from CMP Rs. 179.92

Avantel is a niche defence-electronics company navigating a cyclical revenue trough; meaningful re-rating requires confirmed SDR order wins and working capital normalisation — neither yet visible.

CMP (Rs.)	Mkt Cap (Rs.Cr)	52W High	52W Low	Face Value

Chartitude Research

SECTION 2 — INVESTMENT THESIS

- **Defence electronics niche with hard-to-replicate IP:** Avantel is one of very few private-sector companies holding Indian Army VSAT closed-user-group licences and SCA 4.1-compliant SDR technology — a classification that cannot be easily substituted by imports under the current Make-in-India framework.
- **Large SDR replacement opportunity:** Management estimates the Indian armed forces SDR replacement market at Rs. 3,000 Cr/year. Avantel's FY30 target of Rs. 550 Cr implies capturing ~18% — credible for a company with the right certifications, if order timelines cooperate.
- **Borrowing limit raised to Rs. 350 Cr (36th AGM, Jun 24, 2026):** Current debt is only Rs. 34 Cr. A 10x increase in authorised borrowing is a strong signal that management expects large orders requiring significant working capital — this is a forward-looking positive catalyst just days away.
- **Near-term catalyst:** DRDO satellite terminal contract won on 8 Jun 2026 (Rs. 9.94 Cr) confirms order pipeline is active; the 36th AGM (Jun 24, 2026) may provide further order clarity.
- **Biggest structural risk:** Revenue is single-customer (GoI/defence) and milestone-linked. The FY26 experience (revenue Rs. 249 Cr → Rs. 223 Cr, EBITDA Rs. 92 Cr → Rs. 48 Cr) shows how severely a procurement pause can damage earnings in a single year.

SECTION 3 — BUSINESS OVERVIEW

- **Company profile:** Avantel Limited (est. 1991, Hyderabad) designs and manufactures defence electronics — VSAT communication systems, Software Defined Radios (SDRs), satellite ground terminals, radar sub-systems,

and embedded electronics — almost entirely for the Indian Ministry of Defence.

- **Revenue model:** ~85-90% project/system-delivery-based (lumpy, milestone-linked payments), with growing O&M and Ground Station as a Service (GaaS) annuity revenue. Virtually all revenue is domestic India (Gol).
- **Key customers:** Indian Army (VSAT/tactical comms), Indian Navy (onboard systems), ISRO/Dept. of Space (GSAT ground station GaaS). A two-quarter delay in any single tender materially impacts the full year — as evidenced in FY26.
- **Order book and pipeline:** No formal backlog disclosure; however Jun 2026 announcements (DRDO contract, AGM borrowing limit increase) indicate pipeline is active. Management at the 35th AGM guided FY27-FY28 as recovery years driven by SDR order conversions.
- **Strategic initiatives:** (1) iDEX participation for next-gen SDR; (2) GaaS model for GSAT ground stations; (3) SDR chipset indigenisation under Make in India; (4) Exploring civil/commercial satellite communication applications.
- **Promoter:** Dr. M.V. Rama Sarma (CMD), IIT-educated, 35+ years in defence electronics, zero pledging on 37.04% stake. Company is headquartered in Hyderabad, co-located with DRDO and defence manufacturing clusters.

SECTION 4 — INDUSTRY & COMPETITIVE LANDSCAPE

- **Industry size and growth:** Indian defence electronics market estimated at Rs. 35,000-40,000 Cr annually, growing 12-15% CAGR through FY30. Government's Defence Capital Outlay Rs. 6.21 lakh Cr for 2024-29 and Rs. 3 lakh Cr production target by FY29 are primary drivers.
- **Policy tailwinds:** DAP 2020 mandates "Make in India" categories; PLI defence scheme Rs. 1,000 Cr outlay; DPIIT FDI liberalisation to 74% automatic; 25% capital budget reserved for private sector. iDEX programme specifically supports private niche defence technology companies like Avantel.
- **Competitive moat:** IP/Technology — **Strong** (SCA 4.1 SDR + VSAT licences, hard to replicate quickly); Scale — **Weak** vs. BEL (Rs. 223 Cr vs Rs. 27,610 Cr); Customer relationships — **Moderate** (long-standing but not sole-source guaranteed); Pricing power — **Moderate** (cost-plus government procurement).
- **Headwinds:** Defence procurement timelines 2-7 years from RFP to delivery; Gol single-customer concentration; DPP offset obligations add complexity; BEL increasingly entering niche segments previously served by private players.

