⚡ PRIMARY CATALYST — THE REASON IT MOVES NOW

Board meets today, 03 Jun 2026, to consider a fund-raise (equity / debt / warrants / QIP / preferential) — a binary dilution-vs-growth-capital event landing right on top of record Q4 FY26 results and a ~₹1,000 Cr tactical-UAV pipeline.

CATEGORY	QUANTIFIED IMPACT	PROBABILITY	WINDOW
Capital Action (dilution)	A ₹500-800 Cr raise ≈ 12-18% potential dilution vs ₹3,600 Cr m-cap; funds the ₹310 Cr FY27 order book + scale-up	H — board notice already filed	03 Jun 2026 (outcome same day)

Priced in? Partially — the *intent* to raise is known (notice dated), but size, instrument and pricing are NOT. Clean QIP at premium = growth signal; discounted warrants to promoters = overhang. Market is trading the ambiguity. · Source: Exchange board-meeting notice + media, 28 May-03 Jun 2026

BULL

₹950-1,074

Clean QIP at/above CMP, modest dilution; breaks ₹889 high on order-book confidence

BASE

₹790-880

Raise approved, terms digestible; absorbed given record FY26, rangebound near highs

BEAR

₹650-700

Large/discounted raise or warrants → overhang + profit-taking after 48% 1Y run, toward 200-DMA

India's #1 UAV maker just printed its strongest-ever quarter (₹141 Cr rev, ₹60 Cr PAT, 52.6% EBITDA margin) on a defence-drone supercycle — but the stock sits near its 52W high on negative trailing ROE and a 6x book, and a same-day fund-raise decision is the single variable that sets the next 1-4 weeks. Don't chase ahead of the terms.

WHAT THE STREET IS PRICING IN

Coverage is **thin** (small-cap; formal sell-side sparse). Indicative target ~₹895, bull case ~₹1,074 — both assume **FY27 revenue >25%, +200 bps margin, defence-drone re-rating**. **IN the price: the turnaround, record Q4, order momentum, defence theme (+48% 1Y, near 52W high)**. **NOT in the price: fund-raise size/terms & dilution, US-export monetisation, and proof of *sustained* profitability** (trailing ROE still ~2.8%, lumpy order-led revenue).

KEY LEVELS & TRADE FRAME

AVOID

Strong business momentum, but the stock is near its 52W high on a 6x book and negative trailing ROE — with a same-day dilution event whose terms are unknown. Wait for clarity rather than chase. **Flips the call: a clean QIP at/above CMP with modest dilution + continued order conversion** flips this to TACTICAL LONG; a large/discounted raise or promoter warrants confirms AVOID / tactical short.
