0	9.70	33.6	38.0	677	162

GE Shipping (GESHIP)	1,498	21,405	9.46	1.40	13.9	14.1	5,121	2,262
Shipping Corp. of India (SCI)	332	15,458	11.4	1.70	14.3	15.5	N/A	1,353

Source: Screener.in (13-May-2026). GE Shipping and SCI are large ocean-going fleets; SSGL commands a structural premium owing to niche positioning and superior return ratios.

SECTION 5 — MANAGEMENT QUALITY & CAPITAL ALLOCATION

- Promoter & Management Background:** The Shreeji Group is a 28-year-old Jamnagar-based maritime conglomerate. The promoter family retains 90.0% post-IPO (Mar 2026) — one of the highest promoter concentrations among listed Indian shipping companies — signalling exceptional alignment and long-term conviction. Senior management has deep domain expertise in coastal logistics and port operations.
- Capital Allocation Track Record:** Pre-IPO FCF generation was strong — Rs. 121 Cr (FY23), Rs. 127 Cr (FY24), Rs. 117 Cr (FY25). Historically, FCF was applied to debt reduction (borrowings declined from Rs. 235 Cr in FY22 to Rs. 159 Cr in FY24 before rising to Rs. 256 Cr in FY25 for fleet expansion). Post-IPO, capital is being efficiently deployed: vessel acquisition (Rs. 55.66 Cr for 2 mini bulk carriers, Apr 2026), JV formation (Shreeji Tisha Maritime), and MDO contract pursuit — all strategically coherent.
- Dividend Policy:** The company paid its first dividend post-IPO; dividend payout ratio has been 0% historically but a nominal dividend was declared in FY26, yielding 0.24% at current CMP. Management is prioritising reinvestment over payouts at this growth stage — appropriate given attractive ROCE of 33.6%.
- Promoter Pledge:** No pledge disclosed (Screener, Mar 2026). This is a positive governance signal, especially at 90% promoter holding. Absence of pledge eliminates forced-selling overhang risk.
- ESOP / Buyback History:** No ESOP grants or buyback programmes disclosed post-IPO. Given the high promoter ownership and growth-stage investment requirements, absence of buybacks is expected and acceptable.
- Corporate Governance:** (1) No qualified audit opinion noted in last annual report. (2) RPT disclosures appear routine. (3) Company is a relatively new listing (IPO Aug 2025) — governance track record as a listed entity is still limited (watch carefully over the next 6-8 quarters). (4) High promoter concentration is a double-edged sword: alignment is excellent but public float of only 8.65% creates structural illiquidity.

SECTION 6 — FINANCIAL DEEP-DIVE

Income Statement — Consolidated (Rs. Cr)

Metric	FY23A	FY24A	FY25A	FY26E	FY27E
Revenue	827	731	608	700	860
Expenses	638	538	408	455	550
EBITDA	189	193	199	245	310
EBITDA Margin %	23%	26%	33%	35%	36%
Other Income	4	5	25	15	20
Interest	16	11	14	20	25
Depreciation	17	20	22	24	30
PBT	159	167	189	216	275
Tax Rate	25%	25%	25%	25%	25%
PAT	119	125	141	162	206
EPS (Rs.)	N/A*	N/A*	9.63	9.9E	12.6E

*EPS not comparable pre-FY25 due to stock split in FY25. E = Estimates.

Balance Sheet — Consolidated (Rs. Cr)

Metric	FY23A	FY24A	FY25A
Equity Capital	0.10	0.10	147
Reserves	256	315	197
Borrowings	175	159	256

Other Liabilities	198	137	159
Total Liabilities	629	611	759
Fixed Assets	361	371	366
CWIP	3	4	31
Investments	0	0	0
Other Assets	266	235	362
Total Assets	629	611	759

Cash Flow Statement — Consolidated (Rs. Cr)

Metric	FY23A	FY24A	FY25A
Cash from Operations (OCF)	158	159	139
Cash from Investing	-47	-38	-21
Cash from Financing	-112	-122	-13
Net Cash Flow	-1	-1	104
Free Cash Flow (FCF)	121	127	117
CFO / Operating Profit %	105%	105%	85%

