

NSE: JAYBARMARU | BSE: 520066 | Auto Ancillary

# Jay Bharat Maruti Ltd

Sheet Metal Components & Exhaust Systems | Maruti Suzuki Ecosystem

| CMP (15 Jun 2026) | Market Cap   | 52-Wk Range  | P/E (TTM) | BV/Share |
|-------------------|--------------|--------------|-----------|----------|
| Rs. 150           | Rs. 1,624 Cr | Rs. 71 - 150 | 11.6x     | Rs. 64.3 |

| RATING | 12M TARGET | UPSIDE |
|--------|------------|--------|
| BUY    | Rs. 200    | +33%   |

*Thesis: JAYBARMARU is a deep-value play on Maruti Suzuki's volume ramp — a capex super-cycle and a step-change in operating margins (7%→11%) driven by the Gujarat facility, at a 60% discount to peer P/E multiples.*

Equity Research Report | MPM Capital Research | 15 June 2026 | All figures in Rs. Crore unless stated. Data sourced from Screener.in, BSE filings, company press releases.

## 2. Investment Thesis

### Three Reasons to Own JAYBARMARU

- **Margin inflection is structural, not cyclical.** OPM expanded from a persistently flat 7% (FY21-FY25) to 11% in FY26 — the Gujarat plant ramp-up drives operating leverage on a fixed cost base that was already fully depreciated. Full-year Gujarat contribution should sustain 10-12% OPM in FY27E.
- **Maruti Suzuki's volume super-cycle is a direct tailwind.** MSIL is investing Rs. 35,000+ Cr in capacity expansion targeting 4M+ units/year by FY30; JAYBARMARU supplies sheet metal, exhaust and fuel systems to every Maruti platform. Management guided for content-per-vehicle growth alongside volume.
- **Deep value vs. peers at 11.6x TTM P/E.** Sandhar trades at 24x, Suprajit at 23x. Even on a normalized FY26 PAT of Rs. 68 Cr (stripping the Rs. 72 Cr one-time tax/GST boost), the stock trades at 23.9x — still with a re-rating catalyst as margins sustain.

### Catalyst

- Q1 FY27 results (Aug 2026): First clean quarter fully reflecting the Gujarat plant at scale + MSIL's SUV volume ramp. An OPM print above 10% with no one-time items will confirm the margin narrative and trigger analyst coverage re-initiation.

### Primary Risk

- **Single-customer concentration:** ~85% revenues from Maruti Suzuki. Any MSIL production cut (input-cost shock, demand slowdown, model lifecycle gap) flows directly to JAYBARMARU. The company has negligible customer diversification optionality.

### 3. Business Overview

- **Company profile.** Jay Bharat Maruti Ltd (incorporated 1987, Gurugram) is a Tier-1 auto ancillary company and a joint-venture partner of Maruti Suzuki India Ltd (MSIL). MSIL holds ~22% stake; total promoter group (including Jay Bharat group) holds 59.35%.
- **Product portfolio.** Three product verticals: (1) Sheet metal components and assemblies (body parts, closure panels, sub-assemblies); (2) Exhaust systems (mufflers, catalytic converters, pipes); (3) Fuel delivery systems (fuel tanks, fuel pipe assemblies). Sheet metal dominates >60% of revenue.
- **Customer concentration.** Approximately 85% of revenues from Maruti Suzuki (Gurugram, Manesar plants). Balance from Toyota Kirloskar (via MSIL platform sharing) and aftermarket. No meaningful revenue from non-MSIL OEMs.
- **Manufacturing footprint.** Four plants: Gurugram (Haryana, 3 facilities, legacy volumes), and a new Gujarat plant commissioned FY25. Gujarat receives MSIL's new greenfield volumes and benefits from the Gujarat Industrial Policy 2015 GST incentive scheme.
- **Capacity expansion.** CWIP was Rs. 308 Cr as at Mar 2025, indicating aggressive investment ahead of MSIL's Kharkhoda (Haryana) plant. Fixed assets grew from Rs. 906 Cr (FY24) to Rs. 1,173 Cr (FY26) — a 29% jump in two years.
- **Headcount and scale.** ~4,000+ employees. Annual revenues of Rs. 2,551 Cr (FY26) place it in the mid-tier of listed auto ancillaries by size.

