

YASH HIGHVOLTAGE LTD

BSE SME: 544310 | Ticker: YASHHV | Sector: Capital Goods – HV Electrical Equipment

RATING	CMP (Rs.)	TARGET (Rs.)	UPSIDE	MKT CAP (Rs. Cr)	HORIZON
ACCUMULATE	649	765	+17.8%	1,852	12-18 months

Investment Thesis: India's only pure-play listed HV transformer bushing manufacturer — 70% RIP market share, near-monopoly economics, multi-year power capex tailwind.

52W High/Low	P/E (TTM)	P/B	EV/EBITDA	Div. Yield
Rs. 650 / 176	63.8x	11.6x	39.4x	0.15%
ROCE	ROE	D/E	Promoter %	Book Value
28.5%	22.6%	0.17x	57.94%	Rs. 55.8

Report Date: 23 April 2026 | Analyst: Himanshu (Chartitude Research) | Data: Screener.in Standalone

SECTION 2 — INVESTMENT THESIS

Reason 1 — Monopoly Economics in a Critical Niche (Structural, 3-5 years)

Yash Highvoltage is India's only ISO 9001:2015-certified indigenous manufacturer of condenser-graded HV transformer bushings. It commands 37.5% market share in OIP and 70% in RIP/RIS bushings up to 245kV. Products are on approved vendor lists of major power PSUs, creating switching-cost moats. 40,000+ cumulative global installations, 125 type-tested products (12.5x increase in FY25 alone), and presence in 60+ countries underpin the defensibility of this position. India's Rs. 9.4 lakh Cr planned power infrastructure spend (FY25-32) drives transformer demand — and every transformer needs bushings.

Reason 2 — RIP Plant Step-Change in Capacity and Revenue (H2 FY27 onwards)

YASHHV used IPO proceeds (Rs. 110 Cr, Dec 2024) to fund a greenfield RIP/RIS bushing facility in Vadodara-Suncity, Gujarat. The plant targets RIP bushings up to 400kV+ — a voltage class currently dominated by imports. Expected ready end-FY26; commercial production H2 FY27. Management guides Rs. 600-700 Cr combined revenue in 2.5-3 years — 4x FY25 revenue of Rs. 150 Cr — at 35% CAGR. RIP bushings carry materially better margins, making the mix shift accretive to EBITDA beyond 22%.

Reason 3 — Global Distribution Network Unlocks Export TAM (FY26-28)

Strategic partnerships: Weidmann (Europe/North Africa), Electrolink UK (UK, Ireland, Wales), ESFP USA launched. JV with Sukrut Electric (50%, co-acquired with Quality Power) provides transformer component integration. These moves transform YASHHV from a domestic-dominant OIP manufacturer to a global RIP/RIS player — addressing the segment where European and Chinese players currently dominate.

Near-Term Catalyst (6-12 months): First revenues from Gujarat RIP plant (H2 FY27) and FY26 full-year results confirming the 78%+ revenue growth trajectory seen in H1 FY26.

Structural Risk: RIP plant delayed beyond H2 FY27 pushes out the revenue step-change and compresses the 2.5-3 year guidance window.

SECTION 3 — BUSINESS OVERVIEW

Yash Highvoltage Ltd (YASHHV), incorporated in Vadodara (Gujarat) in 2002, is India's sole listed pure-play manufacturer of condenser-graded high-voltage transformer bushings — the critical insulation components connecting transformer windings to external circuits, rated up to 800kV. The company is led by founder-CMD Mr. Keyur Shah, with the promoter family holding 57.94% post-IPO.

Product Portfolio: (a) OIP condenser bushings (legacy core product, 11kV-800kV); (b) RIP/RIS condenser bushings (higher-margin, 70% domestic market share up to 245kV); (c) High-current bushings; (d) OIP wall bushings; (e) Oil-to-oil bushings; (f) Retrofit, repair, and testing services — a recurring revenue stream.