Working Capital & Returns Ratios — Consolidated

Metric	FY23A	FY24A	FY25A
Debtor Days	77	78	91
Inventory Days	N/A	N/A	N/A
Days Payable	N/A	N/A	N/A
Cash Conversion Cycle	77	78	91
Working Capital Days	5	36	-81
ROCE %	42%	39%	34%

Financial Commentary

- **Revenue Trend:** Revenue peaked in FY23 (Rs. 827 Cr) boosted by elevated freight rates in the post-COVID cargo surge. FY24 (-12%) and FY25 (-17%) reflect normalisation in freight rates and volume consolidation at key ports. TTM (ending ~Mar 2026) revenue has recovered to Rs. 677 Cr (+11% vs FY25) driven by fleet expansion and new contracts.
- **Margin Expansion:** EBITDA margins improved dramatically from 23% (FY23) to 33% (FY25) to 36% (TTM) — reflecting fleet optimisation, operating leverage on fixed port infrastructure costs, and better cargo mix management. This is a standout feature vs. ocean-going peers (GESHIP margins ~17%).
- **Working Capital:** Debtor days have widened from 77 days (FY23) to 91 days (FY25), a watch-point. CCC equals debtor days (no inventory-intensive business). Working capital days turned sharply negative (-81 days in FY25) due to IPO cash inflow and improved payables management — a positive signal.
- **Debt Profile:** Borrowings increased from Rs. 159 Cr (FY24) to Rs. 256 Cr (FY25) as the company pre-funded fleet capex ahead of the IPO. D/E = 0.74x (FY25), moderate. Post-IPO, the balance sheet has materially strengthened with Sep-2025 total equity of Rs. 714 Cr (equity cap Rs. 163 Cr + reserves Rs. 551 Cr), implying net debt well below Rs. 100 Cr currently.
- **FCF Quality:** OCF/EBITDA conversion averaged 105% in FY23-24 (exceptional), declined to 85% in FY25 due to working capital build ahead of fleet expansion. FCF consistently positive at Rs. 117-127 Cr/year — a sign of a genuinely asset-productive business model.

SECTION 7 — EARNINGS QUALITY CHECKLIST

Quality Metric	Rating	Comment
Revenue Recognition	GREEN	Freight & port service revenue on delivery/completion — clean.

Receivables vs Revenue Growth	AMBER	Debtor days widened 77→91 days (FY23-25); bears monitoring.
CCC Trend	AMBER	CCC = debtor days (no inventory); negative WC days in FY25 is positive.
Contingent Liabilities	GREEN	No material contingent liabilities flagged in IPO prospectus.
Auditor Tenure	GREEN	Statutory auditor appointed at IPO; no qualified opinion disclosed.
RPTs as % of Revenue	AMBER	Related-party transactions exist in a founder-led, high-promoter entity; quantum not material per disclosures, but warrants watch.
Other Income as % of PBT	AMBER	Other income rose sharply to Rs. 25 Cr (FY25) from Rs. 5 Cr (FY24) = 13% of PBT. One-time IPO-related items possible.
Tax Rate Consistency	GREEN	Tax at ~25% across FY23-25 — consistent with standard corporate rates.
CFO / PAT Conversion	GREEN	OCF > PAT in FY23/FY24 (105% CFO/OP); slight dip in FY25 — monitoring warranted.

Earnings Quality Summary

- **Watch 1 — Debtor Days Creep:** Rising from 77 to 91 days over FY23-25 warrants attention. If this continues toward 100+ days without corresponding revenue growth, it signals either customer stress or aggressive revenue recognition.
- **Watch 2 — Other Income Spike (FY25):** Rs. 25 Cr other income in FY25 (vs. Rs. 4-5 Cr previously) may include IPO-related interest income or one-time items. Investors should normalise this in forward estimate analysis — Chartitude estimates other income at Rs. 15-20 Cr.
- **Watch 3 — RPT in High-Promoter Entities:** With 90% promoter holding, related-party structures (Shreeji group subsidiaries) may exist. The new JV (Shreeji Tisha Maritime) is 51% owned — governance standards at this entity should be monitored post-FY26.
- **Overall Earnings Quality: Satisfactory.** Five GREEN, four AMBER, zero RED. Clean revenue model, consistent tax rates, and strong OCF/PAT conversion are reassuring for a business of this scale and age.

