

KSH INTERNATIONAL LIMITED

NSE: KSHINTL | BSE: 544664 | Industrials > Cables — Electricals

India's 3rd largest magnet winding wire manufacturer | Largest exporter | HVDC monopoly

ACCUMULATE

12-Month Target: Rs. 1,020 | CMP: Rs. 858 | Upside: ~19%

India's only approved HVDC transformer winding wire supplier, riding the power T&D; capex supercycle with EV traction optionality.

Report Date: 30 June 2026 | Data Source: Screener.in (Standalone)

DIIIs	13.89%	ROE (avg)	21%	20%
Public	6.47%	ROCE (FY26)	21%	—

SECTION 2 — INVESTMENT THESIS

- **HVDC monopoly:** KSH is India's only approved supplier of 400kV HVDC transformer winding wires, giving it exclusive access to every HVDC converter transformer order placed by Indian OEMs. 37 cumulative orders received as at Q3 FY26 (each 12–18 months execution), creating a recurring multi-year earnings tail that no peer can replicate for at least 2–3 years.
- **Capacity doubling by Q4 FY27:** Installed capacity rising from 29,045 MT (FY24) to 59,045 MT (Q4 FY27 target) via the Supa facility. FY26 volume was 28,168 MT on ~80% utilization of the FY25 base — every incremental MT post Supa Phase II drops into a largely fixed-cost base, with interest savings from IPO debt repayment providing an additional Rs. 20–25 Cr annual OPM boost.
- **EV traction wire optionality:** Exclusive license from hpw metallwerk (Germany, Jan 2026) to manufacture peek-insulated round wires for 800V EV traction motors in India — currently immaterial but positions KSH as a

first-mover in a high-margin niche as EV penetration scales over 3–5 years.

- **Near-term catalyst (6–12 months):** Supa Phase II commissioning (Q4 FY27) + HVDC order execution ramp should push the annualized revenue run-rate above Rs. 5,000 Cr and EBITDA above Rs. 300 Cr by FY27-end.
- **Key risk:** Thin EBITDA margins (6.2% FY26) vs peers (Polycab 14%, KEI 10.5%); any sustained copper price spike or buyer pricing pushback could compress OPM below breakeven for earnings growth.

SECTION 3 — BUSINESS OVERVIEW

- **Products:** Insulated rectangular and round magnet winding wires (including Continuously Transposed Conductors) sold under the brand 'KSH' to transformer, motor, railway, EV, and appliance OEMs.
- **Revenue mix (FY26):** Specialized Magnet Winding Wires 75.3% (Rs. 2,187 Cr) | Standard Magnet Winding Wires 24.7% (Rs. 717 Cr). Mix shift toward specialized products is a key margin lever.
- **Manufacturing:** 4 facilities — Chakan-1, Chakan-2 (Pune), Taloja (Raigad), Supa (Ahilyanagar). 43,445 MT installed capacity at FY26-end; Supa Phase II adds 18,000 MT to reach 59,045 MT by Q4 FY27.
- **Exports:** 24 countries including USA, UAE, Germany, Japan — Rs. 590+ Cr in FY25. India's largest winding wire exporter — geographic diversification reduces domestic cycle dependence.
- **Customers:** 122 invoiced OEM customers (FY24). Long qualification cycles (12–18 months for HVDC approval) create meaningful switching costs and revenue stickiness.
- **Market position:** 3rd largest Indian winding wire producer by volume (8.47% domestic share FY24); MD Rajesh Hegde has guided for #2 position post Supa Phase II.
- **IPO & promoter:** Listed December 2025 at Rs. 384 (issue price). Hegde family holds 74.58% with zero pledge. Company founded 1979; 45+ years of OEM relationship depth.

SECTION 4 — INDUSTRY & COMPETITIVE LANDSCAPE

- **Market size:** Indian magnet winding wire market estimated at Rs. 7,000–9,000 Cr, growing 15–20% CAGR driven by power T&D; capex, railway electrification, EV adoption, and industrial motors. KSH's 8.47% share has headroom for expansion as capacity scales.
- **Policy tailwinds:** Government's HVDC inter-regional transmission corridors, DISCOM upgrades, and renewable integration are driving transformer OEM order books to multi-year highs. PLI for EV components creates a long-duration secondary demand vector.
- **Competitive moat:** Technical approvals (Moderate–Strong — HVDC qualification 12–18 months) | Switching costs (Moderate — OEM qualification testing) | Export expertise (Strong — 24-country reach unusual for Indian winding wire producers) | Pricing power (Moderate — cost-plus limits upside) | Scale vs Polycab/KEI (Weak).
- **Primary competition:** Precision Wires India and Vimlesh Industries (both unlisted, dominant). Listed comps in the broader cable space shown below.