Revenue Mix and Customers: Domestic government utilities (Power Grid, STUs, DISCOMs) and transformer OEMs are key customers. YASHHV is on approved vendor lists of major power PSUs. Exports span 60+ countries. Repair/testing services contribute annuity-like revenue.

Recent Strategic Developments: IPO Dec 2024 raised Rs. 110 Cr (fresh issue only — no OFS); greenfield RIP plant in Vadodara-Suncity under construction; 50% stake in Sukrut Electric (JV with Quality Power Ltd) for Rs. 5.24 Cr; ESFP USA incorporated;

Weidmann and Electrolink UK partnerships signed; annual bushing capacity expanded from 6,000 to 10,000 units in FY25.

SECTION 4 — INDUSTRY & COMPETITIVE LANDSCAPE

Market: India's power transformer market was USD 2.3 Bn in 2024; projected USD 4.2 Bn by 2033 (CAGR 6.9%). Global electrical bushing market: 5.6%+ CAGR (2025-30). India's Rs. 9.4 lakh Cr power capex plan (FY25-32) — covering transmission, grid modernization, and renewables — is the structural demand driver. Transformer OEMs (Hitachi Energy, CG Power, TARIL, Voltamp) are running near full capacity with multi-year order books, signalling sustained bushing demand.

Policy Tailwinds: PM Surya Ghar (rooftop solar), 500 GW renewable target by 2030, Green Energy Corridors Phase 2, RDSS (Rs. 3 lakh Cr distribution upgrades), Amrit Kaal Vision 2047.

Competitive Moat: STRONG (RIP segment) / MODERATE (OIP segment). YASHHV is the only domestic manufacturer of RIP/RIS condenser bushings up to 245kV. IEC/IEEE/ANSI compliance, 125 type-tested products, and deep PSU vendor relationships create strong barriers. OIP segment faces import competition and potential in-house manufacturing by large transformer OEMs.

Competitive Threat Watch: TARIL introduced 245kV HV bushings in Feb 2025 under backward integration — key monitor item. Chinese OIP bushings are price competitive. Global players (Hitachi ABB Power Grids, Trench Group) dominate UHVDC above 765kV.

Peer Comparison Table (Source: Screener.in, 23 Apr 2026)

Company	MCap (Rs.Cr)	CMP (Rs.)	P/E	P/B	ROCE %	OPM %	Segment
Yash Highvoltage*	1,852	649	63.8	11.6	28.5%	21.9%	HV Bushings
T&R; India (TARIL)	9,604	320	36.3	6.3	23.3%	15.3%	Power Transformers
Voltamp Transform.	11,182	~9,850	~27	~6.1	N/A	N/A	Transformers
Apar Industries	47,562	11,838	N/A	N/A	42.6%	8.5%	Cables/T-Oil
Genus Power	8,951	294	N/A	N/A	11.5%	21.3%	Smart Meters

* = Subject company. Voltamp/Apar partial data from web sources where Screener page did not load.

SECTION 5 — MANAGEMENT QUALITY & CAPITAL ALLOCATION

Promoter Background: Mr. Keyur Shah (CMD) founded YASHHV in 2002 and has led it through consistent profitable growth. Team includes Mr. Nirav Patel and Mr. Darshan Thakkar (Executive Directors) and Mr. Sumit Poddar (CFO). Promoter holding: 57.94% post-IPO; ZERO pledging.

Capital Allocation: Pre-IPO: minimal debt, self-funded capex from accruals — a POSITIVE. IPO: 100% fresh issue (no OFS); proceeds deployed as stated for RIP plant. Sukrut Electric JV (Rs. 5.24 Cr) is modest and strategically sound. No unrelated diversification.

Dividend Policy: Variable. FY21: 67%; FY22: 30%; FY23: 29%; FY24: 0% (IPO prep); FY25: 13%. Growth reinvestment phase — dividend not the investment case.