## 4. Industry Landscape & Peer Benchmarking

### Industry Context

- India's passenger vehicle market produced ~4.3M units in FY25 (7% YoY growth); MSIL alone commands ~42% market share. Government's PLI scheme for auto components and EV transition offer long-run tailwinds but also pose risks for exhaust-system suppliers.
- Sheet metal components are largely EV-agnostic (body stampings transfer to BEV platforms); however exhaust system revenues (est. 25-30% of JAYBARMARU mix) are at structural risk from ICE phase-out over a 7-10 year horizon.
- MSIL's Rs. 35,000 Cr capex plan (Kharkhoda greenfield, Gujarat expansion) through FY30 keeps near-term demand outlook robust for Tier-1 body-in-white suppliers.

### Peer Comparison Table

| Company        | MCap (Cr) | Rev FY26E (Cr) | OPM % | PAT (Cr) | P/E (x) | ROCE % | ROE % |
|----------------|-----------|----------------|-------|----------|---------|--------|-------|
| JAYBARMARU     | 1,624     | 2,551          | 11%   | 140*     | 11.6    | 17%    | 22%   |
| Sandhar Tech   | 4,350     | ~3,044         | 9%    | ~179     | 24.1    | 17%    | 15%   |
| Suprajit Engg  | 6,507     | ~1,839         | 16%   | ~274     | 23.6    | 21%    | 19%   |
| Craftsman Auto | 21,802    | ~4,819         | 18%   | ~221     | 97.5    | 10%    | 8%    |

\* FY26 PAT includes Rs. 72 Cr one-time (deferred tax benefit Rs. 37 Cr + Gujarat GST incentive Rs. 35 Cr). Normalised PAT ~Rs. 68 Cr; normalised P/E ~23.9x.

- JAYBARMARU trades at a deep discount on a reported P/E basis. Even on normalized earnings the discount to Sandhar and Suprajit is modest (~1-2x) but JAYBARMARU has superior ROE (22%) driven by asset-light sheet metal fabrication and negative working capital cycle.
- EV transition risk is the key reason for the discount. Investors ascribe a structural headwind to exhaust system revenues; re-rating will require JAYBARMARU to demonstrate EV-part content wins.

## 5. Management Quality

- **Promoter track record.** Promoter holding locked at 59.35% for 9+ consecutive quarters — zero pledge. This signals conviction and eliminates one of the most common small-cap governance risks.
- **Capital allocation discipline.** The company invested Rs. 265 Cr CFI in FY25 (Gujarat build-out) funded partly by debt (Borrowings +Rs. 100 Cr to Rs. 540 Cr) — a deliberate and measured capex choice. Debt is now being wound down (FY26 Borrowings Rs. 531 Cr, -Rs. 9 Cr) as Gujarat ramps.
- **Dividend consistency.** Maintained ~10-24% dividend payout through FY20-FY25 despite compressed margins. FY26 payout was 5% (conserving cash post one-time income) — final dividend of Rs. 0.70/share (35%) declared.
- **Transparency on one-time items.** Management proactively disclosed the deferred tax benefit (Rs. 36.79 Cr) on regime switch and GST incentive (Rs. 35.50 Cr) from Gujarat GIP-2015 in the Q4 FY26 press release — a positive governance signal.
- **Board strengthening.** Mr. Madhusudan Prasad re-appointed as Independent Director for 3 years effective Jun 1, 2026 — continuity in board oversight.
- **Weakness: No concall.** JAYBARMARU does not hold earnings calls — unusual for a Rs. 1,600 Cr market-cap company. Investor relations quality is below peers; guidance and strategic commentary come only via press releases and AGM disclosures.

## 6. Financial Deep-Dive

### Profit & Loss Summary (Rs. Cr)

| Metric       | FY20  | FY21  | FY22  | FY23  | FY24  | FY25  | FY26  |
|--------------|-------|-------|-------|-------|-------|-------|-------|
| Revenue      | 1,658 | 1,499 | 2,078 | 2,344 | 2,292 | 2,290 | 2,551 |
| EBITDA       | 141   | 136   | 150   | 173   | 167   | 165   | 283   |
| OPM %        | 9%    | 9%    | 7%    | 7%    | 7%    | 7%    | 11%   |
| Interest     | 38    | 33    | 33    | 37    | 40    | 36    | 44    |
| Depreciation | 63    | 66    | 75    | 80    | 84    | 84    | 95    |
| PBT          | 42    | 42    | 43    | 58    | 48    | 49    | 150   |
| Reported PAT | 28    | 26    | 28    | 38    | 32    | 33    | 140   |
| Norm. PAT*   | 28    | 26    | 28    | 38    | 32    | 33    | 68    |
| EPS (Rs.)    | 2.61  | 2.42  | 2.60  | 3.50  | 2.98  | 3.04  | 12.90 |

\* FY26 Normalised PAT strips Rs. 36.8 Cr deferred tax benefit + Rs. 35.5 Cr Gujarat GST incentive.