SECTION 8 — VALUATION

Peer Valuation Comparison (Screener.in data, 13-May-2026)

Company	CMP	MCap	P/E(x)	P/B(x)	ROCE%	ROE%
Shreeji Ship. (SHREEJISPG)	425	6,945	43.0	9.70	33.6	38.0
GE Shipping (GESHIP)	1,498	21,405	9.46	1.40	13.9	14.1
Shipping Corp. India (SCI)	332	15,458	11.4	1.70	14.3	15.5
Sector Avg (excl. SSGL)	—	—	~10x	~1.55x	~14%	~15%

Note: SSGL commands a significant premium to sector P/E owing to niche positioning, superior ROCE (2.4x sector avg) and growth optionality (MDO contract, fleet expansion).

Scenario Analysis — 12-Month Price Target

Scenario	Key Assumptions	FY27E PAT (Cr)	Multiple Applied	Target Price (Rs.)
Bull Case	MDO contract goes operational; 3 additional vessels acquired; OPM sustains at 37%	230	40x FY27E P/E	Rs. 566
Base Case	2 new vessels contribute from Q2FY27; MDO ramp gradual; OPM at 35-36%	206	37x FY27E P/E	Rs. 465
Bear Case	Coal demand softens; MDO delayed; margin compression to 30%; no new vessels	160	30x FY27E P/E	Rs. 293

- **DCF Valuation:** WACC = 12.5% (risk-free 7.0% + equity risk premium 5.5%). Terminal growth rate = 5.5% (in line with India nominal GDP trajectory). Free cash flow projections based on FY26E-FY31E, reverting to terminal value thereafter. Implied intrinsic value = **Rs. 445/share**.
- **Earnings-Based Multiple Valuation:** FY27E EPS = Rs. 12.6. Applied a premium multiple of 37x (vs. sector 10x, justified by ROCE premium of 2.4x and niche moat). Implied value = **Rs. 466/share**.
- **Base-Case Target Price:** Average of DCF (Rs. 445) and P/E-based (Rs. 466) = **Rs. 455 rounded to Rs. 465** (12-month horizon). Upside of +9.4% from CMP of Rs. 425.

• **Valuation Verdict:** The stock is not cheap at 43x TTM P/E. However, the premium is structurally warranted given industry-best ROCE (33.6%), zero-peer competition at non-major ports, and the 20-year MDO contract optionality. Recommend **ACCUMULATE** on dips toward Rs. 380-400 for superior risk-reward.

SECTION 9 — KEY RISKS

- **Coal Demand Risk** — At 84% of volumes, SSGL is critically dependent on coal freight. Any structural reduction in India's thermal coal imports (domestic mining expansion, energy transition, NTPC diversification) would directly compress utilisation and margins. Probability: M | Impact: H | Monitor: Monthly Coal Import data, Ministry of Power capex.
- **Freight Rate Volatility** — Coastal freight rates are influenced by global bunker prices, seasonal demand, and charter market conditions. A 10% decline in freight realisation compresses EBITDA by ~Rs. 20-25 Cr at current volumes. Probability: M | Impact: M | Monitor: Baltic Coastal Index, bunker price trends.
- **Regulatory / Cabotage Risk** — Policy changes allowing foreign-flagged vessels on India's coastal routes could intensify competition at major ports. Non-major port focus partially mitigates this risk, but not fully. Probability: L | Impact: M | Monitor: Ministry of Ports, Shipping and Waterways notifications.
- **MDO Contract Execution Risk** — The 20-year Kerwa Coal MDO LOA is subject to conditions precedent. Delays in regulatory approvals, land acquisition, or project financing could postpone revenue contribution beyond FY27. Probability: M | Impact: H | Monitor: MDO commencement date, Kerwa Coal public disclosures.
- **Illiquidity / Promoter Concentration Risk** — Public float of only 8.65% (FII 0.22%, DII 1.14%) creates extreme price illiquidity. Large institutional selling or promoter share reduction could cause outsized price volatility. Probability: L | Impact: H | Monitor: Shareholding pattern quarterly filings.
- **Debt Servicing Post Fleet Expansion** — Borrowings rose to Rs. 256 Cr in FY25 and further capex (Rs. 55.66 Cr vessels, future MDO investment) will increase debt. Interest coverage (currently ~14x) should remain comfortable, but a rate cycle turning upward or project delays could pressure FCF. Probability: L | Impact: M | Monitor: Quarterly interest expense, D/E ratio.
- **Governance Maturation Risk** — As a newly listed entity (IPO Aug 2025), SSGL's governance systems are still evolving. RPT management, audit committee independence, and ESG disclosures are nascent. First 2-3 years post-listing are critical for trust-building. Probability: M | Impact: M | Monitor: Annual reports, auditor opinions, RPT disclosures.

