Business Description

- DEE Development Engineers Ltd (DEEDEV) is India's leading manufacturer of **customised process piping systems, pressure vessels, and heat exchangers** for the oil & gas, petrochemical, power generation, and fertiliser industries.
- The company serves domestic oil PSUs (ONGC, IOCL, BPCL, HPCL) as well as international EPC contractors, with exports forming an increasing share of the order mix.
- Key product lines: (1) Fabricated piping systems — bends, spools, assemblies, headers; (2) Pressure vessels and reactors; (3) Heat exchangers (shell-and-tube, air-cooled); (4) Biomass pellet manufacturing (new vertical).
- Manufacturing footprint: Palwal (Haryana) — legacy facility; **Anjar (Gujarat)** — new 30,000 MTPA pipe fabrication facility commissioned ahead of schedule in FY26; **Seamless Pipe Plant** commissioned FY26 — India's first, a significant competitive differentiator.
- Revenue mix (approx FY26): Oil & Gas ~45%, Power ~30%, Petrochemicals & Fertilisers ~20%, Others ~5%.

2. INVESTMENT THESIS — THREE PILLARS

Pillar 1: Order Book Doubling — Visible Revenue Runway

- Order book Rs. 2,434 Cr (May 2026)** — up 98% YoY from Rs. 1,228 Cr in FY25, providing ~2x revenue cover on trailing annual sales.
- Order inflow FY26 exceeded Rs. 2,000 Cr, ahead of management's own guidance. May-2026 monthly inflow alone stood at Rs. 631 Cr.
- New USD 40 Mn+ Letter of Intent marks entry into **global OEM supply chains** — opens an addressable market far beyond domestic PSU capex cycles.
- Oil & gas capex cycle (ONGC's Rs. 1 lakh Cr 5-year plan, IOCL refinery expansions, HPCL Barmer refinery) underpins demand visibility through FY28.

Pillar 2: Capacity Step-Up + Seamless Pipe — Margin Catalyst

- Anjar facility (30,000 MTPA)** doubles fabricated piping capacity; commissioned ahead of schedule in FY26; utilisation ramp-up drives operating leverage.
- Seamless pipe plant** — India's first, commissioned FY26. Eliminates procurement bottleneck, improves vertical integration, and opens a premium product segment with superior margins.

- Management guides OPM to **18–20% in FY27** (vs. 16–17% in FY26) as Anjar and the seamless plant scale up and power tariff normalises.
- New biomass pellet business leverages byproducts and diversifies into ESG-linked green energy feedstock — incremental revenue with low capex.

Pillar 3: Energy Transition Positioning — Green Hydrogen & Export Diversification

- Green hydrogen clean-tech partnership signed in FY26 — process piping and pressure vessels for green H2 projects are a multi-decade growth vector.
- Exports and global OEM supply chains reduce dependence on domestic PSU order cycles, which can be lumpy and subject to government budget allocation timing.
- PAT CAGR of **~76% over FY22–FY26** demonstrates the company has moved decisively beyond its earlier sub-scale, high-leverage profile.
- Promoter holding stable at 70.18% with no pledge — aligned management with no dilution pressure in the near term.

3. FINANCIAL SUMMARY (CONSOLIDATED)

All figures in Rs. Cr unless stated. Source: Screener.in (fetched 15-Jun-2026). FY27E/FY28E are analyst estimates.

Metric	FY22	FY23	FY24	FY25	FY26	FY27E	FY28E
Revenue (Rs. Cr)	461	596	789	827	1,142	1,550	1,900
Growth YoY %	—	29.3	32.4	4.8	38.1	35.7	22.6
EBITDA (Rs. Cr)	68	74	109	129	191	279	360
OPM %	14.7	12.4	13.8	15.6	16.7	18.0	19.0
Interest (Rs. Cr)	28	34	47	45	56	60	58
Depreciation (Rs. Cr)	36	38	45	49	53	62	70
PBT (Rs. Cr)	13	20	36	55	96	172	242
PAT (Rs. Cr)	8	13	26	44	77	122	162
PAT Growth %	—	62.5	100.0	69.2	75.0	58.4	32.8
EPS (Rs.)	7.73	12.23	4.94	6.32	11.17	17.7	23.5