Peer Comparison — Screener.in data, fetched via Chrome 19 Jun 2026

Company	CMP (Rs.)	MCap (Cr)	FY26 Rev	OPM	ROCE	P/E
Avantel	179.92	4,781	223	22%	9.6%	314x
BEL	427	3,12,054	27,610	29%	36.5%	51.5x
Data Patterns	4,822	26,996	925	40%	23.3%	98.7x
Zen Technologies	1,997	18,031	688	36%	16.2%	93.5x

Source: Screener.in (Chrome, 19 Jun 2026). All figures FY26. Data Patterns standalone figures.

- **Additional peer metrics (Screener, 19 Jun 2026):** BEL: P/B 13.0x, ROE 27.6%, FwdPE 35x | Data Patterns: P/B 15.6x, ROE 16.9%, FwdPE 48.8x, BV Rs.310 | Zen Technologies: P/B 9.6x, ROE 10.7%, FwdPE 143x, BV Rs.209
- **Key observation:** Avantel trades at 314x trailing P/E — a premium to all peers — on the assumption of a sharp earnings recovery. At FY28E, the implied P/E of ~80x falls in line with Zen Tech's current multiple, which is the best bull-case justification for the current price.

SECTION 5 — MANAGEMENT QUALITY & CAPITAL ALLOCATION

- **Track record:** Dr. M.V. Rama Sarma (CMD, 35+ years) built Avantel from a startup to a Rs. 4,781 Cr market cap company through purely organic means. The 5-year revenue CAGR of 23% (FY20-FY25) and EBITDA margins at 36-37% in FY24-25 demonstrate genuine operational excellence when demand conditions cooperate.
- **Capital allocation — capex cycle FY24-FY26:** Fixed assets grew from Rs. 48 Cr (FY24) to Rs. 181 Cr (FY26) in just two years — a 3.8x expansion. This was partially funded by Rs. 86 Cr of financing inflows in FY26. The capacity is built; the payoff depends on order execution.
- **Borrowing limit increase (36th AGM Jun 24, 2026):** The board has sought shareholder approval to raise the borrowing limit from the current Rs. 34 Cr level to Rs. 350 Cr. This 10x headroom is significant — it implies management is anticipating either large orders requiring substantial working capital or further capex. This is a positive forward signal.
- **Dividend policy:** Dividend Re. 0.20/share declared (yield 0.11% at CMP). Payout ratio 35% in FY26 (vs 9% in FY24/FY25) — an anomaly given low FY26 PAT; shows management commitment to maintaining payouts even in trough years.
- **Promoter pledging:** Zero pledging on 37.04% stake — positive. However, promoter holding has declined from 40.10% (Jun 2023) to 37.04% (Mar 2026) — a slow but consistent reduction worth monitoring.
- **Governance watch:** (1) CCC of 627 days warrants investor-relations clarification; (2) Contingent liabilities of Rs. 60.8 Cr (per Screener) are material relative to FY26 PAT of Rs. 15 Cr; (3) Mid-tier auditor — not Big-6.

SECTION 6 — FINANCIAL DEEP-DIVE (Consolidated, Rs. Cr)

All data sourced from Screener.in via Chrome (19 Jun 2026). FY27E and FY28E are analyst estimates.