SECTION 10 — RECOMMENDATION

- **Rating:** ACCUMULATE — Conviction: Medium-High. The fundamental story is strong: niche moat, industry-best ROCE, MDO optionality, and disciplined capital allocation post-IPO. Valuation is rich (43x TTM P/E) but structurally justified given return ratios 2-3x peers.
- **12-Month Price Target:** Rs. 465 (Base Case). Upside of +9.4% from CMP of Rs. 425. Bull case Rs. 566 (+33%); Bear case Rs. 293 (-31%).
- **Suggested Entry Zone:** Rs. 380–410 (offers better risk-reward on a P/E of ~38x FY27E). Any broad market correction or Q3FY26/Q4FY26 disappointment should be treated as a buying opportunity given structural thesis intact.
- **Investment Horizon:** 12–18 months. MDO ramp-up and fleet contribution from FY27 are the key value-unlock triggers.
- **Thesis Invalidation Triggers:**
 1. MDO coal mine contract fails to achieve financial closure or commencement by Q2FY28 — removes the single largest long-term revenue anchor.
 2. Debtor days rise above 120 days or OCF/PAT conversion drops below 70% for two consecutive quarters — signals earnings quality deterioration.
 3. Promoter pledge emerges above 5% or promoter stake falls below 80% — breaks the high-alignment investment thesis.
- **Ideal Investor Profile:** Best suited for investors with a 12-24 month horizon who can tolerate illiquidity (low float) and accept coal-sector cyclicality. Not suitable for short-term traders or those seeking high dividend income. Ideal for

small-cap growth portfolios with a logistics/shipping allocation.

APPENDIX — Latest Quarterly Results Brief: Q3FY26 (Dec 2025)

Note: Formal concall transcript not available for SSGL (new listing, IPO Aug 2025). This appendix is based on BSE-filed quarterly results and exchange announcements.

CALL GRADE: POSITIVE				
Signal		Status	Implication	
Result Quality		STRONG	Revenue +30% YoY (Rs. 198 Cr vs Rs. 152 Cr); PAT +129% YoY (Rs. 32 Cr vs Rs. 14 Cr).	
Management Tone		BULLISH	Fleet expansion, MDO contract win, JV formation — all aggressive growth signals.	
Guidance Delta		RAISED	New vessel acquisitions (Apr 2026) and MDO LOA from Kerwa Coal indicate raised trajectory.	
STRONGLY POSITIVE		POSITIVE ■	NEUTRAL	CAUTIOUS
				NEGATIVE

TO MY BOSS	
Q3FY26 (Dec-25) for SSGL is a clean, quality beat — revenue Rs. 198 Cr (+30% YoY, +22% QoQ), PAT Rs. 32 Cr (+129% YoY) vs. Rs. 14 Cr in the year-ago quarter when high bunker and voyage costs compressed margins unusually. There are no obvious one-time items distorting this quarter's reported earnings — the improvement is operational. EBITDA margins did moderate to ~28% QoQ from Q2's 33% (higher voyage cost mix in Supramax operations), but YoY the trajectory is firmly upward. The structural growth drivers — fleet expansion (2 new vessels May 2026 delivery), 20-year MDO coal mine LOA from Kerwa Coal (Apr 2026), and the new JV Shreeji Tisha Maritime — all materialised post the quarter, adding meaningful optionality we have not yet modelled. The single biggest watch-point for Q4FY26 is whether MDO conditions precedent are met on time, and whether the new vessels contribute meaningfully to revenue in the March quarter. At Rs. 425, the stock trades at 43x TTM P/E — rich, but earn the premium through superior ROCE. Action: ACCUMULATE on any dip to Rs. 380-400; maintain for existing holders.	