Balance Sheet Highlights

Metric	FY22	FY23	FY24	FY25	FY26
Equity + Reserves (Rs. Cr)	412	424	451	801	890
Total Borrowings (Rs. Cr)	290	364	460	431	705
D/E (x)	0.70	0.86	1.02	0.54	0.79
Fixed Assets (Rs. Cr)	354	381	414	422	658
CWIP (Rs. Cr)	4	3	66	148	80
Total Assets (Rs. Cr)	843	963	1,208	1,594	1,924
Cash Conversion Cycle (days)	416	407	323	534	436
ROCE %	6%	7%	10%	9%	10.9%

Cash Flow Summary (Rs. Cr)

Metric	FY22	FY23	FY24	FY25	FY26
CFO	67	14	103	-60	20
CFI	-22	-52	-145	-164	-187
CFF	-50	40	43	227	201
Free Cash Flow	43	-42	-31	-224	-165
CFO/EBITDA %	99%	19%	94%	-47%	10%

- Negative FCF in FY24–FY26 reflects deliberate capex (Anjar + seamless plant). Management guided growth capex cycle is **largely complete** as of FY26-end; FCF is expected to turn positive in FY27.

- FY25 CFO turned negative (-60 Cr) due to a sharp rise in working capital (CCC expanded to 534 days), which normalised to 436 days in FY26.
- Debt rose to Rs. 705 Cr in FY26 partly to fund Anjar commissioning, but with capacity now operational, incremental debt appetite should moderate.

4. QUARTERLY PERFORMANCE TREND

Quarter	Q1FY25	Q2FY25	Q3FY25	Q4FY25	Q1FY26	Q2FY26	Q3FY26	Q4FY26
Revenue (Cr)	185	194	162	286	224	270	287	362
EBITDA (Cr)	25	30	6	64	36	44	48	64
OPM %	13%	15%	3%	22%	16%	16%	17%	18%
PAT (Cr)	3	22	-13	32	13	18	19	28
EPS (Rs.)	0.46	3.22	-1.93	4.56	1.91	2.58	2.64	4.04

- Q4FY26 is the standout — revenue of Rs. 362 Cr (+27% QoQ; +26% YoY) with OPM expanding to 18%, suggesting Anjar execution leverage is already materialising.
- Q3FY25 (Dec-24) was an anomaly — Rs. -13 Cr PAT due to a Rs. -17 Cr PBT swing likely from project-mix, not structural. The recovery in Q4 and Q1FY26 confirms normalisation.
- Trailing 4-quarter revenue run-rate (Q1-Q4 FY26): Rs. 1,142 Cr; management guides Rs. 1,500 Cr for FY27 — implying ~31% growth and a similar trajectory.

5. ORDER BOOK & BUSINESS MOMENTUM

Order Book Trajectory

Period	Order Book (Rs. Cr)	Comment
FY25 Close (Mar-25)	1,228	Post-expansion baseline
Sep-25	1,308	Mid-year; order pace accelerating
Feb-26	1,713+	Cumulative inflow Rs.1,714 Cr YTD (FY26)
Apr-26	1,910	Post-FY26 close
May-26	2,434	Latest disclosed; Rs.631 Cr inflow in May

- Order book of Rs. 2,434 Cr (May 2026) represents **2.1x trailing revenue** (FY26: Rs. 1,142 Cr) — exceptional revenue visibility for a process equipment company.
- FY26 cumulative order inflow exceeded the Rs. 2,000 Cr guidance, driven by Oil & Gas, Power, and Process/Chemical sectors.
- USD 40 Mn+ LOI for global OEM supply — at current rates ~Rs. 335 Cr — represents meaningful export order scale for the first time.
- Repeat order behaviour from ONGC, IOCL, and power sector EPC contractors — sticky client base with high switching costs.
- Sector mix is diversifying: Oil & Gas expected to contribute largest incremental inflows in FY27, while Power & Renewable orders provide base-load stability.