Governance: Cyber fraud of Rs. 2.10 Cr (Apr 2026) — disclosed promptly; financially immaterial. SME listing has lower disclosure requirements than mainboard; track BSE filings actively. No significant RPTs noted. Overall: MODERATE-HIGH quality management.

SECTION 6 — FINANCIAL DEEP-DIVE (Standalone, Rs. Cr)

Income Statement

P&L; (Rs. Cr)	FY23A	FY24A	FY25A	TTM	FY26E	FY27E
Revenue	90	108	150	193	210	285
YoY Growth	38.5%	20%	38.9%	78.5%	40%	35.7%
EBITDA	19	22	32	42	46	65
EBITDA Margin	21.1%	20.4%	21.3%	21.8%	21.9%	22.8%
Other Income	0	1	2	4	3	4
Interest	1	2	3	4	4	5
Depreciation	2	2	3	4	5	7
PBT	16	18	28	38	40	57
Tax Rate	30%	31%	24%	24%	25%	25%
PAT	11	12	21	29	30	43
EPS (Rs.)	37.1*	40.1*	7.50	10.17	10.7	15.4

* Pre-IPO EPS on smaller share count (Eq. Cap Rs. 3 Cr vs Rs. 14 Cr post-IPO); not comparable YoY. FY26E/FY27E = estimates. Source: Screener.in.

Balance Sheet

Balance Sheet (Rs.Cr)	FY22A	FY23A	FY24A	FY25A	Sep25	FY26E
Equity Capital	3	3	3	14	14	14
Reserves	21	29	39	133	145	160
Borrowings	7	8	7	23	28	35
Other Liabilities	11	19	22	32	31	40
Total Assets	43	59	71	203	218	249
Fixed Assets	14	17	18	41	50	75
CWIP	0	0	5	8	12	20
Other Assets	28	42	47	154	156	154

Cash Flow Statement

Cash Flow (Rs.Cr)	FY21A	FY22A	FY23A	FY24A	FY25A
Cash from Operations	7	7	9	14	9
Cash from Investing	-3	-10	-4	-9	-84
Cash from Financing	-2	3	-5	-5	97
Net Cash Flow	2	0	0	0	22
Free Cash Flow (FCF)	4	1	5	1	-29
CFO / EBITDA %	112%	76%	75%	87%	49%

Key Ratios

Ratios	FY21A	FY22A	FY23A	FY24A	FY25A
Debtor Days	66	53	66	42	68
Inventory Days	193	130	126	143	138
Days Payable	132	81	110	103	93
Cash Conv. Cycle	127	102	82	82	112
Working Capital Days	68	45	47	45	45
ROCE %	52%	48%	45%	28%	28.5%

Commentary: 32% revenue CAGR and 35% PAT CAGR (FY22-FY25). EBITDA margins stable at 20-22%, reflecting pricing power. ROCE dipped from 45% to 28% in FY24-FY25 due to IPO capital deployment and CWIP build — not structural decline. FCF turned negative in FY25 (Rs. -29 Cr) solely from Rs. 84 Cr RIP plant capex, funded by IPO proceeds (Rs. 97 Cr financing inflow). Debt low at Rs. 27.6 Cr (D/E 0.17x); interest coverage 10.7x.

SECTION 7 — EARNINGS QUALITY CHECKLIST

Criterion	Rating	Observation	Comment
Revenue Recognition	GREEN	B2B, delivery-based	Government/PSU buyers; no channel stuffing risk.
Receivables vs Revenue	AMBER	Debtor days rose to 68 FY25	Up from 42 in FY24; manageable given PSU customer base.
CCC Trend	AMBER	CCC widened to 112 in FY25	From 82 in FY23-24. Inventory build for new plant; will normalise.
Contingent Liabilities	GREEN	Rs. 0.50 Cr	Negligible vs Rs. 203 Cr balance sheet. No significant litigation.
Auditor / Tenure	GREEN	Statutory audit compliant	No auditor red flags noted.
RPTs as % Revenue	GREEN	No significant RPTs	No related-party concentration risk visible.
Other Income / PBT	GREEN	Rs. 2 Cr / Rs. 28 Cr = 7%	Low; core operations drive earnings. No earnings inflation.
Tax Rate Consistency	AMBER	Dipped from 30% to 24% FY25	New tax regime. Monitor for sustained 24-25% level.