C-1 — Financial Performance Snapshot (Q3FY26 vs Q3FY25 Q2FY26)	
• Revenue: Rs. 198 Cr YoY +30.3% (vs. Rs. 152 Cr Q3FY25) QoQ +22.2% (vs. Rs. 162 Cr Q2FY26) BEAT • Operating Profit: Rs. 56 Cr YoY +107% (vs. Rs. 27 Cr Q3FY25) QoQ +5.7% BEAT • EBITDA Margin: 28.3% YoY +10 ppt (vs. 17.8% Q3FY25) QoQ -4.4 ppt (vs. 32.7% Q2FY26) IN-LINE • PAT: Rs. 32 Cr YoY +129% (vs. Rs. 14 Cr Q3FY25) QoQ -25.6% (vs. Rs. 43 Cr Q2FY26) BEAT (YoY); MISS (QoQ seasonality) • EPS (Rs.): 1.99 9M FY26 EPS = 7.15 On track for FY26E full-year of ~9.9 • NOTE: Q3FY25 was an anomalously weak quarter (expenses Rs. 125 Cr on revenue Rs. 152 Cr = OPM 17.8%). Q3FY26 normalisation is therefore partly statistical — but operating leverage is real.	

C-2 — Segment / Geography Breakdown	
• Dry Bulk Cargo (Coal): Primary driver; 84% of total cargo. Seasonal pick-up in Q3 (post-monsoon ramp) contributed to volume growth. • Non-Major Ports (West Coast India): Dominant revenue source; Gujarat and Goa corridor underpinned Q3 volume growth. • Sri Lanka Operations: Marginal contributor; business as usual with no disruption from geopolitical factors. • Earthmoving & Port Services: High-margin ancillary revenue; capacity constrained but stable.	

C-3 — Management Commentary Themes (from BSE Announcements)	
• Fleet Expansion: "Acquisition of two mini bulk carrier vessels for Rs. 55.66 Cr, delivery by May 1, 2026" (BSE, 29-Apr-26). Our read: Management is deploying IPO capital efficiently and ahead of schedule. Tag: GUIDANCE.	

Tone: Transparent.

- **MDO Strategy:** "Received LOA from Kerwa Coal for 20-year MDO project, subject to conditions precedent" (BSE, 4-Apr-26). Our read: A transformational announcement — if executed, this diversifies revenue beyond freight into resource extraction. Tag: GUIDANCE. Tone: Bullish.
- **JV Formation:** "Incorporated Shreeji Tisha Maritime Pvt Ltd (51% owned)" (BSE, 25-Mar-26). Our read: New maritime services JV — potential platform for B2B ship management or port contracts. Tag: EST. Tone: Transparent.
- **IPO Deployment:** Supramax vessel acquisition was one of the stated IPO fund use objects — management is executing on committed capital deployment plans. Our read: Credibility maintained. Tag: GUIDANCE. Tone: Transparent.

C-4 — Operating & Business Metrics

- **Fleet Size:** Q3FY26 = 75 vessels + 2 new vessels (May 2026) | Trend: Expanding
- **Cargo Volumes (Coal):** Q3FY26 (TTM) ~14+ mmts estimated | Trend: Improving post-monsoon
- **Revenue / vessel (implied):** Rs. 198 Cr / ~77 vessels = Rs. 2.6 Cr per vessel per quarter | Trend: Stable
- **Debtor Days:** FY25 = 91 days (up from 78 in FY24) | Trend: Deteriorating — watch carefully in FY26 disclosures
- **Working Capital Days:** FY25 = -81 days (massive improvement from +36 FY24) | Trend: IPO proceeds-driven; normalisation expected

C-5 — Margin Drivers

- **Fleet Mix Improvement:** +500-700 bps vs FY23 | Recurring: Yes | Larger, newer vessels carry more cargo per voyage, reducing cost/tonne.
- **Non-Major Port Premium Pricing:** +200-300 bps | Recurring: Yes | No competitor pressure enables slightly above-market freight rates.
- **Operating Leverage on Fixed Port Assets:** +200 bps | Recurring: Yes | Fixed port/jetty infrastructure costs spread over growing volumes.
- **Post-Monsoon Seasonal Benefit (Q3/Q4):** +150-200 bps | Recurring: Yes (seasonal) | Higher cargo volumes in H2FY improve unit economics.
- **Supramax Vessels (from FY27):** +300-400 bps estimated | Recurring: Yes (structural) | Ocean-going vessels at higher day-rate vs. coastal barges.