### Balance Sheet Snapshot (Rs. Cr)

| Item                 | FY22  | FY23  | FY24  | FY25  | FY26  |
|----------------------|-------|-------|-------|-------|-------|
| Equity + Reserves    | 475   | 508   | 539   | 563   | 696   |
| Borrowings           | 380   | 336   | 440   | 540   | 531   |
| Total Liabilities    | 1,327 | 1,299 | 1,556 | 1,672 | 1,831 |
| Fixed Assets (Gross) | 856   | 881   | 906   | 922   | 1,173 |
| CWIP                 | 62    | 23    | 162   | 308   | 110   |
| Total Assets         | 1,327 | 1,299 | 1,556 | 1,672 | 1,831 |

### Cash Flow Summary (Rs. Cr)

| Item           | FY22 | FY23 | FY24 | FY25 | FY26 |
|----------------|------|------|------|------|------|
| CFO            | 106  | 154  | 188  | 199  | 197  |
| CFI            | -76  | -65  | -140 | -265 | -132 |
| CFF            | -29  | -87  | -51  | 65   | -62  |
| Free Cash Flow | 29   | 88   | 44   | -63  | 63   |
| CFO/EBITDA %   | 71%  | 89%  | 113% | 121% | 70%  |

### Returns & Efficiency Ratios

| Metric               | FY22 | FY23 | FY24 | FY25 | FY26 |
|----------------------|------|------|------|------|------|
| ROCE %               | 9%   | 11%  | 10%  | 8%   | 17%  |
| ROE %                | 6%   | 8%   | 6%   | 6%   | 22%  |
| D/E Ratio (x)        | 0.80 | 0.66 | 0.82 | 0.96 | 0.76 |
| Debtor Days          | 16   | 13   | 20   | 14   | 17   |
| Inventory Days       | 47   | 40   | 55   | 51   | 52   |
| Payable Days         | 60   | 51   | 68   | 65   | 57   |
| Working Capital Days | -39  | -28  | -40  | -38  | -13  |

### Financial Commentary

- **FY26 margin step-change is real but partly inflated.** Normalised EBITDA of ~Rs. 200 Cr (backing out one-time items from PAT) still implies ~8% OPM — above FY24-FY25 run rate. Full Gujarat utilisation should deliver 10%+ on a clean basis in FY27E.
- **Working capital is a structural advantage.** Negative working capital days (payables consistently exceed receivables + inventory) reflects JAYBARMARU's position as a critical Tier-1 supplier — it extracts early payments from MSIL's dealer-financing while stretching its own supplier payments.
- **Debt peaked in FY25 and is now declining.** The Rs. 540 Cr borrowing peak corresponded to Gujarat plant construction; FY26 reduction to Rs. 531 Cr and positive FCF of Rs. 63 Cr signal the capex cycle is largely complete.
- **CFO quality is excellent over the cycle.** CFO/EBITDA averaged 95%+ from FY22-FY25 confirming earnings are cash-backed. FY26 dip to 70% reflects timing of Gujarat incentive cash receipts.

## 7. Earnings Quality Checklist

| Quality Metric             | Assessment                                                                              | Verdict |
|----------------------------|-----------------------------------------------------------------------------------------|---------|
| CFO vs Reported PAT        | CFO Rs. 197 Cr >> Reported PAT Rs. 140 Cr in FY26; multi-year CFO/EBITDA >90%           | PASS    |
| One-time items in FY26 PAT | Rs. 72.3 Cr one-time (deferred tax Rs. 36.8 Cr + GST incentive Rs. 35.5 Cr). Disclosed. | FLAG    |
| Revenue growth quality     | FY26 revenue +11.4% YoY on genuine volume growth; MSIL domestic wholesale up ~7%        | PASS    |
| Promoter pledging          | Zero pledge across all 9 recent quarters; stable 59.35% holding                         | PASS    |
| Audit opinion              | Unqualified; Big-4 not auditor (Price Waterhouse, Gurgaon) — adequate                   | PASS    |
| Related party risk         | ~85% revenues from promoter-connected MSIL; pricing is arms-length (NSE-listed MSIL)    | WATCH   |
| Debt trend                 | Peaked FY25, declining; D/E 0.76x is manageable; no covenant risk signals               | PASS    |
| Dividend consistency       | Paid through COVID, margin compression years; FY26 lower payout conserves cash          | PASS    |
| Investor communications    | No earnings calls; below-peer IR quality for market cap                                 | WEAK    |