Summary: Earnings quality is broadly GOOD. Two Amber flags (receivables, CCC) are growth-stage and explained by RIP plant inventory build and PSU credit terms. Tax rate normalising at 24-25%. No material governance concerns.

SECTION 8 — VALUATION

Peer Context (Screener.in, 23 Apr 2026): YASHHV trades at 63.8x TTM P/E and 39.4x EV/EBITDA — a premium to TARIL (36.3x / 22.3x) and Voltamp (~27x). Premium is justified by higher ROCE (28.5% vs TARIL 23.3%), dominant niche with no direct listed peer, and faster growth (38.9% FY25 revenue vs TARIL 22%). Screener Forward PE of 33.0x implies FY27E EPS ~Rs. 19.7 — achievable if RIP plant ramps as guided.

Method 1 — DCF: FY25 PAT Rs. 21 Cr, 35% CAGR for FY26-28, tapering to 25% for FY29-30, terminal growth 5%, WACC 12%. Implied equity value ~Rs. 2,100-2,200 Cr → per share Rs. 750-786.

Method 2 — P/E Multiple: Conservative FY27E EPS Rs. 15.4 at 40x → Rs. 616. Consensus FY27E EPS ~Rs. 19.7 at 38x → Rs. 749.

Blended Target: Rs. 765 (12-month). Blend of DCF (Rs. 768) and P/E-based (Rs. 749-786). Upside: +17.8% from CMP Rs. 649. Rating: **ACCUMULATE**. Entry on dips to Rs. 580-620 improves IRR meaningfully.

Scenario Analysis

Scenario	Rev FY27E	PAT FY27E	EPS FY27E	P/E Multiple	Target (Rs.)
BULL	350	63	22.5	45x (full ramp)	1,013
BASE	285	43	15.4	40x (moderate)	765
BEAR	220	30	10.7	30x (delay risk)	321

Bull: RIP plant ahead of schedule; strong export. Bear: RIP plant delayed 12+ months.

SECTION 9 — KEY RISKS

Risk	Description	Probability	Impact	Monitor
RIP Plant Execution	Delay/overrun on Gujarat greenfield beyond H2 FY27.	MEDIUM	HIGH	Quarterly CWIP additions; mgmt guidance.
Customer Concentration	Top 5 customers >50% revenue; PSU tender loss is material.	MEDIUM	HIGH	Revenue diversification; export adds.
TARIL Backward Integration	TARIL launched 245kV HV bushings Feb 2025; scaling risk.	LOW-MED	MEDIUM	TARIL in-house bushing capacity ramp.
Import Competition (China)	Chinese OIP bushings price-competitive at lower voltage.	MEDIUM	MEDIUM	OIP market share trend; import duty changes.
Cyber / Fraud Risk	Rs. 2.10 Cr cyber fraud reported Apr 2026.	LOW	LOW-MED	Controls disclosures; repeat incidents.
SME Listing Liquidity	Low float; high impact cost for institutional investors.	HIGH	MEDIUM	Mainboard migration timeline.
Power Sector Policy Risk	Slowdown in T&D; capex; DISCOM financial stress.	LOW	HIGH	Government capex budget announcements.

SECTION 10 — FINAL RECOMMENDATION

Parameter	Detail	Level	Comment
Rating	ACCUMULATE	Conviction: MODERATE	Premium valuation; strong structural thesis; accumulate on dips.
12M Price Target	Rs. 765	+17.8% from CMP	Blend of DCF (Rs. 768) and 38x consensus FY27E EPS (Rs. 749).
Entry Zone	Rs. 580-650	Preferred entry	CMP at top of zone; dips below Rs. 620 improve IRR materially.
Investment Horizon	12-18 months	Medium-term	RIP plant catalyst in H2 FY27; hold through plant ramp.
Investor Profile	Aggressive Growth	High Risk Tolerance	SME-listed, illiquid, high growth — not for conservative accounts.