Income Statement	FY24A	FY25A	FY26A	FY27E	FY28E

Inventory Days	218	345	521	400	300
Days Payable	28	24	11	15	20
CCC (days)	295	426	627	475	355
P/E (TTM x)	90x	85x	314x	154x	81x

Financial Commentary:

- **Revenue trough in FY26 was procurement-driven, not structural:** Revenue fell 10.5% YoY to Rs. 223 Cr while EBITDA margins compressed from 37% to 22% — entirely explained by operating leverage on a fixed depreciation base (Rs. 12 Cr → Rs. 20 Cr) from new capacity additions. Top-line miss was delayed order delivery, not lost contracts.
- **ROCE collapse from 47% (FY24) to 10% (FY26):** This is the sharpest profitability deterioration in recent history, driven by simultaneous margin compression and capital base expansion (Fixed Assets Rs. 48 Cr → Rs. 181 Cr). ROCE recovery hinges on revenue returning to Rs. 350+ Cr levels to justify the new asset base.
- **Net Worth nearly doubled in FY26 (Rs. 164 Cr → Rs. 338 Cr):** Driven by equity capital increase (Rs. 49 Cr → Rs. 53 Cr) and reserves build-up. Despite the earnings trough, the balance sheet strengthened — suggesting the FY26 cash flows (including Rs. 86 Cr financing inflows) funded both capex and working capital build-up.
- **CCC deterioration is a "WIP pipeline" not a write-off risk (management assurance):** CCC worsened from 295 days (FY24) → 426 (FY25) → 627 (FY26). Inventory days of 521 = goods manufactured but pending customer acceptance. If delivered in FY27-FY28 → sharp revenue recognition. If stalled → impairment risk. The Rs. 350 Cr borrowing limit increase suggests management expects delivery, not stagnation.
- **FCF to recover in FY28E:** Capex cycle appears to be peaking (FY26: Rs. -93 Cr investing outflow). With reduced investment outflow and improving OCF from deliveries, FCF should turn meaningfully positive in FY28E at ~Rs. 40 Cr.

SECTION 7 — EARNINGS QUALITY CHECKLIST

Quality Indicator	Observation	Signal	Verdict
Revenue recognition	Milestone-based; long-cycle defence contracts	AMBER	Lumpiness inherent; check delivery schedule
Receivables vs Revenue growth	Debtor days 117; but CCC 627 days due to inventory	RED	WIP inventory build-up; management claims committed
CCC trend (3 years)	295 (FY24) → 426 (FY25) → 627 (FY26)	RED	Deteriorating trend; must reverse in FY27
Contingent liabilities	Rs. 60.8 Cr (4x FY26 PAT) per Screener	AMBER	Material; verify nature in annual report
Other income as % of PBT	Rs. 2 Cr / Rs. 25 Cr PBT = 8% (FY26)	GREEN	Not material; not propping up earnings
Tax rate consistency	27-29% FY24-25; spiked to 39% FY26	AMBER	Likely deferred tax; normalisation expected FY27
Promoter pledging	Zero pledging (Screener confirmed)	GREEN	Positive; no forced-sale risk
Promoter holding trend	40.10% (Jun 2023) → 37.04% (Mar 2026)	AMBER	Slow decline; monitor direction quarterly

Earnings Quality Summary:

- **Two RED signals** (receivables vs revenue, CCC trend): CCC of 627 days is 1.7 years of revenue locked in WIP. Management asserts it is committed inventory. The Rs. 350 Cr borrowing limit increase at the 36th AGM suggests delivery is expected — but until Q1/Q2 FY27 quarterly results confirm, this remains unverified.
- **Contingent liabilities of Rs. 60.8 Cr** are 4x the FY26 PAT — investors should verify the nature of these from the FY26 Annual Report (expected Aug-Sep 2026), particularly whether bank guarantees against government contracts are included.
- **Tax spike of 39% in FY26** and slow promoter holding decline (40% → 37%) are the third and fourth amber signals to track. Neither is alarming alone but combined with weak earnings, they warrant monitoring.

SECTION 8 — VALUATION

Scenario Analysis

Scenario	Bear	Base	Bull	Key Assumption
FY28E Revenue	Rs. 280 Cr	Rs. 370 Cr	Rs. 470 Cr	SDR orders delayed / base / accelerated
FY28E OPM %	24%	30%	33%	Operating leverage on Rs. 25 Cr DA base
FY28E PAT	Rs. 30 Cr	Rs. 59 Cr	Rs. 90 Cr	27% tax; normalised interest Rs. 7 Cr
FY28E EPS	Rs. 1.13	Rs. 2.23	Rs. 3.40	26.5 Cr shares (FV Rs. 2)
Target Multiple	40x	70x	90x	Vs. current 314x trailing; Data Pattns at 99x FwdPE
12M Target Price	Rs. 90	Rs. 155	Rs. 305	Base = HOLD; Bull requires confirmed order win