- Core message: FY26 earnings quality is HIGH on cash conversion, revenue growth and balance sheet — but investors must haircut reported PAT by Rs. 72 Cr to assess the underlying run-rate.
- The one-time items are disclosed and non-recurring; they do not signal an accounting issue, but they do inflate the headline 287% profit surge and the trailing P/E multiple.

## 8. Valuation

### P/E-Based Peer Valuation

- At CMP Rs. 150, JAYBARMARU trades at 11.6x reported TTM P/E and ~23.9x normalised TTM P/E (stripping one-time items). Our Rs. 200 target is based on 12-month forward normalised EPS of Rs. 8.5 on 23.5x multiple — a 10% discount to Sandhar/Suprajit cluster.

### Scenario Analysis

| Scenario | FY27E Revenue (Cr) | OPM % | Norm. EPS (Rs.) | Target Price @ 23x (Rs.) |
|----------|--------------------|-------|-----------------|--------------------------|
| Bear     | 2,400              | 8%    | 5.5             | 127                      |
| Base     | 2,750              | 10%   | 8.5             | 196                      |
| Bull     | 3,000              | 12%   | 12.0            | 276                      |

### Key Valuation Assumptions

- Target multiple 23x:** Peer median (Sandhar 24x, Suprajit 23.6x). Applied 10% discount for (a) MSIL concentration risk and (b) no concall IR culture.
- Base case FY27E Revenue Rs. 2,750 Cr:** 8% growth on FY26; MSIL volumes up ~5-7%, content-per-vehicle up ~2-3% from new platform wins.
- Base case OPM 10%:** Gujarat plant fully ramped, fixed cost leverage normalises at 10% vs FY25's 7%. More conservative than FY26 reported 11% (which benefits from incentives).
- Bear case trigger:** MSIL production cuts >10%, raw material (steel/aluminium) spike, or INR depreciation raising Tier-2 input costs. Target Rs. 127 implies 15% downside from CMP.
- Bull case trigger:** Kharkhoda plant supply agreements + Toyota/Honda platform wins, OPM sustained at 12%. Target Rs. 276 implies +84% upside.

### EV/EBITDA Cross-Check

- Enterprise Value = MCap Rs. 1,624 Cr + Net Debt Rs. 486 Cr (Borrowings Rs. 531 Cr - Cash ~Rs. 45 Cr est.) = EV ~Rs. 2,110 Cr. On reported FY26 EBITDA Rs. 283 Cr: EV/EBITDA = 7.5x. On normalised EBITDA ~Rs. 195 Cr: EV/EBITDA = 10.8x. Sandhar and Suprajit trade at 12-15x EV/EBITDA — JAYBARMARU still appears inexpensive on normalised basis.

## 9. Key Risks

- **Single-customer concentration [HIGH].** ~85% revenues from MSIL. Any production disruption at MSIL (supply chain, demand, regulatory) directly hits JAYBARMARU with no material offset. Historical precedent: FY20-FY21 revenues fell 25% in lockstep with MSIL production decline.
- **EV transition obsolescence risk [MEDIUM, 5-7yr horizon].** Exhaust systems and fuel delivery (~30-35% of revenue) have zero content in battery electric vehicles. MSIL's EV pivot (e-Vitara, new BEV platforms by FY28) will gradually erode this segment unless JAYBARMARU diversifies into EV stampings and battery enclosures.
- **Steel and aluminium price volatility [MEDIUM].** Raw materials are ~65-70% of COGS. Price pass-through to MSIL has a 1-2 quarter lag under contractual terms, compressing margins in rapid commodity upcycles. FY22 OPM compression (7%) was driven by steel spike.
- **Gujarat incentive non-recurrence [LOW-MEDIUM].** Rs. 35.5 Cr Gujarat GIP-2015 incentive boosted FY26 PAT materially. This incentive is finite (tied to investment milestones) and its phase-out will depress reported PAT in future years.
- **Capex-driven leverage [LOW-MEDIUM].** D/E peaked at 0.96x in FY25 during Gujarat build-out. Any delay in MSIL demand or revenue ramp at Gujarat could stress debt servicing (Interest Rs. 44 Cr vs. normalised PBT ~Rs. 78 Cr implies moderate coverage of ~1.8x).
- **Low IR transparency [LOW].** No earnings calls, no quarterly guidance. Any negative surprise (margin miss, MSIL sourcing change) will be a shock rather than a managed expectation, increasing volatility risk.
- **FII ownership decline [LOW].** FII stake fell from 3.55% (Jun 2023) to 0.83% (Jun 2024) before recovering to 1.33% (Mar 2026). Institutional support is thin; the stock is driven by retail sentiment and Q-result surprises.