#	Thesis Invalidation Trigger	Implication
1	RIP plant delay beyond Q3 FY28	Revenue guidance pushed out; re-rate to 30x FY27E EPS → ~Rs. 321.
2	EBITDA margin below 18% for two consecutive halves	Moat erosion in OIP; competitive pressure signals REDUCE.
3	Promoter pledge appears or holding falls below 50%	Alignment risk; governance red flag — EXIT.

CALL GRADE: POSITIVE

Signal	Status	vs Expectation	Implication
Result Quality	Strong	Beat (+79% YoY rev.)	Clean beat; no exceptional items distorting earnings.
Management Tone	Bullish	Right time, right place	Confident; no hedging on 2-3 year demand outlook.
Guidance Delta	Maintained	35% CAGR maintained	Rs. 600-700 Cr target confirmed; order book upgraded to Rs. 300+ Cr.

STRONGLY POSITIVE | POSITIVE | NEUTRAL | CAUTIOUS | NEGATIVE

TO MY BOSS

H1 FY26 (Apr-Sep 2025) was a clean, operationally-driven beat — revenue +79% YoY to Rs. 102 Cr, EBITDA +110% to Rs. 23 Cr, PAT +119% to Rs. 14 Cr — no exceptional items, no one-off gains. EBITDA margin held at 21-22%, confirming structural pricing power in a near-monopoly niche; the RIP/RIS segment (70% domestic market share) is growing faster than OIP and is margin-accretive. The Rs. 300+ Cr order book gives 2x annual revenue coverage and directly supports our Rs. 210 Cr FY26E estimate. The key multi-bagger catalyst remains the Gujarat RIP plant — management guided end-FY26 readiness, H2 FY27 commercial production; CWIP is tracking well (Rs. 12 Cr Sep-25 vs Rs. 8 Cr Mar-25). Near-term watch item: FY26 full-year results (Mar 2026) and first quarterly update on plant commissioning. The cyber fraud of Rs. 2.10 Cr (Apr 2026) is financially immaterial but signals control weaknesses at an SME scale. Valuation at 63.8x TTM is expensive in absolute terms, but 33x forward PE (consensus FY27E) is reasonable if the RIP ramp delivers on schedule. ACTION: ACCUMULATE at current levels; OVERWEIGHT below Rs. 620; review if plant delays emerge.

C1 — FINANCIAL PERFORMANCE SNAPSHOT | H1 FY26 (Apr-Sep 2025)

Metric	H1 FY26A	H1 FY25A	YoY %	H2 FY25A	HoH %	Verdict
Revenue (Rs. Cr)	102	57	+78.9%	93	+9.7%	Beat — strong execution
EBITDA (Rs. Cr)	23	11	+109%	21	+9.5%	Beat — margin stable
EBITDA Margin %	22.5%	19.2%	+330bps	22.6%	-10bps	In-line — band maintained
PAT (Rs. Cr)	14	6	+133%	15	-6.7%	Beat — clean earnings
EPS (Rs.)	4.91	2.89	+70%	5.26	-6.7%	Beat (FV Rs. 5)

C2 — SEGMENT / GEOGRAPHY BREAKDOWN | H1 FY26

Segment	Revenue (Rs.Cr)	YoY %	Trend	Commentary
OIP Condenser Bushings	~68 (est.)	+65%	Growing	Core product; 37.5% dom. market share; PSU demand strong.
RIP/RIS Condenser Bushings	~24 (est.)	+130%	Accelerating	70% mkt share; 3,425 units FY25; key margin driver.
Retrofit / Repair Services	~8 (est.)	+25%	Stable	Recurring; 500 retrofits FY25 vs 250 FY24.
Exports (in above)	Included	Growing	Expanding	60+ countries; Weidmann/Electrolink/ESFP USA new channels.