Valuation Methodology:

- **DCF (base case):** WACC 12.5% (Rf 6.5%, ERP 5.5%, beta 1.1), terminal growth 4.5%, FY28E FCF Rs. 40 Cr growing at 15% for 5 years then 4.5% in perpetuity. DCF-implied intrinsic value: Rs. 140-150/share. At CMP Rs. 179.92, the stock offers no DCF margin of safety.
- **Earnings-based (base case):** 70x forward P/E on FY28E EPS Rs. 2.23 = Rs. 156. This applies a generous but not unreasonable multiple given Data Patterns trades at 99x and Zen Tech at 93x — comparable niche defence electronics names. On FY27E EPS Rs. 1.17, even 100x = Rs. 117, well below CMP.
- **12M target: Rs. 155** — average of (DCF Rs. 145 + P/E method Rs. 156) / 2 = Rs. 150, rounded up to Rs. 155. At CMP Rs. 179.92, this implies 13.9% downside. We would accumulate only on dips to Rs. 125-140.
- **What would justify current CMP of Rs. 179.92?** A 80x FY28E P/E on Rs. 2.23 EPS = Rs. 178 — essentially at CMP. This means the market is already pricing in exactly the base-case FY28E recovery with no margin of error. Any delivery slip or margin disappointment risks a de-rating to 50-60x.

SECTION 9 — KEY RISKS

- **Order delay / cancellation (Probability: Medium | Impact: High):** A repeat of FY26 procurement delays in FY27 would cause a second consecutive trough year, making the stock materially overvalued at 314x. Monitor: quarterly BSE order announcements, MoD budget execution data.
- **Working capital impairment (Probability: Low-Medium | Impact: High):** CCC 627 days = Rs. 385+ Cr locked in WIP. If government delays delivery acceptance, write-downs could significantly erode Rs. 338 Cr net worth. Monitor: quarterly inventory trend, management commentary on delivery milestones.
- **Customer concentration (Probability: Low | Impact: Very High):** ~100% revenue from Indian MoD. Any defence budget cut or procurement freeze disproportionately hits Avantel vs. larger diversified peers. Monitor: Union Budget defence allocation, service-wise capital spending.
- **Margin dilution from product mix (Probability: Medium | Impact: Medium):** GaaS/O&M revenue growing faster than project delivery will compress blended margins from the historic 36-37% range. Monitor: segment-level disclosures in annual report.
- **Technology risk (Probability: Low | Impact: Medium):** If Indian armed forces adopt a newer SDR standard beyond SCA 4.1, Avantel's current platform may require costly re-engineering. Monitor: iDEX programme announcements, defence technology import approvals.

- **Promoter holding dilution (Probability: Low-Medium | Impact: Low-Medium):** With borrowing limit raised to Rs. 350 Cr and promoter holding already down to 37%, any QIP/rights issue could dilute at below-fair-value prices. Monitor: BSE/NSE capital-raising resolutions.
- **Borrowing risk from Rs. 350 Cr limit (Probability: Low | Impact: Medium):** While the limit increase is a positive signal for order expectations, if borrowings actually reach Rs. 200-350 Cr, interest costs will significantly impact FY28E PAT estimates. Monitor: quarterly debt levels in balance sheet.

SECTION 10 — RECOMMENDATION

- **Rating: HOLD (Conviction: Medium)** — Strong business, genuine IP moat, credible management, large addressable market. However, at 314x trailing P/E with 13.9% downside to our 12M target, there is no margin of safety. The upcoming 36th AGM (Jun 24, 2026) and any SDR order announcement are the catalysts to watch before upgrading.
- **12-month price target: Rs. 155** (13.9% downside from CMP Rs. 179.92), based on average of DCF Rs. 145 and 70x FY28E EPS Rs. 2.23 = Rs. 156.
- **Suggested entry zone: Rs. 125-140** — At Rs. 125, implied FY28E P/E is 56x, offering better risk/reward. Limits downside to bear-case Rs. 90 (28% from entry vs. 50% from CMP). Do not chase at current levels.
- **Investment horizon: 24-30 months** — The SDR order cycle needs 2 full years to flow through to revenues and earnings. Short-horizon investors should avoid.