Company	CMP (Rs.)	MCap (Cr)	P/E	EV/EBITDA	ROCE%	OPM%
KSH International	858	5,817	52.2x	28.4x	21.4%	6.2%
Universal Cables	1,224	4,245	44.0x	18.7x	13.2%	8.6%
V-Marc India	1,547	3,777	37.7x	19.5x	41.4%	11.2%
KEI Industries	5,452	52,121	N/A	36.7x	22.9%	10.5%
Finolex Cables	1,179	18,035	N/A	18.1x	17.4%	9.8%

Source: Screener.in, fetched 29-Jun-2026. Standalone data.

SECTION 5 — MANAGEMENT QUALITY & CAPITAL ALLOCATION

- **Promoter credentials:** Hegde family has operated in the winding wire business for 45+ years since 1979. Second-generation MD Rajesh Hegde and Director Rohit K Hegde have built the export business and guided the company through the IPO process — a meaningful signal of succession planning readiness.

- **Capital allocation track record:** Pre-IPO growth funded via debt (Rs. 86 Cr FY21 to Rs. 366 Cr FY25). Post-IPO, Rs. 226 Cr of the Rs. 397 Cr raised used to prepay high-cost debt — a rational allocation that reduces the cost of capital and improves CFO quality from FY27.
- **Dividends:** Zero dividend paid across FY21–FY26. Consistent with growth-phase capital requirements. No committed payout ratio post-IPO.
- **Pledge:** 0.00% promoter pledge as at March 2026 — clean balance sheet with no distress signals.
- **ESOP 2025:** Postal ballot June 2026 ratifies ~17 lakh options (~2.5% dilution) — reasonable quantum, aligns key employees with shareholder interests.
- **Governance:** No auditor changes; contingent liabilities Rs. 3.49 Cr (immaterial); credit rating upgraded by CARE Ratings post-IPO (Feb 2026); one minor employee pledge during trading window (noted in FY26 secretarial compliance report — not a material concern).

SECTION 6 — FINANCIAL DEEP-DIVE (Standalone)

Income Statement (Rs. Cr)	FY24A	FY25A	FY26A	FY27E	FY28E
Net Sales	1,383	1,928	3,107	4,200	5,300
YoY Growth (%)	31.8%	39.4%	61.1%	35.2%	26.2%
EBITDA	72	123	192	273	370
EBITDA Margin (%)	5.2%	6.4%	6.2%	6.5%	7.0%
Other Income	8	10	20	18	15
Interest	18	29	44	42	38
Depreciation	11	14	22	30	38
PBT	51	90	146	219	309
Tax (%)	26%	25%	25%	25%	25%
PAT	37	68	110	164	232
PAT Growth (%)	37.0%	83.8%	61.8%	49.1%	41.5%
EPS (Rs.)	6.57*	11.97	16.25	24.20	34.27

*FY24 EPS restated for stock split to comparable basis. FY27E/FY28E are analyst estimates. Actuals from Screener.in.

Balance Sheet (Rs. Cr)	FY24A	FY25A	FY26A
Equity Capital	6	28	34
Reserves	225	270	774
Borrowings	214	366	321
Other Liabilities	38	80	193
Total Liabilities	483	745	1,323
Fixed Assets	140	133	313
CWIP	7	108	52
Investments	0	0	0
Other Assets	336	504	958
Total Assets	483	745	1,323

Cash Flow (Rs. Cr)	FY24A	FY25A	FY26A
Cash from Operations (CFO)	-17	-10	-65
Cash from Investing	-39	-118	-179
Cash from Financing	67	123	306
Net Cash Flow	11	-5	62
Free Cash Flow (FCF)	-57	-130	-228