Segment revenues are estimates; YASHHV does not publish formal segment P&L; as an SME-listed entity.

C3 — MANAGEMENT COMMENTARY THEMES

Theme	What They Said	Our Read	Tag	Tone
Demand Outlook	'Right time, right place; no slowdown for couple of years'	Bullish; aligned with OEM commentary.	[GUIDANCE]	Transparent
Revenue Target	Rs. 600-700 Cr in 2.5-3 yrs from OIP+RIP facilities	4x FY25. Achievable at 35% CAGR.	[GUIDANCE]	Bullish
RIP Plant Status	Ready end FY26; commercial production H2 FY27	Critical. CWIP tracking.	[GUIDANCE]	Transparent

Theme	What They Said	Our Read	Tag	Tone
Order Book	Rs. 300+ Cr order book; 1.5-2 yr execution	2x revenue coverage. Underpins FY26-27E.	[GUIDANCE]	Bullish
Sukrut JV	50% stake with Quality Power; Rs. 5.24 Cr; vertical integration	Modest bet. Quality Power validates.	[STRATEGY]	Transparent
Global Expansion	Weidmann (Europe/N.Africa); Electrolink UK; ESFP USA	Distribution groundwork for export ramp.	[STRATEGY]	Bullish
Capacity Expansion	6,000 to 10,000 bushings/yr; 125 type-tested products (vs 10)	12.5x product expansion — widens voltage range.	[OPS]	Transparent

C4 — OPERATING & BUSINESS METRICS

Metric	FY25	FY24	FY23	Trend / Comment
Annual Production Capacity (Bushings)	10,000	6,000	N/A	67% capacity expansion YoY.
Cumulative Installations (Global)	40,000	35,000	N/A	5,000 net adds in FY25.
Type-Tested Products (Count)	125	10	N/A	12.5x expansion — key for voltage range.
RIP/RIS Bushings Supplied (up to 245kV)	3,425	2,250	N/A	+52% YoY. Growing faster than OIP.
Domestic OIP Market Share	37.5%	N/A	N/A	Stable dominant position.
Domestic RIP Market Share	70.0%	N/A	N/A	Near-monopoly in higher-value segment.
Global Footprint (Countries)	60	60	N/A	Stable count; deepening relationships.
Bushings Retrofitted	500	250	N/A	Recurring revenue stream; doubling YoY.
Trade Receivable Turnover (x)	7.45	7.49	N/A	Stable at ~7.5x; healthy velocity.

C5 — MARGIN DRIVERS

Driver	Impact (bps)	Recurring?	Comment
RIP/RIS mix shift (+ve)	+100-150 bps	Yes — structural	RIP better margin than OIP. Growing share expands EBITDA%.
Operating leverage	+80-120 bps	Yes — as volumes grow	Fixed overheads spread over 79% higher revenue base.
Retrofit / service revenue	+30-50 bps	Yes — recurring	Higher-margin annuity stream; growing at 2x.
Raw material costs	Neutral/mild neg	Recurring risk	Kraft paper, oil, resin. No sharp escalation disclosed.
New plant depreciation (FY27+)	-100-150 bps	One-time ramp	RIP plant depreciation suppresses PAT margin in FY27 ramp year.

C6 — GUIDANCE & FORWARD SIGNALS

Metric	Prior Guidance	Current Guidance	Delta	Credibility
Revenue CAGR (3-yr) [GUIDANCE]	35%	35% maintained	No change	High
Revenue Target (2.5-3 yrs) [GUIDANCE]	Rs. 600-700 Cr	Confirmed	No change	High
RIP Plant Readiness [GUIDANCE]	End FY26	End FY26 — on track	On track	Medium
Commercial Production [GUIDANCE]	H2 FY27	H2 FY27 confirmed	On track	Medium
Order Book [GUIDANCE]	Rs. 200+ Cr	Rs. 300+ Cr — upgraded	Increased	High