Capacity Expansion: The Anjar + Seamless Pipe Inflection

- Anjar (Gujarat) plant: 30,000 MTPA pipe fabrication; **commissioned ahead of schedule** in FY26; proximity to Mundra/Kandla ports enhances export logistics competitiveness.
- Seamless Pipe Plant: **India's first** — eliminates reliance on expensive imported seamless pipes; critical for high-pressure oil & gas applications; commissioned FY26.
- Combined effect: installed capacity doubles (from Palwal-only base), opening Rs. 2,500+ Cr revenue potential at scale vs. current Rs. 1,142 Cr — implying significant unutilised capacity value.
- Biomass pellet manufacturing: new ESG vertical using production byproducts; management expects incremental revenue streams with low incremental capex.
- Growth capex cycle **largely complete** per management Q4FY26 concall; FY27 capex should normalise, enabling FCF inflection.

6. PEER COMPARISON

Company	MCap (Cr)	CMP (Rs.)	P/E (x)	ROCE %	OPM % FY26	Revenue FY26 (Cr)	PAT FY26 (Cr)
DEEDEV	4,814	695	61.0	10.9	16.7	1,142	77

Company	MCap (Cr)	CMP (Rs.)	P/E (x)	ROCE %	OPM % FY26	Revenue FY26 (Cr)	PAT FY26 (Cr)
ISGEC Heavy Engg	6,805	926	19.1	17.0	6.9	5,229	347
Thermax Ltd	56,707	4,759	83.8	14.9	9.6	10,694	720
GMM Pfaudler	3,515	782	46.0	14.0	11.4	3,524	52

- DEEDEV trades at 61x TTM P/E — premium to ISGEC (19x) and GMM Pfaudler (46x) but discount to Thermax (84x). The premium is justified by DEEDEV's superior PAT growth trajectory and order book momentum.
- ROCE of 10.9% lags peers (Thermax 14.9%, ISGEC 17%) — key upside lever as Anjar and seamless plant operate at scale; management targets 14–16% ROCE in FY27–28.
- Revenue per Rs. 100 Cr MCap is lower than ISGEC but the order-book-to-MCap ratio (~50%) is the highest in the peer set, reflecting growth optionality.
- GMM Pfaudler's FY26 PAT at Rs. 52 Cr is lower than DEEDEV's Rs. 77 Cr — DEEDEV is now the more profitable entity on an absolute basis despite smaller revenue scale.

7. RISKS & MITIGANTS

Risk	Nature	Severity	Mitigant
Execution risk on large orders	Operational	HIGH	Anjar and seamless plant now commissioned; fixed-cost absorption improves execution bandwidth
PSU capex cycle slowdown	Demand	MEDIUM	Order book Rs. 2,434 Cr gives 18+ months visibility; export diversification reduces India-only exposure
Working capital stretch (CCC 436 days)	Financial	MEDIUM-HIGH	Structural in nature for EPC-type contracts; FY26 CCC improved from FY25 peak of 534 days
Rising debt (Rs. 705 Cr, D/E 0.79x)	Financial	MEDIUM	Capex cycle complete; FCF inflection in FY27 expected to reduce net debt
Commodity price volatility (steel, pipes)	Cost	MEDIUM	Price escalation clauses in long-term contracts partially offset; seamless plant integration helps
Valuation premium (61x TTM PE)	Valuation	MEDIUM	Growth deserves premium; on FY27E EPS Rs. 17.7, stock trades at 39x — more reasonable
Key man concentration — promoter-managed	Governance	LOW-MEDIUM	Promoter at 70.18%, no pledge; deep sector domain expertise is core moat
Slow margin recovery if Anjar under-utilised	Operational	LOW-MEDIUM	Order book > 2x revenue provides confidence on utilisation ramp; management has track record

8. VALUATION & TARGET PRICE

Earnings Estimate Framework

	FY26A	FY27E	FY28E
Revenue (Rs. Cr)	1,142	1,550	1,900
EBITDA (Rs. Cr)	191	279	360
OPM %	16.7%	18.0%	19.0%
Interest (Rs. Cr)	56	60	58
Depreciation (Cr)	53	62	70
PBT (Rs. Cr)	96	172	242
Tax @ 25%	19	43	61
PAT (Rs. Cr)	77	122	162
EPS (Rs.)	11.17	17.7	23.5
P/E at CMP (x)	62.2	39.3	29.6
EV/EBITDA at CMP (x)	28.1	19.1	14.8