CFO / Operating Profit (%)	-7%	9%	-17%
Key Ratios	FY24A	FY25A	FY26A
Debtor Days	42	42	39
Inventory Days	39	45	56
Days Payable	4	6	16
Cash Conversion Cycle (days)	78	82	79
Working Capital Days	28	27	39
ROCE (%)	18%	21%	21%

- **Revenue drivers:** 44% revenue CAGR (FY23–FY26) driven by volume growth (17,645 MT FY22 to 28,168 MT FY26) and mix shift toward specialized wires (75.3% of FY26 revenue). Supa Phase II adds 30,000 MT incremental, enabling the next revenue leg.
- **Margin direction:** OPM compressed from 7.8% (Dec-24) to 5.5% (Q4 FY26) due to employee cost surge (+107% YoY in Q4 for Supa staffing), higher depreciation (+57% YoY FY26), and elevated pre-repayment interest (Rs. 44 Cr FY26 vs Rs. 18 Cr FY24). IPO debt repayment of Rs. 226 Cr saves Rs. 20–25 Cr interest annually from FY27.
- **Working capital:** CCC broadly stable (78→82→79 days); inventory days widened to 56 from 39 (Supa ramp build); debtor days improved to 39. Payable days normalizing upward to 16 — positive for WC management.
- **Debt:** Borrowings declined Rs. 366→321 Cr (FY25→FY26) post-IPO repayment; D/E improved to 0.40x. Net debt trajectory improving, though Supa Phase II capex will keep borrowings elevated near-term.
- **FCF quality:** FCF negative across FY24–FY26 (Rs. -228 Cr in FY26). This is growth capex, not earnings quality risk — the FCF cycle should turn positive once Supa is operational and WC stabilizes.

SECTION 7 — EARNINGS QUALITY CHECKLIST

Parameter	Commentary	Signal
Revenue Recognition	Delivery-based OEM billing; no pre-recognition risk	GREEN
Receivables vs Revenue Growth	Debtors days stable/falling (42 to 39); revenue +61% YoY	GREEN
CCC Trend	CCC 78 to 82 to 79 days; minor widening driven by Supa inventory build	WATCH
Contingent Liabilities	Rs. 3.49 Cr — immaterial vs Rs. 192 Cr EBITDA (1.8%)	GREEN
Auditor Tenure / Changes	No auditor changes noted; clean secretarial compliance FY26	GREEN
RPTs as % of Revenue	No significant RPT disclosures in public filings	GREEN
Other Income as % of PBT	Rs. 20 Cr other income = 13.7% of PBT; includes forex + IPO proceeds interest	WATCH
Tax Rate Consistency	25-27% across FY21-FY26; consistent	GREEN
CFO / Operating Profit	Negative CFO for 3 of 4 years; driven by WC build in growth phase	WATCH

- **CFO quality:** Persistent negative operating cash flow (3 of 4 years) is the single biggest technical concern. Context matters — this is a copper-intensive business scaling rapidly where WC requirements grow with revenue. The CFO/OP ratio should normalize once Supa stabilizes and the debt repayment reduces interest outflows.
- **Other income watch:** Rs. 20 Cr other income includes temporary IPO proceeds interest income — not recurring. Excluding this, underlying PBT quality is slightly lower than reported.
- **Clean on earnings manipulation risks:** Revenue recognition, receivable quality, tax rate consistency, and contingent liability profile are all GREEN — no red flags on earnings authenticity.

SECTION 8 — VALUATION

Scenario	PAT (Rs. Cr)	Multiple	Target Price (Rs.)	Upside/Downside
Bear — revenue miss, margin squeeze	110	30x FY27E	660	-23%

Base — as modeled	164	38x FY27E	1,020	+19%
Bull — HVDC beat + margin recovery	200	45x FY27E	1,335	+56%

- **DCF:** WACC 14%, terminal growth 5%, 10-year explicit period with PAT growing from Rs. 164 Cr (FY27E) toward Rs. 500 Cr (FY36E). Implied intrinsic value: Rs. 990–1,050 per share.
- **Earnings multiple:** 38x P/E on FY27E EPS of Rs. 24.20 yields Rs. 919. 42x yields Rs. 1,016. A 38–42x P/E band is appropriate for a company delivering 40–50% PAT CAGR with an exclusive product (HVDC wire) and EV optionality. Average of DCF and earnings multiple = Rs. 1,000–1,020.
- **EV/EBITDA check:** At Rs. 1,020 target, EV ~Rs. 7,300 Cr against FY27E EBITDA Rs. 273 Cr = 26.7x — premium vs Universal Cables (18.7x) but justified by higher revenue growth and HVDC exclusivity.
- **Base-case 12-month target: Rs. 1,020 | +19% from CMP of Rs. 858 | Rating: ACCUMULATE**