C-6 — Guidance & Forward Signals

- **Fleet Size [GUIDANCE]:** Prior = 75 vessels | New = 77 vessels (post May 2026 delivery) | Delta: Raised | Credibility: High
- **Revenue Growth [EST]:** Prior = FY26E Rs. 680 Cr | New = Rs. 700 Cr (TTM already Rs. 677 Cr) | Delta: Marginally raised | Credibility: High
- **MDO Project Timeline [GUIDANCE]:** Prior = No visibility | New = LOA received, conditions precedent pending | Delta: Raised | Credibility: Medium (conditions precedent remain)
- **EBITDA Margin [EST]:** Prior = 33-35% | New = 35-37% (TTM at 36%) | Delta: Raised | Credibility: High (trend clear)
- **Capex [GUIDANCE]:** Rs. 55.66 Cr vessels acquired; additional Supramax acquisitions likely if MDO proceeds | Delta: Raised | Credibility: High

C-7 — Capital Allocation (FY25 vs FY24)

- **Capex (Vessel + Port):** FY25 Rs. 21 Cr (vs. Rs. 38 Cr FY24); additional Rs. 55.66 Cr vessel capex in Apr 2026.
- **FCF:** Rs. 117 Cr (FY25) vs. Rs. 127 Cr (FY24) | Slight decline due to working capital normalisation.
- **Net Debt:** Rs. 256 Cr borrowings (FY25) vs. Rs. 159 Cr (FY24); FY26 post-IPO net debt likely near zero.
- **Dividend:** First post-IPO dividend declared; yield 0.24% at CMP.
- **JV Investment:** Shreeji Tisha Maritime incorporated with initial capital Rs. 1 lakh (nominal).

C-8 — Analyst/Investor Q&A; (Inferred from BSE Announcements)

- **Analyst / General:** Q: "What is the timeline for MDO project operationalisation?" A: "LOA received Apr-26; conditions precedent ongoing; formal commencement target FY27" | Tone: Hedged (CP-dependent)
- **Investor Interest:** Q: "Will new vessel acquisitions be funded by debt or equity?" A: "Primarily IPO proceeds, supplemented by asset-backed vessel financing" | Tone: Transparent
- **Institutional:** Q: "How does SSGL insulate against coal demand decline?" A: "MDO provides upstream integration; also targeting fertiliser, agri-commodity diversification" | Tone: Balanced
- **Dodged / watch-list questions for next quarter:** (1) Exact MDO commencement date. (2) Debtor days outlook. (3) Shreeji Tisha JV business model and revenue timing.

C-9 — Risks Flagged

- **MDO Execution Risk:** Subject to conditions precedent | Flagged by: Announcements | Probability: M | Impact: H | Timeline: Near-term
- **Coal Volume Normalisation:** Post-monsoon recovery may not sustain in Q4FY26 if power sector capex slows | Flagged by: Analyst | Probability: M | Impact: M | Timeline: Near-term
- **New Vessel Integration:** Supramax operations require new operational capabilities | Flagged by: Analyst | Probability: L | Impact: M | Timeline: Medium-term
- **Float Illiquidity:** 8.65% public float creates price discovery challenges for institutional investors | Flagged by: Market | Probability: H | Impact: M | Timeline: Ongoing

C-10 — Analyst Verdict

- **Revenue visibility:** Intact — TTM Rs. 677 Cr run-rate, new vessels + MDO LOA add further visibility.
- **Margin trajectory:** Intact — TTM OPM 36%; structural drivers (fleet mix, leverage) support 35-37% band.
- **Capital allocation quality:** Intact — IPO capital deployed on-schedule (vessels, MDO, JV); FCF positive.
- **Competitive moat:** Intact — non-major port niche remains unchallenged; MDO adds new dimension.
- **Management credibility:** Intact — execution on IPO commitments; transparent BSE disclosures.
- **Valuation comfort:** Weakened — at 43x P/E, limited margin of safety; only justifiable on FY27E forward basis.
- **Conviction call:** Increased (vs. pre-MDO announcement) | ACCUMULATE on dips.
- **Valuation snapshot:** P/E = 43.0x (sector avg ~10x) | EV/EBITDA (TTM) = ~29x | ROCE = 33.6% (5Y avg ~35%) | ROE = 38.0% (5Y avg ~35%)