Target Price Derivation

- Primary method — P/E:** FY28E EPS Rs. 23.5 x 37x target multiple = Rs. 870. Target multiple reflects: (a) sector leadership in process piping; (b) clear PAT CAGR >30% visibility; (c) discount to Thermax's 84x given smaller scale.
- Cross-check — EV/EBITDA:** FY27E EBITDA Rs. 279 Cr x 28x = EV Rs. 7,812 Cr; less net debt Rs. 605 Cr = MCap Rs. 7,207 Cr; per share Rs. ~1,044 — supportive of target.
- Cross-check — P/E FY27E:** EPS Rs. 17.7 x 49x = Rs. 867 — consistent with Rs. 870 target.
- Base case target: Rs. 870** — 12-month horizon; upside 25.2% from CMP Rs. 695.
- Bull case Rs. 1,050:** if OPM reaches 20% in FY28 and order inflows stay above Rs. 2,000 Cr/yr; PAT Rs. 190 Cr; 40x P/E = Rs. 1,100.
- Bear case Rs. 540:** execution delays, utilisation below 60%, OPM stays at 15%; FY27E EPS Rs. 13.5 x 40x = Rs. 540.

9. NEAR-TERM CATALYSTS & TRIGGERS

Catalyst	Timeline	Impact	Probability
Q1FY27 results: OPM >=18% confirming Anjar leverage	Aug-26	HIGH	HIGH

Catalyst	Timeline	Impact	Probability
Rs. 500+ Cr single order win (O&G;/export)	3-6 months	HIGH	MEDIUM-HIGH
FCF turning positive in FY27	Q2/Q3 FY27	MEDIUM	HIGH
Seamless pipe plant scale-up — incremental revenue Rs. 150+ Cr	FY27	HIGH	MEDIUM-HIGH
Global OEM LOI conversion to confirmed orders	6-9 months	HIGH	MEDIUM
Debt reduction signalling balance-sheet strength	FY27	MEDIUM	MEDIUM-HIGH
Green H2 project order booking	12-18 months	MEDIUM	MEDIUM
Index inclusion (Nifty Midcap / Nifty 500)	12 months	MEDIUM	MEDIUM

Key Monitorables (Watch These Every Quarter)

- Order inflow run-rate: must sustain above Rs. 400 Cr/quarter to justify premium valuation.
- OPM trajectory: recovery toward 18%+ is the single biggest earnings swing factor.
- Working capital (CCC): normalization below 350 days by FY27-end is critical for FCF generation.
- Seamless pipe revenue contribution: watch for first meaningful segment disclosure in Q1FY27 concall.
- D/E ratio: any further increase above 0.85x would signal capex overshoot and elevate financial risk.

10. SHAREHOLDING PATTERN & TECHNICAL OVERVIEW

Category	Mar-25	Jun-25	Sep-25	Dec-25	Mar-26
Promoters	70.29%	70.22%	70.22%	70.18%	70.18%
FIIs	0.65%	0.81%	0.79%	0.78%	0.99%
DIIIs	17.43%	17.33%	16.60%	14.87%	13.91%
Public	11.63%	11.65%	12.39%	14.17%	14.93%

- Promoter holding at 70.18% stable — **zero pledge**. No dilution signals in the near term.
- DII holding declined from 17.4% (Mar-25) to 13.9% (Mar-26) — profit-taking by domestic funds after the stock's sharp 237% YTD rally in 2026. Not a structural negative.
- FII holding recovering (+0.34ppt QoQ in Mar-26); global O&G capex narrative increasingly attracting foreign flows.
- Public/retail participation rising (11.6% to 14.9%) as stock got wider visibility after the 2026 re-rating.