SECTION 9 — KEY RISKS

- **Copper price volatility:** Copper = 80%+ of revenue; a sharp spike that cannot be passed on compresses the already-thin 6% OPM. Probability: Medium | Impact: High | Monitor: LME copper spot + quarterly OPM.
- **Structural margin compression:** OPM declined from 7.8% (Dec-24) to 5.5% (Q4 FY26) over 5 quarters. Failure to recover to 6.5%+ by FY27 would break the earnings model. Probability: Medium | Impact: High | Monitor: quarterly OPM vs utilization.
- **HVDC order pipeline slowdown:** India's HVDC rollout timeline depends on government capex and PGCIL tendering. Any delay or competitor qualification would dent the exclusivity narrative. Probability: Low | Impact: High | Monitor: MoP tenders + KSH order book updates.
- **Supa Phase II execution risk:** Concurrent construction with Phase I stabilization. Delays beyond Q2 FY28 would compress the volume ramp underwriting FY27E revenue of Rs. 4,200 Cr. Probability: Low–Medium | Impact: Medium | Monitor: quarterly management guidance.
- **Working capital blow-out / credit tightening:** Four years of negative FCF relying on external financing. A credit market tightening could raise cost of debt and strain the balance sheet. Probability: Low | Impact: Medium | Monitor: quarterly debt + interest coverage (currently 4.35x — adequate).
- **Valuation de-rating:** At 52x TTM P/E, stock is priced for near-perfection. Any earnings disappointment could trigger a 20–30% de-rating. Probability: Medium | Impact: High | Monitor: quarterly P/E vs EPS growth.

SECTION 10 — RECOMMENDATION

- **Rating: ACCUMULATE** — Conviction: Medium. Stock has re-rated sharply post-IPO (+124% from Rs. 384) but earnings trajectory supports continued appreciation. Buy on dips, not at all costs.
- **12-month price target: Rs. 1,020** — 18.9% upside from CMP Rs. 858. Blended DCF (Rs. 990–1,050) and earnings multiple (38–42x FY27E EPS Rs. 24.20).
- **Suggested entry zone: Rs. 780–840** — use market corrections to add. At Rs. 800, stock trades at 33x FY27E — a more comfortable entry for a 40%+ PAT CAGR compounder.
- **Investment horizon: 12–18 months.**
- **Thesis invalidation triggers:**
 1. EBITDA margin sustains below 5.5% for two consecutive quarters — signals structural pricing/cost problem.
 2. Supa Phase II delayed beyond Q2 FY28 — compresses the volume ramp central to FY27E revenue of Rs. 4,200 Cr.
 3. Competitor receives 400kV HVDC transformer wire approval OR HVDC order book falls below 20 active packages — eliminates the exclusivity moat.
- **Ideal investor profile:** Growth-oriented investors with 12–18 month horizon tolerating mid-cap volatility. Not suited for income investors (no dividend) or FCF-purists. Suggested portfolio weight: 2–4% for high-conviction growth portfolios.

APPENDIX — Latest Concall Brief: Q4 & FY26 | May 26, 2026

CALL GRADE: POSITIVE

Signal	Status	Implication
Result quality	Strong	Revenue beat — first Rs. 1,000 Cr quarter; PAT +87% YoY
Management tone	Bullish	MD guided for #2 position in India; confident on HVDC + Supa
Guidance delta	Raised	Capacity target raised to 59,045 MT by Q4 FY27; trajectory intact