C7 — CAPITAL ALLOCATION

Item	Amount (Rs.Cr)	vs Prior Year	Comment
Capex (RIP Plant + Infra)	Rs. 84 Cr (FY25)	Up from Rs. 9 Cr FY24	IPO-funded; largest single capex. CWIP tracking well.
Dividends (FY25)	~Rs. 2.7 Cr	Resumed after nil FY24	13% payout ratio; growth-first phase.
Sukrut Electric JV (50%)	Rs. 5.24 Cr	New investment	JV with Quality Power; vertical integration.

Item	Amount (Rs.Cr)	vs Prior Year	Comment
Working Capital	Increased	CCC widened 82->112 days	Inventory build for RIP plant; normalise post-ramp.
Net Debt Movement	Rs. +16 Cr (FY25)	Borrowings +Rs. 16 Cr	Modest; D/E remains conservative at 0.17x.

C8 — Q&A; HEAT MAP | H1 FY26 Earnings Call (15 Oct 2025)

#	Analyst	Question	Mgmt. Answer	Tone
1	Investor	Revenue target Rs. 600-700 Cr — timeline and basis?	From OIP + RIP facilities in 2.5-3 years at 35% CAGR. Order book Rs. 300 Cr supports.	Transparent
2	Investor	RIP plant production start?	Plant ready end FY26; commercial production H2 FY27. Construction in advanced stage.	Transparent
3	Investor	Sukrut Electric JV details?	50% stake with Quality Power for Rs. 5.24 Cr; transformer component integration; Darshan Thakkar on Sukrut board.	Transparent
4	Investor	Power sector demand outlook?	CMD Keyur Shah: 'Right time, right place; no slowdown for transformer market for couple of years.'	Bullish
5	Investor	Export expansion — US, Europe contribution?	ESFP USA launched; Weidmann (Eur/N.Africa); Electrolink UK. Export contribution expected to grow materially.	Balanced

Dodged Questions: (1) Specific FY26 PAT margin guidance — not provided. (2) Competitive response to TARIL's 245kV bushing launch — not directly addressed.

C9 — RISKS FLAGGED ON THE CALL

Risk	Flagged By	Probability	Impact	Timeline
RIP plant execution	Analyst Q	Medium	High	H2 FY27 commercial production target
Export macro slowdown	Mgmt. implicit	Low	Medium	US entry; European expansion; macro sensitivity
Raw material inflation	Not flagged	Medium	Medium	Kraft paper, transformer oil pricing
Cyber fraud	BSE disclosure	Low	Low	Apr 2026 incident; Rs. 2.10 Cr; financially immaterial

C10 — ANALYST VERDICT & MULTI-BAGGER SCORECARD

Multi-Bagger Scorecard	Status	Rationale
Revenue Visibility	Intact	Rs. 300 Cr order book = 2x annual revenue; 35% CAGR reiterated.
Margin Trajectory	Intact	21-22% EBITDA band steady; RIP mix shift structurally accretive.
Capital Allocation Quality	Intact	IPO deployed as stated; no diversification; modest JV only.
Competitive Moat	Intact	70% RIP share; 125 type-tested products; 60-country footprint.
Management Credibility	Intact	Founder-led; zero pledge; transparent; IPO guidance on track.
Valuation Comfort	Weakened	63.8x TTM P/E expensive; comfort only on forward 33x (FY27E).

Conviction Call	P/E (TTM)	EV/EBITDA	ROCE vs 5Y Avg	Forward P/E vs Target
UNCHANGED	63.8x	39.4x	28.5% vs ~42% (5Y)	33x vs 38x target → ACCUMULATE

Source: Screener.in | Ticker: YASHHV | View: Standalone | Transcript: Accessible (yashhv.com investor portal — Earnings Call H1 FY26) | Concall Date: 15 October 2025 | Report Date: 23 April 2026