Technical Perspective

- **52-Week range: Rs. 183 – Rs. 710.** CMP at Rs. 695 places the stock near 52-week highs — the primary uptrend is intact.
- Stock rallied **237% YTD in 2026** (per Upstox data) — a significant move that has priced in much of the near-term good news; pullbacks to Rs. 620–640 are buy zones.
- Key support: Rs. 620 (previous breakout level); Rs. 550 (200-DMA zone on the new rally leg).
- Resistance: Rs. 710 (52-Wk High); a decisive break above Rs. 720 targets Rs. 800+ on continuation.
- RSI likely in 60–70 range given the sharp rally — not extreme overbought; momentum remains constructive.

Screener.in Quick Insights

- **Pro:** Company expected to give good quarter (consensus).
- **Pro:** PAT CAGR of ~40.8% over last 5 years (screener.in; our calc shows higher at ~76% from FY22-FY26 trough-to-trough).
- **Con:** Stock trades at 5.4x book value — expensive on a P/BV basis; justified if ROCE improves toward 16%.
- **Con:** No dividend payout — all earnings being reinvested in growth capex.
- **Con:** ROE of 7.81% over last 3 years is low — reflective of the equity dilution from the FY24 fundraise and ramp-up phase.

11. APPENDIX — CONCALL BRIEF (Q4FY26 | 22 May 2026)

Call Grade

A– (Strong execution, management on top of order book & margins; watch FCF discipline)

To My Boss (One-Liner)

DEEDEV crushed FY26 — 38% revenue growth, 76% PAT growth, Rs. 1,940 Cr order book — and order inflows have since hit Rs. 2,434 Cr; Anjar and seamless pipe are live and the FCF turn in FY27 is the re-rating trigger; BUY, Rs. 870 target.

1. Opening & Macro Context

- Management opened by anchoring FY26 as a transition year from a capex-heavy to an execution-heavy phase.
- Domestic O&G; capex remains robust: ONGC's five-year plan, IOCL's Rs. 25,000 Cr/yr capex, HPCL Barmer — all generating steady fabricated piping demand.
- Power sector (thermal, renewables, nuclear) is a growing segment; DEE is capturing heat exchanger and pressure vessel orders from new power projects.
- Management flagged green hydrogen as a medium-term opportunity — still early, but initial partnerships signal intent.

2. Order Book & Inflow Commentary

- FY26 order inflows exceeded Rs. 2,000 Cr guidance — actual inflows were approximately Rs. 2,200 Cr for the full year.
- Order book at year-end Rs. 1,940 Cr; since then orders have accelerated — May-2026 closing order book Rs. 2,434 Cr.
- Quality of order book improved: higher proportion of export and international EPC orders vs. domestic PSU.
- USD 40 Mn LOI from a global OEM — management expects this to formalise into full order by Q2FY27.
- FY27 guidance: order inflows of Rs. 2,500 Cr+ — management confident given pipeline of bids outstanding.

3. Revenue & Margin Performance

- FY26 revenue Rs. 1,142 Cr (+38% YoY); core EBITDA Rs. 191 Cr (+53% YoY); OPM 16.7% vs. 15.6% in FY25.
- Q4FY26 particularly strong: Rs. 362 Cr revenue, 18% OPM — first quarter above Rs. 350 Cr.
- Management attributed Q3FY25 margin trough (-1% OPM adj. for other income) to project-mix: lower-margin legacy contracts executed; high-margin new contracts building in Q4+.
- FY27 OPM guidance: 18–20%; FY28 management expects 20%+ as seamless pipe reaches full utilisation.
- Revenue guidance FY27: Rs. 1,500 Cr (our estimate Rs. 1,550 Cr); management indicated 40–45% growth on FY25 base (FY25=Rs. 827 Cr implies Rs. 1,160–1,200 Cr on that base, but they later clarified Rs. 1,500 Cr on the updated FY26 exit rate).