STRONGLY POSITIVE | POSITIVE | NEUTRAL | CAUTIOUS | NEGATIVE

TO MY BOSS

Q4 FY26 is a clean beat with no earnings flattery — revenue Rs. 1,018 Cr (+100.5% YoY), PAT Rs. 35 Cr (+87.1% YoY), first Rs. 1,000 Cr quarter; no exceptional items inflating the numbers. The headline OPM of 5.5% looks soft vs the 7.8% Dec-24 peak, but the compression is explained by (a) employee costs doubling as Supa facility was staffed up, (b) interest nearly doubling on pre-repayment debt, and (c) higher depreciation as assets were commissioned. Underlying EBITDA grew 60%+ YoY for FY26 — the operational franchise is compounding. The structural bull case is intact: HVDC exclusivity (37 orders in book, 12–18 months each), Supa Phase II to 59,045 MT by Q4 FY27, and the exclusive hpw metallwerk EV traction wire license. Key near-term catalyst: Supa Phase II commissioning (Q4 FY27) + interest cost savings (Rs. 20–25 Cr annually post Rs. 226 Cr debt repayment) flowing through OPM in FY27. Biggest watch: will OPM recover toward 6.5–7% as these tailwinds materialize? ACCUMULATE at Rs. 858; add aggressively below Rs. 820 on any market dip — the 40–50% PAT CAGR through FY28E is compelling at 38–42x FY27E EPS.

C1 — Financial Performance Snapshot

- Revenue: Rs. 1,018 Cr | YoY +100.5% | QoQ +24.5% | BEAT — first Rs. 1,000 Cr quarter
- EBITDA: Rs. 56 Cr | YoY +73.2% | QoQ +14.3% | In-line
- EBITDA Margin: 5.53% | YoY -140 bps | QoQ -51 bps | Below 6% target — WATCH
- PAT: Rs. 35 Cr | YoY +87.1% | QoQ +48.0% | BEAT
- EPS (post-split): Rs. 5.10 Q4 | FY26 full-year Rs. 16.25 — clean, no exceptional items

C2 — Segment / Geography Breakdown

- Specialized Magnet Winding Wires: Rs. 2,187 Cr | 75.3% of FY26 revenue | YoY growth strong; mix shift toward high-value products is the key margin lever
- Standard Magnet Winding Wires: Rs. 717 Cr | 24.7% of FY26 revenue | Lower margin, commoditized; share declining
- Export revenue: Rs. 590+ Cr (FY25 base) to 24 countries; Q4 FY26 export mix not separately disclosed
- Domestic: Power T&D; (transformer OEMs the dominant channel), railways, EV, home appliances — ~70–75% of revenue

C3 — Management Commentary Themes

- **Capacity leadership (#2 target):** MD Rajesh Hegde stated KSH could become India's #2 winding wire manufacturer at 59,045 MT. "We are on track." | Tag: GUIDANCE | Tone: Transparent
- **HVDC order flow:** 37 cumulative packages as at Q3 FY26; each 12–18 months execution; KSH remains the only approved Indian HVDC wire supplier — no competitor qualification in sight | Tag: GUIDANCE | Tone: Confident
- **EV wire optionality:** Exclusive hpw metallwerk license for peek-insulated 800V EV traction wires — "long-term play; in qualification with OEMs" | Tag: EST | Tone: Balanced

- **IPO deployment:** Rs. 226 Cr debt prepaid; Supa Phase II (Rs. 87 Cr) + solar (Rs. 8.83 Cr) to follow | Tag: GUIDANCE | Tone: Transparent
- **Margin headwinds acknowledged:** OPM compression attributed to employee costs, depreciation, and pre-repayment interest; recovery guided as capacity fills and debt reduces | Tag: EST | Tone: Hedged

C4 — Operating & Business Metrics

- Sales Volume: FY26 = 28,168 MT | FY25 = 23,324 MT | FY24 = 21,495 MT | Trend: consistently improving
- Installed Capacity: 43,445 MT (FY26-end) vs 29,045 MT (FY24) | Target: 59,045 MT by Q4 FY27
- Capacity Utilization: ~80.65% in FY25 (Screener AI data); FY26 implied ~65% on expanded base — ramp in progress
- HVDC Orders: 37 cumulative packages as at Q3 FY26 | 12–18 months execution each
- Invoiced Customers: 122 in FY24 vs 117 in FY22/23 | Growing OEM base
- Domestic Market Share: ~8.47% by production volume (FY24); expansion likely with Supa Phase II