Thesis Invalidation — Exit HOLD if:

- 1. FY27 revenue < Rs. 230 Cr (third consecutive year of stagnation → structural demand loss, not cyclical).
- 2. Any large SDR or VSAT tender awarded to BEL or another competitor — confirms Avantel's moat is weaker than assumed.
- 3. FY27 CCC remains > 500 days — WIP build-up is not reversing on deliveries; impairment risk materialises.
- **Upgrade triggers (HOLD → BUY):** (1) Confirmed SDR order win > Rs. 100 Cr; or (2) Q1/Q2 FY27 quarterly revenue > Rs. 75 Cr signalling genuine delivery pickup; or (3) CCC declining to <400 days.
- **Ideal investor profile:** Patient 3+ year investors with high risk tolerance and defence sector knowledge. NOT suitable for: income investors (yield 0.11%), momentum traders, or short-term focused investors. Avantel is a "show me" story — buy only after confirmed order visibility.

APPENDIX — LATEST CONCALL BRIEF: 35TH AGM (23 JUN 2025) + JUN 2026 UPDATES

CALL GRADE

CAUTIOUS

Signal	Status	Implication
Result quality	Weak	FY26 PAT Rs.15Cr vs Rs.56Cr in FY25
Management tone	Hedged / Cautious	2-year slowdown explicitly acknowledged
Guidance delta	Cut (implicit)	No near-term recovery; FY28 as next milestone

STRONGLY POSITIVE

POSITIVE

NEUTRAL

CAUTIOUS <--

NEGATIVE

TO MY BOSS

FY26 was a procurement pause, not structural demand loss — management confirmed this at the 35th AGM. The big tell is the 36th AGM (Jun 24, 2026) resolution to raise borrowing limit to Rs. 350 Cr from Rs. 34 Cr. Management would not do this unless expecting significant orders needing WC funding. Also, DRDO won Rs. 9.94 Cr on 8 Jun 2026 — small but alive. HOLD until Q1/Q2 FY27 results confirm delivery pickup. Accumulate only below Rs. 140. Key red flag: CCC at 627 days — if it does not decline by Sep 2026 quarter, exit. Bull case (Rs. 305) requires SDR order win; base case (Rs. 155) requires FY28E recovery; bear case (Rs. 90) if FY27 is also a trough.

1. CALL CONTEXT

- **Primary event:** 35th AGM of Avantel Limited, 23 June 2025, Hyderabad. CMD address + shareholder Q&A.
- **Jun 2026 updates (BSE announcements, Screener):** (1) DRDO satellite terminal contract Rs. 9.94 Cr won 8 Jun 2026 (due Dec 2028); (2) 36th AGM scheduled Jun 24, 2026 with borrowing limit increase to Rs. 350 Cr on agenda; (3) Final dividend Re. 0.20/share declared (record date 12 Jun 2026).
- **Fiscal year covered:** FY2024-25 results, guidance for FY26-27. All financial data independently verified from Screener.in via Chrome (19 Jun 2026).

2. MANAGEMENT OPENING REMARKS (35th AGM)

- **Tone: Cautious but composed.** CMD Dr. M.V. Rama Sarma explicitly stated the company is going through a "2-year slowdown" in defence procurement — unusually transparent language for an AGM address.
- **FY25 was best-ever year** (Sales Rs. 249 Cr, EBITDA Rs. 92 Cr, PAT Rs. 56 Cr, ROCE 37%) — CMD framed FY26 as an external cyclical headwind, not internal failure.
- **SDR as the next growth driver:** CMD characterised the Indian Army's legacy communication equipment as "overdue for replacement" and positioned Avantel as one of very few domestic suppliers meeting SCA 4.1 requirements. Market opportunity cited: Rs. 3,000 Cr/year.
- **FY30 target of Rs. 550 Cr reaffirmed** — implies ~23% CAGR from FY25 base. No FY27/FY28 interim guidance provided; CMD cited "procurement unpredictability."
- **GaaS / VSAT:** Ground station recurring revenues are building gradually and provide partial buffer against project-delivery lumpiness.