10. Recommendation

| Attribute         | Detail                                              |
|-------------------|-----------------------------------------------------|
| Rating            | BUY                                                 |
| CMP               | Rs. 150 (15 Jun 2026)                               |
| 12M Target        | Rs. 200                                             |
| Upside            | +33%                                                |
| Bear / Bull Range | Rs. 127 / Rs. 276                                   |
| Stop Loss (tech)  | Rs. 120 (52-wk low area)                            |
| Catalyst          | Q1 FY27 results (Aug 2026) — clean 10%+ OPM quarter |
| Time Horizon      | 12 months                                           |

Investment Rationale Summary

- Buy JAYBARMARU for the structural margin inflection story. The FY26 reported numbers are messy (one-time items), but the underlying business is clearly inflecting: Gujarat is ramping, EBITDA margins have escaped the 7% ceiling, and FCF turned positive after the capex peak. The stock at Rs. 150 prices in zero margin improvement on a forward normalised basis.
- The single-number bet is Q1 FY27 OPM. If the company delivers 10%+ EBITDA margin on clean Q1 revenues (~Rs. 620-640 Cr), the normalised P/E will compress to ~18x and institutional interest should follow. That is the trigger for a re-rating from the current Rs. 150 toward our Rs. 200 target.
- Position sizing: Given single-customer concentration and thin institutional coverage, this is a high-conviction small-cap position — suitable for a 3-5% portfolio weight with a hard stop at Rs. 120. The 13% downside to stop vs. 33% upside to target gives a 2.5:1 risk-reward on the base case.
- What changes the rating: (a) MSIL announces sourcing diversification away from JAYBARMARU; (b) Q1 FY27 OPM prints below 8% (margin thesis invalidated); (c) Steel prices surge >25% without pass-through visibility.

## 11. Appendix — Earnings Analysis & Investor Brief

**NOTE:** JAYBARMARU does not hold formal earnings conference calls. This section synthesises information from BSE press releases (Q4 FY26, May 2026), analyst commentary (Markets Mojo, Business Standard, Univest) and screener.in financials.

### Call Grade

- IR Grade: C+ — No concall, limited management commentary. Board meeting disclosures are timely and accurate; one-time items are disclosed proactively. But absence of a call means zero guidance, zero Q&A, and no management channel for investors.

### To My Boss — One Paragraph

JAYBARMARU reported Q4 FY26 PAT of Rs. 79.6 Cr (+287% YoY), which looks spectacular but conceals Rs. 72 Cr of one-time items (deferred tax regime switch + Gujarat GST incentive). Stripping those out, normalised Q4 PAT is ~Rs. 7.6 Cr and full-year normalised PAT is ~Rs. 68 Cr vs. FY25's Rs. 33 Cr — still a genuine 2x improvement. The improvement is real: OPM expanded from 7% to 11% in FY26 as Gujarat capacity absorbed MSIL volumes. The stock doubled from Rs. 70 (52-wk low) to Rs. 150, but at 23-24x normalised P/E it is not expensive vs. auto-ancillary peers. I recommend initiating a BUY at Rs. 150 with a Rs. 200 target, sized at 3-5% of portfolio.

### 1. Revenue and Volume Performance

- FY26 consolidated revenue: Rs. 2,551 Cr (+11.4% YoY from Rs. 2,290 Cr). Q4 FY26 was the standout: Rs. 767 Cr (+25.5% YoY), the strongest quarter in at least 5 years.
- MSIL domestic wholesale in FY26 grew ~7-8% YoY, implying JAYBARMARU gained content-per-vehicle as Gujarat plant contributed incremental output to new MSIL models (SUV platform wins).
- Sequential trajectory: Q1 Rs. 533 Cr → Q2 Rs. 555 Cr → Q3 Rs. 591 Cr → Q4 Rs. 766 Cr. The hockey-stick Q4 reflects both MSIL year-end production push and Gujarat ramp.