C5 — Margin Drivers

- **Employee costs (+107% YoY Q4 FY26):** -80 to -100 bps OPM | Recurring but normalizing as Supa Phase I gets fully absorbed
- **Interest (+69% YoY FY26):** -80 bps OPM | Non-recurring — Rs. 226 Cr prepaid post-IPO; Rs. 20–25 Cr annual saving from FY27
- **Depreciation (+57% YoY FY26):** -30 bps OPM | Recurring as Supa Phase II assets added; manageable
- **Specialized wire mix improvement:** +50 to +70 bps OPM support as 75.3% of revenue is high-value specialized wires
- **Copper cost-plus pricing:** Broadly pass-through; short-term lag risk on contract renewals is the key commodity exposure

C6 — Guidance & Forward Signals

- Capacity [GUIDANCE]: 59,045 MT by Q4 FY27 | Delta: Raised from 43,445 MT | Credibility: High (Phase I delivered)
- Revenue [GUIDANCE]: No explicit number given; Rs. 5,000 Cr+ annualized run-rate implied at 59,045 MT | Delta: Raised | Credibility: Medium
- Margins [EST]: Recovery toward 6.5-7% as interest savings + fixed cost absorption kick in from FY27 | Delta: Maintained | Credibility: Medium
- Debt [GUIDANCE]: Rs. 321 Cr at FY26; Phase II funded internally + WC lines; net debt declining | Credibility: High

C7 — Capital Allocation

- Capex FY26: Rs. 179 Cr (cash from investing) | +51.7% vs FY25 | Supa Phase I completion + Phase II start
- Dividends: Rs. 0 | Unchanged | Zero payout maintained in growth phase
- Debt repayment: Rs. 226 Cr of IPO proceeds used to prepay high-cost term loans | Net debt improved
- WC build: Rs. 119 Cr consumed in FY25; continued WC expansion in FY26 as revenue scaled
- Net debt: Borrowings declined Rs. 366 Cr to Rs. 321 Cr; D/E improved from ~1.2x to 0.40x

C8 — Q&A; Heat Map

- Analyst: Q: "When will OPM recover to 7%?" A: "As Supa fills and interest savings flow through in FY27" | Tone: Hedged
- Analyst: Q: "HVDC order status and timeline?" A: "37 packages booked; execution ongoing; pipeline active" | Tone: Transparent

- Analyst: Q: "EV traction wire — materiality timeline?" A: "3–4 years before material revenue; in OEM qualification" | Tone: Balanced
- Analyst: Q: "Dividend policy?" A: "Capital requirements in growth phase preclude dividends for now" | Tone: Transparent
- Watch-list for next quarter: (1) Specific OPM recovery timeline + quantification; (2) HVDC order backlog in rupees; (3) Supa Phase II construction progress

C9 — Risks Flagged

- Margin compression: OPM fell 227 bps from peak | Flagged by: analysts | Probability: Medium | Impact: High | Timeline: Near-term
- Working capital intensity: Persistent negative CFO in copper-heavy business | Flagged by: management | Probability: Medium | Impact: Medium | Timeline: Near-term
- Supa Phase II execution: Concurrent with Phase I stabilization | Flagged by: management | Probability: Low | Impact: Medium | Timeline: Medium-term
- Valuation risk: Stock at 52x TTM P/E post 124% run-up; limited margin of safety | Flagged by: analysts | Probability: Medium | Impact: High | Timeline: Near-term

C10 — Analyst Verdict

- Revenue visibility: Intact — 59,045 MT pipeline, HVDC order book, 44% 3-year CAGR trajectory intact
- Margin trajectory: Weakened (recovering) — OPM at 5.5% in Q4; IPO savings + absorption should push to 6.5% by FY28
- Capital allocation quality: Intact — IPO proceeds deployed logically; no value-destructive transactions
- Competitive moat: Intact — HVDC exclusivity maintained; 24-country export network; EV wire option secured
- Management credibility: Intact — Phase I Supa delivered on schedule; debt reduction committed and executed
- Valuation comfort: Weakened — 52x TTM P/E demanding after 124% run; requires FY27E delivery to stay supported
- Conviction call: Unchanged — ACCUMULATE on dips below Rs. 840
- Valuation snapshot: P/E = 52.2x | Fwd P/E = 42.1x | EV/EBITDA = 28.4x | ROCE = 21.4% | ROE = 20.1% | D/E = 0.40x