4. Capacity & Operations Update

- Anjar (Gujarat) 30,000 MTPA — fully operational as of Q4FY26; initial utilisation ~40–50%; targeting 70%+ by Q2FY27.
- Seamless pipe plant — commissioned; first deliveries in Q4FY26; ramp-up will be gradual through H1FY27.
- Palwal (Haryana) legacy plant at full utilisation; will focus on complex custom vessels while Anjar handles volume piping.
- Combined installed capacity can support Rs. 2,500 Cr+ revenue at optimal utilisation — confirming management does not need another major capex round before FY29.
- Biomass pellet project: land acquired, machinery being installed; first revenues expected Q2/Q3FY27; not material to P&L;

5. Working Capital & Balance Sheet

- Cash Conversion Cycle improved to 436 days (FY26) from 534 days (FY25) — still high by peer standards but trending right.
- Debtor days: 123 (FY26) vs. 109 (FY25) — uptick as project milestone-based billing delays collection; management expects normalisation.
- Inventory days: 439 (FY26) — significantly improved from 738 in FY25 as Anjar started receiving and consuming raw material pipeline.
- Management committed to reducing net debt in FY27 as FCF turns positive; no new large capex planned.
- Gross debt Rs. 705 Cr at FY26-end; management expects to bring net debt below Rs. 600 Cr by FY27-end.

6. Segment & Customer Mix

- Oil & Gas: ~45% of revenue; largest segment; ONGC, IOCL, BPCL, HPCL remain anchor customers.
- Power: ~30%; growing with thermal additions and nuclear expansion (NTPC, NPCIL piping orders).
- Petrochemicals & Fertilisers: ~20%; includes HMEL, Reliance, GSFC order stream.
- Exports: ~5% currently, targeting 15–20% within 3 years; Anjar's port proximity is the key enabler.

- Seamless pipe addresses the Rs. 400–500 Cr/yr imported seamless pipe market domestically — import substitution play.

7. Management Guidance Summary

- FY27 revenue: Rs. 1,500 Cr+ (37–40% growth on FY26 actuals).
- FY27 OPM: 18–20%; FY28 target 20%+.
- Order inflows FY27: Rs. 2,500 Cr guidance.
- Capex FY27: Rs. 80–100 Cr (maintenance + seamless ramp) vs. Rs. 187 Cr in FY26 — significant moderation.
- FCF FY27: management expects positive FCF for the first time since FY23.
- Green hydrogen partnerships will be formalised but revenue impact is FY28+.

8. Analyst Q&A; Highlights

- Q: Why did the seamless pipe plant margin not show in Q4FY26? Mgmt: Plant commissioned in late Q4; full margin contribution begins Q1FY27.
- Q: Are you concerned about rising debt? Mgmt: Debt peaked at Rs. 705 Cr; absolute and ratio to come down from FY27; no further long-term debt planned.
- Q: Order book quality — any risk of cancellation? Mgmt: Order book is backed by LoAs (Letters of Award) from PSUs and EPCs; cancellation rate historically below 2%.
- Q: Green H2 — what is the product application? Mgmt: Piping manifolds, heat exchangers, pressure vessels for electrolyzers — same product, different end-use client.
- Q: FII holding declined sharply — is there any institutional concern? Mgmt: No — FIIs took profits post the re-rating; DIIs partially absorbed; public participation is healthy.

9. Red Flags / Areas to Watch

- **FCF still negative (Rs. -165 Cr FY26):** management's promise of FCF positive in FY27 is the key credibility test.
- **Working capital remains stretched** despite improvement — if CCC does not normalise to below 380 days by H1FY27, it will require further debt draw.
- **Q3FY25 PAT loss of Rs. -13 Cr** was unexplained beyond 'project-mix'; investors should seek more granular disclosure.
- **Seamless pipe ramp risk:** India's first plant means no domestic track record; technical glitches could delay margin realisation.
- **Power tariff normalisation** called out by management as a margin tailwind — but if tariffs remain elevated, the 18–20% OPM corridor compresses.

10. Overall Concall Assessment

- Management's execution in FY26 matched or beat every FY25 guidance parameter — credibility is high.
- The Anjar + seamless combination is a structural moat builder that peers like ISGEC or GMM Pfaudler lack in the same product category.
- The investment case rests on FY27 delivering: Rs. 1,500 Cr revenue + 18% OPM + positive FCF + sustained order inflows. All three are achievable given current order book.
- The stock's 237% YTD rally means the market has front-run much of the FY27 re-rating; the next leg requires delivery on the FCF and margin guidance.
- **Verdict: BUY for 12–18 months; add on dips to Rs. 620–650; trim 30–40% of position if stock crosses Rs. 950 without a corresponding earnings beat.**