### 2. Margin Analysis

- FY26 OPM: 11.1% — a structural break from the 7% ceiling held for FY22-FY25.
- Q4 FY26 OPM: 12% (Rs. 91 Cr on Rs. 767 Cr revenue). This is partly driven by operating leverage as Gujarat plant reached scale. Fixed costs (depreciation Rs. 95 Cr, interest Rs. 44 Cr) are growing slower than revenue.
- Steel price environment in FY26 was benign (hot-rolled coil prices fell ~10-15% from peak), also aiding gross margins.

### 3. One-Time Items — Critical Disclosure

- Deferred tax benefit: Rs. 36.79 Cr from switching to the concessional corporate tax regime (Section 115BAA). This is a one-time recognition — future effective tax rate normalises to ~25%.
- Gujarat GST incentive: Rs. 35.50 Cr received under Gujarat Industrial Policy 2015 for the new plant. This incentive has a finite claim period tied to investment milestones; non-recurring.
- Combined one-time items: Rs. 72.3 Cr boosted Q4 PAT from ~Rs. 7.6 Cr normalised to Rs. 79.6 Cr reported. Full-year reported PAT Rs. 140 Cr vs. normalised ~Rs. 68 Cr.

### 4. Balance Sheet and Debt

- Borrowings peaked at Rs. 540 Cr in FY25 (Gujarat capex) and declined marginally to Rs. 531 Cr in FY26. With positive FCF resuming (Rs. 63 Cr in FY26), the trajectory is debt reduction.
- CWIP halved from Rs. 308 Cr (FY25) to Rs. 110 Cr (FY26) — the majority of the Gujarat capex has been capitalised. Net fixed asset base expanded to Rs. 1,173 Cr (from Rs. 922 Cr), providing depreciation headroom for FY27.

### 5. Cash Flow Quality

- CFO Rs. 197 Cr in FY26 (above reported PAT Rs. 140 Cr) confirms the one-time tax/GST items did not generate equivalent cash in FY26. CFO is real; the PAT boost is partly a balance sheet re-classification (deferred tax liability release).
- Historical CFO/EBITDA averaged 95%+ over FY22-FY25 — exceptional earnings quality. This is the core thesis support: JAYBARMARU converts profits to cash reliably.

## 6. Dividends and Capital Returns

- Final dividend recommended: Rs. 0.70/share (35% of FV Rs. 2). Dividend yield at CMP: 0.46%.
- Payout declined to 5% in FY26 (from 23% in FY25) — manageable; reflects debt repayment priority post-capex cycle.

## 7. Shareholding and Governance

- Promoter holding: 59.35% stable for 9 consecutive quarters (Jun 2023 — Mar 2026). Zero pledge.
- FII holding rose from 0.83% (Jun 2024) to 1.33% (Mar 2026) — small but directionally positive.
- No. of shareholders: 40,531 (Mar 2025) declining to 36,318 (Mar 2026) — retail consolidation post the Q4 surge. 41,000+ shareholders at peak suggests retail-dominated ownership.
- Mr. Madhusudan Prasad re-appointed Independent Director for 3 years from Jun 2026.

## 8. Outlook and Guidance

- No formal guidance provided (no earnings call). Analyst consensus (informal, Markets Mojo/Univest) expects FY27E revenues of Rs. 2,700-2,800 Cr on MSIL sustained volume growth.
- MSIL's Kharkhoda plant (targeted 1M units/year by FY30) is the next major supply agreement opportunity for JAYBARMARU — board meeting in May 2026 likely discussed NDA-bound terms. No disclosure yet.

## 9. Risks Discussed (from press commentary)

- Markets Mojo headline: 'Stellar Profit Surge Masks Underlying Concerns' — correctly flags one-time items but does not impair the margin thesis.
- EV transition: No disclosure from management on EV content strategy. This is the single-largest long-term risk with no current mitigation visibility.

## 10. Market Reaction

- Q4 results declared ~May 19, 2026. Stock hit 20% upper circuit on May 21, 2026 (Rs. 103.27 → Rs. 117.35). Continued to run to Rs. 150 by Jun 15, 2026 (+45% in ~3.5 weeks). Stock is now at its 52-week high — short-term momentum positive, but new positions should account for the post-result re-rating already in the price.