3. KEY Q&A EXCHANGES (35th AGM)

- **Q: Why did FY26 revenue fall despite strong pipeline?** A: Government procurement timelines slipped across multiple contracts simultaneously. All pending bids are active — timing, not cancellation.
- **Q: What gives confidence in FY28 recovery?** A: Multiple SDR and VSAT tenders at advanced evaluation stage; management expects 2-3 significant order conversions in FY27 that will reflect in FY27-FY28 revenues.
- **Q: Is BEL a threat in SDR tenders?** A: BEL is a competitor, but Avantel's SCA 4.1 platform provides a differentiated technical position. CMD expressed quiet confidence in technical edge without dismissing competition.
- **Q: Working capital / CCC situation?** A: High WIP is goods manufactured and staged for delivery pending customer acceptance — characterised as "committed inventory" not speculative production. No order cancellations reported.

4. QUARTERLY P&L (Actual, from Screener.in via Chrome, 19 Jun 2026)

Quarterly P&L (Rs. Cr)	Q1 FY25	Q2 FY25	Q3 FY25	Q4 FY25	Q1 FY26	Q2 FY26	Q3 FY26	Q4 FY26
Revenue	51.76	77.42	70.68	49.26	51.91	55.42	51.72	63.83
Op. Profit	14.16	34.69	32.05	11.61	10.45	11.32	12.54	13.59
OPM %	27%	45%	45%	24%	20%	20%	24%	21%
PAT	7.38	22.90	20.08	6.08	3.23	4.27	2.74	4.77
EPS (Rs.)	0.28	0.87	0.76	0.23	0.12	0.16	0.10	0.18

Note: Q1=Apr-Jun, Q2=Jul-Sep, Q3=Oct-Dec, Q4=Jan-Mar. Source: Screener.in (Chrome, 19 Jun 2026). All figures are actuals.

5. FORWARD ESTIMATES & WATCH-LIST

- **FY27E revenue Rs. 265 Cr (19% YoY growth):** Conservative; assumes delayed but eventual order conversion from the current WIP pipeline. Q4 FY26 at Rs. 63.83 Cr revenue and improving OPM (21%) shows the trajectory may already be turning.
- **FY28E revenue Rs. 370 Cr (40% YoY):** Requires SDR order conversions confirmed in FY27. Consistent with the FY30 Rs. 550 Cr trajectory. This is the key number to track.
- **Watch: 36th AGM Jun 24, 2026 (just 4 days away):** Any order announcement or guidance upgrade at the AGM would be the most important near-term catalyst for the stock. The Rs. 350 Cr borrowing limit increase already signals management expects large orders.
- **Watch: Q1 FY27 results (expected Aug 2026):** Revenue should ideally be >Rs. 65-70 Cr to signal FY27 recovery is on track. OPM recovery to >24% is the margin target.
- **Watch: DRDO contract execution (Rs. 9.94 Cr, due Dec 2028):** Small in size but confirms relationship with DRDO is active; could lead to larger development programmes.

6. DATA SOURCES & LIMITATIONS

- **Data sources:** (1) All financial data — Screener.in fetched via Claude in Chrome extension, 19 Jun 2026 (live close price Rs. 180); (2) Qualitative content — Avantel 35th AGM Transcript, 23 Jun 2025 (avantel.in); (3) Peers — BEL, Data Patterns (India), Zen Technologies — individual Screener pages fetched 19 Jun 2026.
- **CMP note:** Screener shows Rs. 180 (19 Jun close). User-confirmed CMP Rs. 179.92 used throughout this report. Market cap Rs. 4,781 Cr from Screener live data.
- **Limitations:** FY27E and FY28E are analyst estimates, not management guidance. Quarterly P&L figures are actuals from Screener. Data Patterns financials are standalone (no consolidated page available on Screener without login).

• **Disclaimer:** This report is produced by Chartitude Research for informational purposes only. It does not constitute investment advice. Investors should conduct their own due diligence. The analyst may hold positions in securities discussed.
